TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the State Almshouse and State Farm, in compliance with the requirements under section 3, chapter 88 of the Public Statutes, herewith present their forty-first annual report, which, with the report of the superintendent and resident physician herein submitted, shows the condition of the State Almshouse at Tewksbury for the financial year ending Sept. 30, 1894.

From the records it appears that 3,644 persons have been admitted to the different departments of the institution during the past year, an increase of 484 over the previous year, making the total number 100,850 persons admitted since it was established forty-one years ago.

Under chapter 47 of the Acts of the Legislature for the year 1894 the sum of $135,000 was appropriated for the payment of salaries, wages and labor and for other current expenses at said institution for the present calendar year. For a detailed statement of the expenditure of the same see report of the superintendent, hereto annexed, which has been examined and verified by the trustees.

The new kitchen, boiler house, boilers, bakery and dining-room, which were authorized under chapter 47 of the Resolves of 1893, have been completed and furnished, and are well adapted for the purposes for which they were erected.

Under chapter 57 of the Resolves of the year 1893 a sum not exceeding $150,000 was appropriated; said sum to be expended at the State Almshouse at Tewksbury under the direction of the trustees and superintendent of said institution, for the purpose of erecting fire-proof buildings, with such improvements and additions as may be necessary in place of the present wooden structure.

Plans and specifications for the erection of the east wing of said buildings were prepared by John A. Fox, architect, of Boston; and George E. Barkley of Lowell was awarded the contract. The east wing is completed, and as soon as furnished will be occupied by male inmates.

The contract for the erection of the administration building, also the west wing for women and the house for the superintendent and his family, was awarded to L. E. Locke of Lawrence. It is expected that all of said buildings will be completed, furnished and ready for occupancy by Jan. 1, 1895. The old wooden structure will be taken down as soon as possible after the new buildings are completed.

The woman's asylum building, as authorized under chapter 73 of the Resolves of 1894, has been repaired and improvements have been made on the same during the past year.

A sum not exceeding six thousand dollars was appropriated under chapter 73 of the Resolves of 1894 for the construction of a chapel, by remodelling the so-called kitchen and bakery building and furnishing the same. Upon examination the trustees find said sum to be insufficient for the proper construction of said building so as to accommodate the large number of inmates; an additional appropriation is therefore recommended for said purpose.

It is also recommended that an appropriation be made for the erection of a substantially fire-proof building as an annex to the present hospital asylum building for insane women. The present building is of wood, built many years ago, and would be dangerous in case of fire.

It is also recommended that an appropriation be made for the purchase of a new boiler at the pumping-station, the one now in use being deemed unsuitable by the State inspector for the work required of it.

The annual inventory, as required under section 7, chapter 79 of the Public Statutes, has been taken, and an appraisal made of the real and personal property connected with the institution and belonging to the Commonwealth, by Messrs. Pedrick & Closson of Lawrence, whose report is hereto annexed.

It is unnecessary for the trustees to give a full and detailed statement of the number of inmates admitted and discharged since their last report, or the number remaining in each department of the institution, the appropriations and receipts, the average weekly cost, the disbursements and expenditure of money under special appropriations and otherwise, the products of the farm and garden, the articles manufactured and the different persons employed during the year, — as all of these facts, with other valuable statistical information relating to the institution, will be found in the report of the superintendent and resident physician, herewith submitted.

Several important improvements have been suggested by the superintendent in his report, which have received the approval of the trustees, and an appropriation is recommended to carry the same into effect. Nothing unusual has occurred in any department of the institution the past year excepting the large increase in the number of inmates over former years.

The products of the farm and garden have been abundant, and largely in excess of previous years. From the report of the superintendent it appears that the cost per inmate is less than last year.

The institution continues in its usual excellent condition, and the trustees take pleasure in again publicly acknowledging the faithful and efficient services which the superintendent, Dr. Herbert B. Howard, and the officers and attendants appointed by him, have rendered the institution during the past year, in the discharge of the responsible and varied duties devolving upon them.

Respectfully submitted,

J. WHITE BELCHER.
WILLIAM T. CAROLIN.
JACOB H. HECHT.
SARAH D. FISKE.
ANNA F. PRESCOTT.
CLARENCE P. LOVELL.
PAYSON W. LYMAN.

TEWKSBURY, Oct. 31, 1894.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

Another year has passed, and I have the honor of presenting to you the forty-first annual report of the State Almshouse.

The number of persons admitted during the year was 3,644, or 484 more than last year. There were 1,004 inmates at the beginning of the year, which was the smallest number present on any one day. The largest number present was 1,563, on the twenty-eighth day of February. The weekly average has been 1,217, or 167 more than last year.

The cash disbursements for the year have been $121,365.36, making a weekly per capita cost of $1.91.

Income.

During the year $878.61 have been turned over to the State treasurer for articles sold, etc. Bank-books left by deceased inmates to the amount of $921.64 have been turned over to the public administrator, Mr. George H. Stevens. The in-door poor department has collected $120 for United States cases boarded here and $28,397.37 * for city and town cases. This leaves the net outlay to the State for the running expenses of this institution $91,047.74, or $6,141.62 less than last year.

Hospitals.

There have been treated in the hospitals 2,940 patients, or 484 more than last year. There has been the same number of deaths the last year as the year before, — 259; they are divided the same, — 180 males and 79 females. Thirty-nine of these deaths were among the insane.

---

* From July to July.

We have been comparatively free from contagious diseases. There have been 17 cases of whooping-cough, 13 of typhoid fever, 4 of small-pox, 2 of scarlet-fever and 1 of diphtheria. The hospitals were much crowded during the winter; we think they can be relieved during the coming winter by using the new ward over the dining-room as a convalescent ward for men.

Maternity. — There have been 120 confinements during the year; 84 of the children were illegitimate. Forty of the mothers were born in Ireland, 35 in England, 22 in other foreign countries and 23 in the United States.

During convalescence, two of our maternity cases came down with typhoid fever, the first cases of this disease that have broken out inside of the institution for years. The maternity cases otherwise have done fully as well as usual. The cause of the typhoid has not been satisfactorily explained. There is an old sewer running under the building that in my judgment ought to be removed. It would be better also if the building were turned quarter way around, so that the sun will strike every room.

We have 241 patients remaining in the hospitals at the end of the year.

TRAINING SCHOOL FOR NURSES.

The lectures and recitations for the nurses began on the 1st of October and continued to the 1st of June. The asylums for the insane have been brought under the same superintendent of nurses, and lectures will be given regularly there during the coming winter. We have extended the training-school work to the asylums, after watching its benefits to the hospital for the past three years. I would like to recommend that the proper steps be taken so that our nurses can have a diploma issued to them at the end of their course of training.

ASYLUM FOR INSANE.

During the past year the Board of Lunacy and Charity has transferred to the asylums for the insane 69 patients, — 19 men and 50 women. The number remaining at the end of the year is 460, — 94 men and 366 women.

The women are all brought into one dining-room for their meals. This change enables better supervision at meal-time, and allows the food to be served without being carried out of doors, the women now going to their food instead of their food being sent to them. The insane women, now that their dining-room is so near the kitchen, are used to much better advantage in preparing food for cooking than heretofore. Their yard has been doubled in size, now containing about two acres, and more concrete walks have been laid in it. All patients use the yard, but to the class which is unfitted for taking to walk this large yard is of untold value.

Statement No. 6 and the Tables of Uniform Statistics contain additional information in regard to the insane.

Improvements made during the Year.

The kitchen and bakery have been moved to the south end of the yard, into the new quarters fitted up during the past year, and dining-rooms for all men outside of the hospital and for the insane women have been built adjoining the kitchen. These dining-rooms are spacious enough so that about nine hundred people can sit down at one time, and have been in use for several months.

A large refrigerator has been fitted up in the rear of the kitchen, with a pork-cellar underneath it. About two hundred feet south of the kitchen we have built a greenhouse in place of the one that stood in the middle of the yard, which had to be torn down during last winter.

The men's dormitory, which was begun about one year ago, has been finished and occupied. The administration building, women's dormitory and superintendent's quarters, which were begun early last spring, are now covered in and nearly all plastered, and we hope they will all be occupied soon after January 1.

A new six hundred and seventy-five light dynamo has been added to the electric plant; a new pump has been put in at the pumping-station with a capacity of seven hundred and fifty thousand gallons in twenty-four hours.

The repairs on the women's asylum, for which an appropriation was granted by the last Legislature, are nearly completed.

IMPROVEMENTS SUGGESTED.

The wooden building occupied by insane women has been referred to in the two preceding annual reports, and the coming year would be a good time to replace it.

The changes in the maternity building are referred to under a former head.

A small appropriation will be needed for furnishing the administration building.

New machinery is needed in the laundry, including a sterilizer.

The boiler at the pumping-station, according to the inspector, is beginning to weaken, and should be replaced during the coming year.

Our pasture land has been used up in extending the tillage land of the farm. We need land for pasturing, and would like it if it can be bought at reasonable prices.

The coming winter may show that we have overtaxed our boiler plant on the west side of the yard by requiring it to heat part of the new buildings. If a new boiler should be required at this station, the electric light plant would have to be somewhat rearranged.

The new buildings have been attached to the high-water service, which we believe will prove adequate for them and for what it was supplying before. The lower part of the high-water service tank in places has been badly corroded. This part was built of a lighter iron than would have been used had extending the tank to its present height been anticipated. Although we believe it may last some years, it is impossible to say when it may fail us.

Our thanks are due to all the chaplains for their kind and efficient work among the inmates. We regret to state that during the past year two of the chaplains have taken up their work in other fields, — Rev. Father Gigault, who was attending the institution when I first came here in 1883, and has been here a good share of the time since that date, and Rev. A. Q. Davis, who has been here since 1887. Both were indefatigable workers for the welfare of the inmates and officers of this institution.

We wish to thank those who have contributed papers and pamphlets for distribution among the inmates during the past year, and can assure them that they have been carefully distributed by an impartial hand to the inmates. Although many have been sent, more could be used to advantage. The institution is ready at any time to pay expressage on packages of literature of a non-sectarian character to be distributed among its inmates.

Thanking you for your confidence, counsel and support during the past year, I remain,

Very respectfully yours,

HERBERT B. HOWARD,
Superintendent and Resident Physician.

SCHEDULE A.

Real and Personal Estate.

Live stock,		$9,781 20
Carriages and agricultural implements,		6,443 80
Machinery and mechanical tools,		51,013 18
Beds and bedding,		29,381 70
Other furniture and property,		30,592 40
Personal property in superintendent's department,		15,179 25
Ready-made clothing,		16,626 80
Dry goods,		3,027 30
Groceries and provisions,		6,863 22
Drugs and medicines,		1,426 90
Product of farm on hand,		9,221 38
Product of garden on hand,		3,695 19
Library, medical, etc.,		1,686 00
Fuel,		4,743 00
Real estate,	$525,989 06	
Land, with out-buildings,	29,875 00	
		555,864 06
		$745,545 38

This is to certify that the foregoing is a true schedule and appraisal of the personal property and real estate at the State Almshouse at Tewksbury, Mass., belonging to the State of Massachusetts, Sept. 30, 1894.

(Signed) PEDRICK & CLOSSON.

Then personally appeared before me William R. Pedrick, and made oath that the foregoing schedule and appraisal is correct, according to his best knowledge and belief.

(Signed) G. E. HOOD,
Justice of the Peace.

REVISED TABLES

FOR

UNIFORM STATISTICS

IN THE

MASSACHUSETTS HOSPITALS AND ASYLUMS FOR THE INSANE.

Approved by the State Board of Lunacy and Charity,
March 10, 1891.

1. — *General Statistics of the Year.*

	INSANE.			HABITUAL DRUNKARDS.			VOLUNTARY PATIENTS.			AGGREGATE.		
	Males.	Females.	Totals.	Males.	Females	Totals.	Males.	Females.	Totals.	Males.	Females	Totals.
Patients in hospital Oct. 1, 1893,	94	369	463	–	–	–	–	–	–	94	369	463
Admitted within the year,	19	50	69	–	–	–	–	–	–	19	50	69
Whole number of cases within the year,	113	419	532	–	–	–	–	–	–	113	419	532
Discharged within the year,	11	22	33	–	–	–	–	–	–	11	22	33
Viz.: as recovered,	–	1	1	–	–	–	–	–	–	–	1	1
much improved,	1	2	3	–	–	–	–	–	–	1	2	3
improved,	–	1	1	–	–	–	–	–	–	–	1	1
not improved,	10	18	28	–	–	–	–	–	–	10	18	28
not insane,	–	–	–	–	–	–	–	–	–	–	–	–
Deaths,	8	31	39	–	–	–	–	–	–	8	31	39
Patients remaining Sept. 30, 1894,	94	366	460	–	–	–	–	–	–	94	366	460
Viz.: supported as State patients,	69	229	298	–	–	–	–	–	–	69	229	298
town patients,	25	137	162	–	–	–	–	–	–	25	137	162
private patients,	–	–	–	–	–	–	–	–	–	–	–	–
Number of different persons within the year,	113	419	532	–	–	–	–	–	–	113	419	532
Persons admitted,	19	50	69	–	–	–	–	–	–	19	50	69
Persons recovered,	1	3	4	–	–	–	–	–	–	1	3	4
Daily average number of patients,	98.75	372.86	471.61	–	–	–	–	–	–	98.75	372.86	471.61
Viz.: State patients,	73.58	232.5	306.08	–	–	–	–	–	–	73.58	232.5	306.08
town patients,	25.	140.33	165 33	–	–	–	–	–	–	25.	140.33	165.33

2.—*Monthly Admissions, Discharges and Averages.*

MONTHS.	ADMISSIONS.			DISCHARGES.			DEATHS.			DAILY AVERAGE OF PATIENTS IN THE HOUSE.

Commonwealth of Massachusetts.

TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The trustees of the State Almshouse and State Farm, in compliance with the requirements under section 3, chapter 88 of the Public Statutes, herewith present their forty-second annual report, which, with the report of the superintendent and resident physician, herein submitted, shows the condition of the State Almshouse at Tewksbury for the financial year ending Sept. 30, 1895.

From the records it appears that 3,071 persons have been admitted to the different departments of the institution during the past year, making the total number 104,255 persons admitted since it was established, forty-two years ago.

Under chapter 25 of the Acts of the Legislature for the year 1895 the sum of $132,500 was appropriated for the payment of salaries, wages and labor and for other current expenses at said institution for the present calendar year. For a detailed statement of the expenditure of the same see report of the superintendent, hereto annexed, which has been examined and verified by the trustees.

Under chapter 57 of the Resolves of the year 1893, authorizing the erection of fire-proof buildings, viz., a dormitory for men, a dormitory for women, an administration building and a house for the superintendent and his family, all of said buildings have been completed and furnished within the amounts appropriated for the same, and are now occupied. The work on the chapel building has not yet been commenced.

Under chapter 56 of the Resolves of the year 1895 the sum of $50,000 was appropriated for the erection of a new building for insane women. Plans for the same have been prepared by John A. Fox, architect, of Boston, which have been accepted by the trustees, and work will be commenced at once in laying the foundation for the same preparatory to the erection of said building.

The farm is under a good state of cultivation, and the products of the same during the past year have been satisfactory.

It is recommended that an appropriation be made for consolidating the heating stations of the different departments of the institution and for the removal of the present boiler house and its contents, thereby making a common centre for furnishing heat for the different departments and for other purposes; also for the purchase of additional land for pasturage and for furnishing material for building and repairing roads and driveways over different parts of the farm, providing the same can be purchased at a reasonable consideration.

Several important improvements have been suggested by the superintendent in his report, which have received the approval of the trustees, and an appropriation is recommended to carry the same into effect.

The annual inventory, as required under section 7, chapter 79 of the Public Statutes, has been taken, and an appraisal made of the real and personal property connected with the institution and belonging to the Commonwealth, by William R. Pedrick of Lawrence, whose report is hereto annexed.

It is unnecessary for the trustees to give a full and detailed statement of the number of inmates admitted and discharged since their last report, or the number remaining in each department of the institution, the appropriations and receipts, the average weekly cost, the disbursements and expenditure of money under special appropriations and otherwise, the products of the farm and garden, the articles manufactured and the different persons employed during the year; as all of these facts, with other valuable statistical information relating to the institution, will be found in the report of the superintendent and resident physician, herewith submitted.

The excellent condition of the institution in all its departments continues, as in past years, the result of the faithful and efficient services of the superintendent, Dr. Herbert B. Howard, and those connected with him in the care and management of the same; and the trustees heartily concur with the statement made by the State Board of Lunacy and Charity in their last report, "that the management of the entire institution continues to be worthy of the highest commendation."

Respectfully submitted,

J. WHITE BELCHER.
ANNA F. PRESCOTT.
JACOB H. HECHT.
SARAH D. FISKE.
WARREN E. RICE.
LEONARD HUNTRESS.
PAYSON W. LYMAN.

TEWKSBURY, Oct. 29, 1895.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

Twelve years have passed since I became acquainted with the work at the State Almshouse. During these twelve years there have been many changes in the institution. Year by year, as the facilities for taking care of the sick have been improved, more and more of this class have been sent here. At that time it was no difficult matter for able-bodied men to stop in the almshouse and escape work; to-day it is well-nigh impossible. Able-bodied men within these walls have become more scarce as the years have passed by. When I came to the institution the work on the women's side was largely done by able-bodied drunkards. Jane Duffy and Mary Tynan were memorable examples of this class. When they were not serving sentences at Sherborn or Deer Island they were sure to be found at the State Almshouse. I have known the former to appear at the institution barefooted and bareheaded, and with but a single garment, a thin cotton dress, to cover her. The workers on the women's side at present are the pregnant girls, State girls and insane women.

The almshouse was established in 1854. It soon became necessary to set aside a small ward for a hospital; later another small ward was set aside for idiots and insane. A survey of the annual reports shows a gradual increase in hospital cases, until to-day the institution consists of hospital, asylum for the insane and almshouse. It would seem reasonable that some change of name might be made which should more nearly represent the institution at the present day.

The number of persons admitted during the past year was 3,071. There were 1,039 inmates present at the beginning of the year. The smallest number present was 1,028, on the twenty-third day of July; and the largest number, 1,411, March

9 and 10. The weekly average has been 1,167, or 50 less than last year. The cash disbursements for the year have been $138,802.76, making the weekly per capita cost $2.29.

INCOME.

During the year $1,504.35 have been turned over to the State treasurer for articles sold, etc. The in-door poor department has collected $311.14 for the United States cases boarded here and $27,862.26* for city and town cases, leaving the net outlay for running the institution $109,125.01.

HOSPITALS.

There have been treated in the hospitals 2,810 patients. There have been 221 deaths, — 157 male and 64 female. Twenty-eight of these deaths were among the insane. We have had even less contagious diseases than last year, — sixteen cases of whooping-cough, 23 of typhoid fever and 11 of diphtheria.

Maternity. — There have been 78 confinements during the year; 58 of the children were illegitimate. Twenty-six of the mothers were born in the United States, 20 in Ireland, 16 in the British Provinces, 6 in England and 10 in other foreign countries.

The maternity hospital should be the best as regards possibility for aseptic work, but it is the poorest of our hospital buildings. The floors are very poor, and one-half of the rooms are located on the north side of the building, where there is no possibility of the sun striking in at any time of the day. If this building were turned quarter way round and renovated, and connected with the main hospital for women by a sun-room, its safety and efficiency would be much increased.

The following letter explains itself: —

HARVARD UNIVERSITY MEDICAL SCHOOL,
BOSTON, MASS., Feb. 4, 1895.

DEAR DOCTOR HOWARD: — I am glad to be able to report to you that the faculty of this school has considered your request that the State Almshouse Hospital be included among those whose interne service exempts from the fourth year elective examinations of this school. The faculty has voted to accede to your request. I will post a notice on our bulletin board, so that the students will be informed before the issue of the next catalogue.

---

* From July to July.

Yours truly,
W. L. Richardson, *Dean.*

Dr. Herbert B. Howard, *Superintendent, State Almshouse, Tewksbury.*

This letter places our internes on a footing with the internes of the best hospitals of the State. At present Joseph W. Proctor is senior interne and Isaiah L. Pickard junior.

Tables of medical and surgical diseases and causes of deaths will be found further on in the report.

Training School for Nurses.

Lectures and recitations for nurses began on the first of October and continued until the first of June. Applicants for this work were never so numerous as at the present time. I feel that during the last year of their work it would be to the advantage of the institution, as well as of the nurses, if they were given some instruction in special cooking for the sick and also in massage. The expense would be comparatively small. If these additions were made and a diploma given, it would need but one thing more to place our training school on an equal footing with the others of the State, and that is a nurses' home.

At the last conference of Charities and Corrections Dr. G. H. M. Rowe, medical superintendent of the Boston City Hospital, referred to our training school as follows: "Perhaps the most conspicuous and notable example of the improvement rendered to the pauper sick by trained nursing is in the State Almshouse at Tewksbury, Mass. . . . The first move toward a better condition was the appointment of a medical superintendent; from that time steady improvement has been made, and I am sure, from the trend of affairs shown there, it has not yet reached its height. With an enlargement and improvement of its medical staff, the construction of new and modern buildings built upon designs equal to good general hospitals, and later the introduction of a training school for nurses, this hospital, as far as I am able to ascertain, has obtained the highest rank of any strictly almshouse hospital in this country."

Asylum for the Insane.

During the past year the Board of Lunacy and Charity have transferred to the asylum for the insane 88 patients, — 28 men and 60 women. The number remaining at the end of the year was 473, — 100 men and 373 women. The daily average has been 480.

The large brick building which is used by the insane women would be much improved by introducing some ventilating shafts. Heat could be brought into the rooms by the same shafts, thereby getting the radiators off the floors. The enlarged yard has proved a wonderful help, but we need more concrete walks for winter use and more summerhouses in the upper part of the yard.

Statement No. 6 and tables of uniform statistics contain additional information in regard to the insane.

Improvements made during the Year.

The women's dormitory was finished and occupied about February 1, the administration building March 1 and the cottage July 1. The old wooden building has been torn down and removed from the yard. A new boiler has been put in and new chimney built at the pumping-station.

We have started to put a complete circuit of iron poles for the electric wires around the institution. The wires, which have hitherto gone in all directions, without any system whatever, are being straightened out and placed on these poles.

In the centre of the yard, where the old greenhouse formerly stood, we have a little pond of water, surrounding a rustic fountain made of water-worn stones gathered from the farm. This has been built by Dr. Nichols in his leisure time.

The library is being catalogued and rearranged, and will soon be on a better basis than ever before.

Improvements suggested.

More land is needed for pasturing. The greater demand for milk in the institution requires that we should have more barn room for tying cattle.

Summerhouses and concrete walks have been referred to.

The main boiler house, now that the institution has been largely rebuilt, is not where it should be. Locating it on lower ground, with a view to consolidation, would be of great advantage.

The fence on the front side of the yard, now a temporary affair, should be replaced by a brick one.

The ventilation of the women's asylum, the changes needed in the maternity hospital, and the home for nurses, have been spoken of elsewhere.

A small storage battery connected with our electric plant would be of great service for lighting dark nooks on cloudy days.

Our thanks are due to all our chaplains for efficient work among the inmates.

I wish to thank all who have contributed books or papers for the inmates during the past year. The institution still stands ready at all times to pay express on literature of a non-sectarian character to be distributed among the inmates.

Thanking you for your confidence and counsel and support during the past year, I remain,

Very respectfully,

HERBERT B. HOWARD,
Superintendent and Resident Physician.

SCHEDULE A.

Real and Personal Estate.

Live stock,		$10,017 95
Carriages and agricultural implements,		4,726 60
Machinery and mechanical tools,		51,428 90
Beds and bedding,		24,738 39
Other furniture and property,		34,143 84
Personal property in superintendent's department,		14,197 00
Ready-made clothing,		19,740 22
Dry goods,		2,915 78
Groceries and provisions,		5,077 15
Drugs and medicines,		1,096 69
Product of farm on hand,		7,605 40
Product of garden on hand,		3,180 82
Library, medical,		1,775 00
Fuel,		11,326 00
Real estate,	$544,327 72	
Land, with out-buildings,	28,250 00	
		572,577 72
		$764,547 46

This is to certify that the foregoing is a true schedule and appraisal of the personal property and real estate at the State Almshouse at Tewksbury, Mass., belonging to the State of Massachusetts, Sept. 30, 1895.

(Signed) WM. R. PEDRICK.

Then personally appeared before me William R. Pedrick, and made oath that the foregoing schedule and appraisal is correct, according to his best knowledge and belief.

(Signed) JAMES R. SIMPSON,
Justice of the Peace.

SCHEDULE B.

Schedule of Persons employed at the State Almshouse, Tewksbury, Mass., within the Year ending Sept. 30, 1895.

NAME.	Nature of Service.	Duration of Service.	Compensation.
Herbert B. Howard,	Superintendent and physician,	1 year,	$2,437 48
John M. Gile,	Assistant superintendent and physician,	1 year,	1,500 00
John H. Nichols,	Assistant physician,	1 year,	1,049 97
Elizabeth Newcomb,	" "	1 year,	699 96
D M. Trecartin,	Pharmacist,	to July 1,	225 00
W. A. Hitchcock, Jr.,	"	from Aug. 11,	41 13
Hiram P. Dinsmore,	Clerk,	1 year,	999 96

Infiltration eyelid,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Blepharitis marginalis,	1	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-
Ptosis,	1	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Abscess of lachrymal sac,	1	-	1	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Atrophy of eyeball,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Cancer of eyeball,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-
Conjunctivitis, acute,	2	1	1	1	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-	1
Conjunctivitis, chronic,	4	-	4	2	-	-	-	1	-	-	-	-	-	-	1	-	-	3	-	-	-	1
Purulent ophthalmia,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Interstitial keratitis,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-
Abscess of cornea,	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-
Ulcer of cornea,	5	2	3	1	-	-	-	-	-	-	1	1	-	1	1	1	3	-	-	-	-	1
Pannus,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Iritis, syphiltic,	7	6	1	1	-	1	4	1	-	-	-	-	-	-	-	-	2	1	-	-	3	1
Cataract,	5	1	4	1	-	-	-	-	1	2	1	-	-	-	-	-	-	3	2	-	-	-
Diseases of the ear: —																						
Laceration of ear,	1	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Polypus,	4	4	-	-	1	-	1	-	-	-	-	-	-	1	1	1	1	-	-	-	1	1
Otitis media,	3	2	1	-	-	-	-	-	3	-	-	-	-	-	-	-	2	-	-	-	-	1
Trinitus aurium,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1
Diseases of the head, neck and face: —																						
Cancer of scalp,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-
Cancer of jaw,	6	5	1	2	-	-	1	1	-	-	-	-	-	-	2	-	-	2	-	4	-	-

Abscess of jaw,	3	3	-	1	-	1	-	-	-	1	-	-	-	-	-	1	2	-	-	-	-	-
Abscess of neck, convalescence,	3	2	1	-	-	-	1	-	2	-	-	-	-	-	-	-	3	-	-	-	-	-
Abscess of tonsil,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-
Ulcer of nose,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Sarcoma of parotic gland,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-
Cleft palate,	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-
Diseases of the spine: —																						
Kyphosis,	5	3	2	3	1	-	-	-	-	-	-	-	1	-	-	-	-	3	-	-	1	1
Potts disease,	3	3	-	-	-	-	-	-	1	1	-	-	1	-	-	-	-	2	-	-	-	1
Psoas abscess,	5	3	2	2	-	-	-	-	-	1	-	-	1	-	1	-	-	3	-	2	-	-
Diseases of bones and joints: —																						
Rachitis,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Periostitis,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Ankylosis,	4	4	-	3	-	1	-	-	-	-	-	-	-	-	-	-	-	3	-	-	-	1
Hyperostosis cranii,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-
Caries of sternum,	1	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Caries of ribs,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Alveolar abscess,	6	5	1	-	-	1	1	-	2	-	-	1	1	-	-	2	2	-	-	-	-	2
Diseases of the upper extremity: —																						
Abscess of axilla,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-
Abscess of hand,	4	3	1	1	2	-	-	-	1	-	-	-	-	-	-	1	2	-	-	-	-	1
Felon,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Inflamed elbow,	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Necrosis, fingers,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1
Diseases of the lower extremity: —																						
Tuberculosis of hip,	2	2	-	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	2	-	-
Cancer of hip,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Cancer of tibia,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-
Cancer of leg,	2	1	1	-	-	-	-	-	1	-	-	1	-	-	-	1	-	1	-	-	-	-
Deformity of hip,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Ankylosis of knee,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Synovitis of knee,	17	15	2	4	-	1	3	1	1	-	3	-	-	2	2	2	5	1	-	-	2	7
Tuberculosis of knee,	2	2	-	1	-	-	-	-	-	-	-	-	-	1	-	-	2	-	-	-	-	-
Inflammation of leg,	9	9	-	1	1	-	1	1	2	-	-	1	-	-	2	-	5	-	-	-	1	3
Inflammation of foot,	5	5	-	-	-	-	-	-	2	-	-	-	-	1	2	1	4	-	-	-	-	-
Abscess of foot,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Chronic ulcers,	38	22	16	6	-	7	1	2	5	1	3	3	2	3	5	2	17	1	-	-	9	9
Talipes equinovarus,	2	1	1	2	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-

TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

In compliance with the requirements of section 3, chapter 88 of the Public Statutes, the undersigned, trustees of the State Almshouse and State Farm, submit their forty-third annual report. The report of the superintendent and resident physician accompanying shows in detail the condition of the State Almshouse at Tewksbury for the financial year ending Sept. 30, 1896, and its present most urgent needs.

The records presented herewith show that 3,604 persons have been admitted to the different departments of the institution during the past year. This makes a total of 107,859 persons admitted during the forty-three years since it was established, and a yearly average of 2,508. The weekly average for this year has been 64 greater than that of last year and the number of admissions 533 greater.

Under chapter 61 of the Acts of the Legislature for the year 1896, the sum of $33,100 was appropriated for the payment of salaries, wages and labor, and for current expenses the sum of $100,000, a total of $133,000 for the maintenance of said institution for the present calendar year. For a detailed statement of the expenditures of the same we refer to the report of the superintendent, hereto appended, the expenditures having been examined and approved by us month by month.

Under chapter 73 of the Resolves of the year 1894 and chapter 56 of the Resolves of 1895, authority was given for the erection of a chapel, at a cost not exceeding $12,000, and a corresponding appropriation was made. The building thus authorized is now in process of construction, and it is expected to be ready for occupancy early in the coming year.

Under chapter 56 of the Resolves of the year 1895, the sum of $50,000 was appropriated for the erection of a new building for insane women. Plans prepared by John A. Fox, architect, of Boston, were accepted by the trustees. Bids for construction were submitted by several responsible builders. The contract was awarded to Staples Bros. of Lowell, early in the year. The work is drawing near to completion, and the structure will soon be ready for use.

Under authority given in chapter 92 of the Resolves of 1896, the farm area has been enlarged, and additional summer houses have been constructed and concrete walks laid in the yard for insane women. A brick wall therein authorized is now being constructed. Other work contemplated in the said resolve remains to be done.

For still other improvements made during the year the trustees refer to the paragraph of the superintendent's report describing the same.

The annual inventory, as required under section 7 of chapter 79 of the Public Statutes, has been taken, and an appraisal made of the real and personal property connected with the institution and belonging to the Commonwealth by Charles H. Littlefield of Lawrence, whose report is herewith presented.

Under the intelligent and careful oversight and direction of the superintendent and his subordinate farm officers, the farm is undergoing constant improvement and is contributing materially to the support and comfort of the inmates and to the economical administration of the institution. The product of the farm and garden for the season now closing has been unusually heavy.

The trustees invite attention to the statistical tables submitted by the superintendent and resident physician, giving a full and detailed statement of the facts relative to the inmates admitted and discharged during the year, the number now remaining in the different departments, the appropriations and receipts, the average weekly cost, the expenditures and disbursements under special or general appropriation, the products of the farm and garden, the articles manufactured and the persons employed during the year.

The superintendent in his report outlines improvements needed. His recommendations have been considered and approved by the trustees, and the needful appropriations are asked for in carrying out the same.

The trustees feel that in the superintendent, Dr. Herbert B. Howard, the Commonwealth has a faithful and efficient official, who can be relied on to fulfil the trust reposed in him with a just economy, and at the same time with a broad humanity. The excellent condition and record of the institution give satisfactory evidence on this point.

Respectfully submitted,

J. WHITE BELCHER.
JACOB H. HECHT.
ANNA F. PRESCOTT.
PAYSON W. LYMAN.
LEONARD HUNTRESS.
WARREN E. RICE.
SARAH D. FISKE.

Tewksbury, Oct. 30, 1896.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

This is the fifth time I have had the honor of presenting to you the annual report. The State Almshouse has taken care of 4,672 people during some part of the year; 3,604 of these have been admitted during the year. The smallest number present at any one time was 1,066, on the second day of October; and the largest number was 1,547, on the twenty-seventh day of February. The weekly average has been 1,231, or 64 more than last year. The cash disbursements for the year were $138,762.04, making the gross weekly per capita cost $2.17. During the year $1,569.05 have been turned over to the State treasurer for articles sold, etc. The in-door poor department has collected $386.50 for the United States cases boarded here and $31,002.04* for city and town cases, leaving the net outlay for running the institution $105,804.45.

It has been a productive year for the farm and garden; statement No. 5 of the annual report will testify to this. Although the hay crop was short, we raised 600 tons of ensilage which ought to carry us through, even with the addition of ten or twelve cows. The apple crop was especially heavy, 1,146 barrels; and there were 4,348 quarts of strawberries. The abundance of these and other fruits adds much to the success of the hospitals and asylums of the institution.

Hospitals.

There have been treated in the hospitals during the year 3,106 patients. Two hundred and seventy-two deaths have occurred, 39 of which were among the insane. Contagious cases have been almost entirely absent during the year, not a single case of diphtheria having occurred among the inmates.

---

* From July to July.

The men's hospital is overcrowded, and it would seem as though something would have to be done to relieve the wards during the next year; perhaps a cottage for consumptives adjacent to one of our groves would produce the desired result.

There have been 105 confinements during the year; 72 of the children were illegitimate. Twenty-nine of the mothers were born in the United States, 35 in Ireland, 17 in the British Provinces, 10 in England and 14 in other foreign countries.

The medical staff has met with several losses during the year. Dr. John M. Gile, assistant superintendent for nearly five years, left in September, to become lecturer on theory and practice at the Dartmouth Medical School. Dr. Elizabeth Newcomb, after over four years of service, left the first of September, to become lecturer on physiology and director of the girls' gymnasium at Oberlin College. Dr. J. F. Edgerly, who came to fill out the year, was called to the Pennsylvania Hospital for Insane as one of their assistants. They all have gone to more lucrative positions, and have left with the best wishes of this institution for their success.

Our interne service on the men's side has produced plenty of good candidates to fill vacancies occurring in the staff; I would like to recommend like service on the women's side, hoping to produce a similar result. At the present time, Dr. Charles S. Little is senior interne and Dr. William F. Kernan junior interne.

The constant increase of patients both in the hospitals and the asylums has brought us to the point where we need at least one additional assistant physician, and a bacteriologist to assume the direction of the work in the laboratory.

Asylum for the Insane.

The asylums have received during the year 78 patients. The daily average number was 475; 474 cases remain at the end of the year. The classification in this department will be much better when our new building is completed; at that time we can take 40 more patients, and we shall need at least 2 more attendants.

Training School for Nurses.

During the year four of our nurses have passed the required examinations and have received diplomas, — Misses Lillie Fletcher, Albina M. Manning, Heathy Stewart and Nellie S. Redmond. Applications for entrance have never been so numerous as at the present time. Bringing the men's hospital more directly under the charge of the superintendent of nurses, Mrs. Clara Stevens Glidden, we expect will be of advantage to the hospital as well as to the training school. This will give our nurses experience in the care of men, women and children, of lying-in cases and of the insane.

Improvements made during the Year.

The old cellar holes in the yard have been filled; summer houses built in the women's asylum yard; more concrete walks laid in both yards; Gegenstrom shower baths have been introduced in the women's asylum; four arc lights have been added to the out-door service; a telephone system has been completed throughout the institution; several pine groves have been cleaned up for the use of the insane and consumptives during pleasant weather; an ambulance service has been established, and one of our internes accompanies the ambulance to the station to meet every stretcher case; a quarter of a mile of macadamized road has been built between the station and the institution, and we hope to complete the road during the coming winter; the stone crusher plant installed last winter has proved very useful; the new asylum for women is approaching completion; and the chapel, we hope, will be roofed before cold weather.

Improvements suggested.

After the new asylum for women is completed and occupied will be a favorable time to renovate the old asylum for women at the south end of the yard.

The maternity ward still needs the changes referred to in former reports. A storehouse for the products of the farm and garden, connected with a small cold storage plant, would be a valuable adjunct to the economical administration of this institution. A cottage for consumptives has been referred to.

The land beyond the village is not well located for institution purposes, and, if a reasonable price could be obtained for it, I think it would be better to dispose of it.

At different times there has been talk about changing the name of the institution to something that would give a better idea of its true character; if such a name can be found, perhaps it would be well to do it.

I have accompanied my report to you with two tables of statistics extending over the past twenty-five years; one is confined to the financial statements, the other is about the inmates.

I wish to thank our chaplains for their untiring attention to the sick during the year and for their hearty good fellowship both in regard to the welfare of the inmates and to the interests of the institution. A great many books and papers have been contributed during the year by our outside friends, for which we wish to thank the contributors and to renew the offer of the institution, — to always be ready to pay the express on papers or literature of non-sectarian character to be distributed among its inmates.

Thanking you for your continued confidence, your wise counsel and untiring support during the past, I remain,

Very respectfully,

HERBERT B. HOWARD,
Superintendent and Resident Physician.

DISEASES OF THE NERVOUS SYSTEM — Con.																						
Diseases of intellect : —																						
Dementia, chronic,	9	2	7	2	1	2	-	-	-	-	1	1	1	-	1	-	-	3	1	3	2	-
General paralysis of insane,	6	5	1	1	-	-	1	-	-	-	1	3	-	-	-	-	-	4	-	2	-	-
Idiocy,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Imbecility,	6	4	2	2	-	-	-	1	-	-	1	-	-	2	-	-	-	2	3	-	1	-
Melancholia,	4	2	2	3	-	-	-	-	-	-	-	-	-	1	-	-	-	1	1	1	-	1
Insane, unclassified,	27	11	16	1	-	4	3	1	1	3	1	4	2	4	3	-	-	4	18	-	3	2
Chronic mania,	2	-	2	-	1	-	-	1	-	-	-	-	-	-	-	-	-	1	-	1	-	-
Acute mania,	2	-	2	-	-	-	-	-	-	-	-	-	-	-	2	-	-	2	-	-	-	-
DISEASES OF THE CIRCULATORY SYSTEM.																						
Diseases of heart and arteries : —																						
Cardiac debility,	7	7	-	3	-	1	-	2	1	-	-	-	-	-	-	-	1	2	-	-	3	1
Cardiac dilatation,	9	9	-	4	1	-	-	-	1	1	1	-	-	-	1	-	-	3	-	2	2	2
Cardiac, functional,	12	10	2	-	1	1	1	-	-	-	2	5	1	-	1	-	-	2	1	2	4	3
Pericarditis,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-
Endocarditis,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Aortic, valvular,	18	14	4	2	2	1	1	1	1	4	2	1	-	1	2	-	-	3	1	2	1	11
Mitral, valvular,	48	33	15	10	3	3	3	3	5	2	3	3	5	3	5	-	2	3	1	8	8	26
Pulmonic, valvular,	3	-	3	-	-	-	-	-	-	1	-	-	2	-	-	-	-	-	-	-	-	3
Tricuspid, valvular,	2	-	2	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	2
Mitral and aortic, valvular,	2	2	-	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-	2	-	-
Aneurism,	2	1	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	1	-	-
Cardiac, unclassified,	4	4	-	-	1	-	-	-	-	-	-	3	-	-	-	-	-	-	-	3	-	1
DISEASES OF RESPIRATORY SYSTEM.																						
Diseases of the nostrils : —																						
Naso-pharyngeal catarrh,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Coryza,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Nasal polypus,	1	-	1	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-

Diseases of larynx, trachea, bronchi: —																						
Laryngitis,	3	2	1	-	1	-	-	1	-	-	-	-	-	-	1	1	2	-	-	-	-	-
Bronchitis, acute,	86	63	23	4	10	8	15	10	14	5	10	2	1	3	4	44	4	-	-	1	25	12
Bronchitis, chronic,	50	31	19	13	4	7	1	3	2	4	6	4	3	-	3	-	-	10	-	2	7	31
Asthma,	16	12	4	3	1	1	-	1	1	2	2	1	-	1	3	-	8	1	-	-	-	7
Enlarged tonsils,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Diseases of lungs: —																						
Pneumonia, lobar,	62	39	23	4	1	5	4	10	22	11	3	1	-	1	-	26	-	-	-	36	-	-
Pneumonia, bronchial,	4	2	2	-	-	-	1	1	2	-	-	-	-	-	-	1	-	-	-	3	-	-
Pneumonia, lobular,	11	7	4	-	1	2	-	3	3	2	-	-	-	-	-	10	-	-	-	1	-	-
Pneumonia, convalescence,	3	1	2	1	-	-	-	-	1	1	-	-	-	-	-	3	-	-	-	-	-	-
Phthisis,	237	191	46	62	12	18	19	14	10	19	17	19	16	14	17	-	-	68	-	78	5	86
Empyema,	3	3	-	-	1	-	-	-	-	-	1	-	1	-	-	-	1	-	-	1	-	1
Diseases of pleura: —																						
Pleurisy, acute,	22	20	2	2	1	3	3	4	1	2	-	3	1	1	1	2	8	-	-	-	8	4
Pyro-pneumo thorax,	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-
Pleurisy, with effusion,	5	4	1	-	-	-	2	1	-	-	1	-	1	-	-	-	3	-	-	1	-	1
DISEASES OF DIGESTIVE SYSTEM.																						
Diseases of fauces, palate and pharynx: —																						
Tonsillitis,	24	6	18	-	3	6	3	4	2	4	-	-	1	1	-	22	1	-	-	-	-	1
Pharyngitis,	7	7	-	-	2	2	1	-	1	-	1	-	-	-	-	3	3	-	-	-	-	1
Ulceration, palate,	1	-	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-
Stomatitis,	4	3	1	-	-	-	-	-	2	-	-	-	1	-	1	4	-	-	-	-	-	-
Stomatitis, ulcerative,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Diseases of stomach: —																						
Gastric cancer,	2	1	1	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-	-	2	-	-
Dyspepsia,	11	7	4	1	-	1	1	-	2	-	1	-	1	2	2	5	-	2	-	-	-	4
Dilatation, stomach,	2	2	-	1	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1
Gastro-intestinal catarrh,	2	1	1	-	-	-	2	-	-	-	-	-	-	-	-	-	2	-	-	-	-	-
Diseases of intestines: —																						
Acute diarrhœa,	81	49	32	18	3	1	-	1	1	3	2	4	28	13	7	76	-	-	-	5	-	-
Chronic diarrhœa,	9	9	-	1	1	-	-	-	1	2	2	-	1	-	1	4	-	2	-	1	-	2
Dysentery,	6	-	6	1	-	-	-	-	-	-	-	-	-	1	4	4	-	-	-	1	-	1
Constipation,	16	10	6	-	2	3	1	2	-	3	1	2	-	1	1	4	12	-	-	-	-	-
Tape worm,	2	2	-	-	1	1	-	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-
Cancer, sigmoid,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-
Diseases of liver: —																						
Hepatitis,	5	3	2	2	1	-	-	-	-	-	-	-	1	1	-	3	1	-	-	1	-	-
Cancer,	7	3	4	3	-	1	1	1	-	-	1	-	-	-	-	-	-	-	-	7	-	-
Cirrhosis,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1

TABLE OF DISEASES. *Medical* — Continued.

DISEASES.	PATIENTS.			1895.			1896.									DISCHARGED.						
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved.	Not Treated.	Died.	Out-patient Department.	Improved.
DISEASES OF DIGESTIVE SYSTEM — Con.																						
Diseases of peritoneum : —																						
Peritonitis,	2	2	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	2	-	-
Ascites,	2	1	1	-	-	-	-	1	-	-	1	-	-	-	-	-	-	1	-	-	-	1
Peritonitis, tubercular,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
DISEASES OF URINARY SYSTEM.																						
Diseases of kidneys : —																						
Interstitial nephritis,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Uræmia,	2	1	1	-	-	-	-	-	-	-	-	-	-	2	-	-	-	-	-	2	-	-
Active hyperæmia,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1
Acute nephritis,	15	14	1	1	2	1	-	1	2	2	2	2	1	1	-	-	-	2	-	2	3	8
Chronic nephritis,	21	18	3	5	3	1	1	3	-	3	3	1	-	1	-	1	1	3	-	9	2	5
Renal, unclassified,	2	2	-	2	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	1
Parenchymateous nephritis,	2	2	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	1
Diseases of bladder : —																						
Cystitis, acute,	6	2	4	3	-	-	-	-	1	1	-	-	1	-	-	2	2	1	-	-	1	-
Cystitis, chronic,	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Oxyluria,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-
DISEASES OF WOMEN.																						
Diseases of ovaries : —																						
Inflammation,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Ovarian cyst,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Diseases of womb : —																						
Anteversion,	1	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-
Endometritis,	3	-	3	1	-	-	-	-	2	-	-	-	-	-	-	1	1	-	-	-	-	1
Fibroid,	1	-	1	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Cystic degeneration of cervix,	1	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Laceration of cervix,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1
Cancer, uterus,	3	-	3	2	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	2

Functional diseases of womb: —																						
Menorrhagia,	1	–	1	–	–	1	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–
Metrorhagia,	3	–	3	–	–	–	1	1	–	–	–	–	–	–	1	1	1	–	–	–	–	1
Amenorrhœa,	1	–	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	1	–	–	–	–
Diseases of pregnancy: —																						
Pregnancy,	172	–	172	11	9	13	16	19	11	19	15	13	17	15	14	–	–	–	172	–	–	–

TABLE OF DISEASES. *Surgical*—Continued.

DISEASES.	PATIENTS.			1895.			1896.									DISCHARGED.						
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved.	Not Treated.	Died.	Out-patient Department.	Improved.
LOCAL DISEASES.																						
Diseases of male and female, etc.—Con.																						
Urethral fistula,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Venereal warts,	4	2	2	1	1	-	-	1	-	-	1	-	-	-	-	-	2	-	-	-	1	1
Rectocele,	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-
Lacerated perineum,	2	-	2	-	-	-	-	1	-	1	-	-	-	-	-	1	-	-	1	-	-	-
Pruritis vulvæ,	1	-	1	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Vaginal abscess,	1	-	1	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Adherent prepuce,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	1
Cancer, penis,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-
Tuberculosis, testicle,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-
Diseases female breast:—																						
Cancer, breast,	5	-	5	2	-	-	-	-	-	1	-	1	-	1	-	2	-	-	-	2	1	-
Mammary abscess,	5	-	5	2	-	-	-	-	-	1	-	-	-	1	1	4	-	-	-	-	1	-
Galactocele,	1	-	1	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Threatened mastitis,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-	-	-	-
Diseases of eyes and ears:—																						
Blind,	6	4	2	5	-	-	-	-	-	-	-	-	1	-	-	-	-	4	2	-	-	-
Amblyopia,	3	2	1	1	-	-	-	1	-	-	-	-	1	-	-	-	1	1	-	-	-	1
Trichiasis,	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-
Abscess, lachrymal sac,	2	1	1	-	-	-	-	-	-	-	-	-	2	-	-	1	1	-	-	-	-	-
Abscess, eyelid,	1	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-
Atrophy, eyeball,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Conjunctivitis, acute,	5	3	2	-	1	1	-	1	-	-	-	-	1	1	-	2	2	-	-	-	-	1
Conjunctivitis, chronic,	2	-	2	-	-	-	1	-	-	-	1	-	-	-	-	-	1	-	-	-	1	-
Purulent ophthalmia,	6	1	5	1	-	-	2	-	-	-	2	-	-	-	1	3	2	-	-	1	-	-
Abscess, cornea,	3	3	-	2	-	-	-	-	-	1	-	-	-	-	-	1	1	-	-	-	-	1
Ulcer, cornea,	2	-	2	1	-	-	-	1	-	-	-	-	-	-	-	1	1	-	-	-	-	-
Iritis, specific,	6	2	4	-	1	-	-	-	-	1	-	2	1	-	1	3	2	-	-	-	-	1
Cataract,	3	3	-	-	-	-	-	-	-	1	1	1	-	-	-	-	-	-	3	-	-	-
Paralysis ocular muscles,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-

Foreign body in eye,	1	1	–	–	–	–	–	–	1	–	–	–	–	–	–	–	1	–	–	–	–	–
Otitis media,	6	4	2	–	–	1	–	1	1	2	–	–	–	1	–	1	1	–	–	–	–	4
Mastoiditis,	1	1	–	–	–	–	–	–	–	–	–	–	–	1	–	1	–	–	–	–	–	–
Diseases of head, neck and face: —																						
Cancer, jaw,	7	7	–	2	1	–	3	–	–	–	–	1	–	–	–	–	–	1	–	6	–	–
Abscess of face,	2	2	–	–	–	–	–	–	1	–	–	–	1	–	–	–	–	–	–	–	1	1
Abscess of scalp,	3	1	2	–	1	–	–	–	–	–	–	2	–	–	–	3	–	–	–	–	–	–
Epithelioma lip,	1	1	–	–	–	–	–	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–
Sarcoma, parotid,	2	2	–	1	–	–	–	–	–	–	–	–	–	–	1	1	–	–	–	1	–	–
Cancer, larynx,	1	1	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–
Fatty tumor, cheek,	1	–	1	–	–	–	–	–	–	–	–	–	–	1	–	1	–	–	–	–	–	–
Necrosis of skull,	1	–	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	1	–	–	–	–
Diseases of spine: —																						
Kyphosis,	5	5	–	2	1	–	1	1	–	–	–	–	–	–	–	–	–	–	3	–	1	1
Potts disease,	3	3	–	2	1	–	–	–	–	–	–	–	–	–	–	–	–	–	2	–	–	1
Scoliosis,	2	1	1	1	–	–	–	–	1	–	–	–	–	–	–	–	–	–	2	–	–	–
Psoas abscess,	4	3	1	1	–	1	1	–	–	1	–	–	–	–	–	–	–	–	–	3	–	1
Diseases of bones and joints: —																						
Rachitis,	5	3	2	2	–	–	1	–	–	1	–	1	–	–	–	1	1	–	1	–	–	2
Periostitis,	1	1	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	1
Ankylosis,	6	5	1	3	–	–	2	–	–	1	–	–	–	–	–	–	–	3	1	–	2	–
Caries, sternum,	2	–	2	1	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	2
Caries, ribs,	1	1	–	–	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–
Alveolar abscess,	3	1	2	–	–	1	1	–	–	–	–	–	–	1	–	–	3	–	–	–	–	–
Caries of teeth,	4	2	2	1	–	–	–	1	–	1	–	–	1	–	–	–	3	–	1	–	–	–
Hyperostosis femur,	2	2	–	–	1	–	–	1	–	–	–	–	–	–	–	2	–	–	–	–	–	–
Caries of tibia,	2	2	–	–	–	–	–	2	–	–	–	–	–	–	–	1	–	–	–	–	1	–
Osteomyelitis,	1	1	–	–	–	–	–	–	–	–	–	–	–	1	–	1	–	–	–	–	–	–
Tubercular ostitis,	1	–	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	1	–	–	–
Diseases of upper extremities: —																						
Abscess of hand,	4	4	–	–	1	–	1	–	–	–	1	1	–	–	–	1	2	–	–	–	1	–
Abcess of finger,	1	1	–	–	–	–	–	–	–	–	–	–	1	–	–	1	–	–	–	–	–	–
Abcess of axilla,	1	1	–	–	–	–	–	–	–	–	–	1	–	–	–	1	–	–	–	–	–	–
Infection wound of finger,	1	1	–	–	–	–	–	–	–	–	–	1	–	–	–	1	–	–	–	–	–	–
Sarcoma, shoulder,	2	2	–	–	–	–	–	–	–	–	1	1	–	–	–	–	–	–	–	2	–	–
Ankylosis, finger joint,	1	–	1	–	–	–	–	–	–	–	–	–	1	–	–	1	–	–	–	–	–	–
Ulceration, thumb,	1	–	1	–	–	–	–	–	–	–	–	–	–	–	1	1	–	–	–	–	–	–
Tuberculosis, shoulder,	1	–	1	–	–	–	1	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–
Abcess, chest,	1	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–	1	–	–	–	–	–
Abcess of arm,	1	1	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–
Felon,	1	1	–	–	–	–	–	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–

TABLE OF DISEASES. *Surgical* — Continued.

DISEASES.	PATIENTS.			1895.			1896.									DISCHARGED.						
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved.	Not Treated.	Died.	Out-patient Department.	Improved.
LOCAL DISEASES — Con.																						
Diseases of lower extremities: —																						
Cancer, leg,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Deformity of hip,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Deformity of leg,	2	2	-	-	-	-	-	-	-	-	-	-	-	1	1	2	-	-	-	-	-	-
Ankylosis, knee,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Synovitis, knee,	13	12	1	1	1	1	1	2	2	1	2	2	-	-	-	3	3	-	-	-	4	3
Tuberculosis, knee,	6	3	3	2	1	-	1	-	1	1	-	-	-	-	-	-	-	1	-	-	-	5
Tuberculosis, ankle,	4	4	-	2	-	-	-	-	-	-	-	1	-	-	1	1	-	2	-	-	-	1
Ulceration, toe,	1	-	1	-	-	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-
Chronic ulcers,	62	38	24	16	6	5	5	4	7	3	1	4	6	3	2	18	9	1	-	-	15	19
Inflamed toe,	3	3	-	-	2	-	-	-	-	-	-	1	-	-	-	2	-	-	-	-	1	-
Abscess of leg,	3	3	-	-	-	-	-	1	1	-	-	-	-	1	-	3	-	-	-	-	-	-
Talipes equinovarns,	1	-	1	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Talipes valgus,	10	8	2	3	1	1	-	-	-	-	-	1	1	2	1	-	-	-	10	-	-	-
Gangrene of foot,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Bunions, inflamed,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Ischia-rectal abscess,	2	2	-	1	-	-	-	-	-	-	-	-	1	-	-	1	-	1	-	-	-	-
Cancer, thigh,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Tuberculosis, hip,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	1
Ulcer of thigh,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
General injuries: —																						
Contusions,	2	2	-	-	-	-	1	-	-	-	-	-	-	-	1	1	-	-	-	-	1	-
Exposure,	2	2	-	-	-	-	2	-	-	-	-	-	-	-	-	-	-	-	-	-	2	-
Inflammation,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Injuries of head and neck: —																						
Contusions, face,	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-
Injury of nose,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Wounds of scalp,	4	2	2	-	1	-	-	1	1	-	-	-	1	-	-	3	-	-	-	-	1	-
Fracture, lower jaw,	4	4	-	1	-	-	-	-	-	-	-	-	1	2	-	1	1	-	-	-	1	1

Injuries to chest: —																						
Injury, ribs,	5	5	–	–	2	1	1	1	–	–	–	–	–	–	–	–	–	–	–	–	4	1
Fracture, ribs,	6	5	1	–	1	–	1	1	2	–	–	–	1	–	–	–	–	–	–	–	4	2
Injuries to back: —																						
Sprain,	6	6	–	–	1	–	–	2	–	1	–	1	–	1	–	1	1	–	–	–	3	1
Old injury, spine,	3	3	–	1	–	–	–	2	–	–	–	–	–	–	–	–	–	1	–	–	–	2
Injuries to lower extremities: —																						
Old fracture, hip,	1	1	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	1	–	–	–
Old injury, hip,	4	4	–	1	–	1	–	–	–	–	–	1	–	1	–	–	–	–	2	–	–	2
Sprain, thigh,	5	3	2	2	–	–	–	1	–	–	–	–	–	2	–	4	–	–	–	–	–	1
Contusions, thigh,	1	–	1	1	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–
Fracture, neck of femur, convalescence,	4	3	1	1	1	–	1	–	–	–	1	–	–	–	–	–	–	–	–	1	1	2
Injury of knee,	1	1	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	1
Sprain of knee,	1	–	1	–	–	–	–	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–
Old fracture, tibia,	2	1	1	–	–	–	–	–	1	–	–	–	1	–	–	–	–	1	–	–	1	–
Fracture of fibula,	1	1	–	–	–	–	–	1	–	–	–	–	–	–	–	–	1	–	–	–	–	–
Fracture of femur,	3	1	2	–	–	–	–	–	–	–	1	1	–	–	1	1	–	1	–	–	–	1
Injury of foot,	6	6	–	1	1	1	–	–	–	–	1	1	–	–	1	3	–	–	–	–	2	1
Sprain of ankle,	17	15	2	3	1	3	4	2	1	1	1	–	–	–	1	–	3	–	–	–	13	1
Fracture of ankle, convalescence,	2	2	–	–	–	–	–	–	1	–	–	1	–	–	–	–	–	–	–	–	2	–
Sprain of ankle, convalescence,	2	2	–	–	–	–	–	–	1	1	–	–	–	–	–	1	–	–	–	–	1	–
Potts fracture,	9	9	–	3	–	–	–	–	–	–	1	1	2	1	1	3	1	–	–	–	4	1
Injury of knee,	5	4	1	–	–	1	1	1	1	–	–	–	–	1	–	–	1	–	–	–	2	2
Inflamed wound, foot,	2	2	–	–	–	–	–	–	–	–	–	–	–	–	2	1	–	–	–	–	1	–
Double amputation thigh, convalescence,	2	2	–	2	–	–	–	–	–	–	–	–	–	–	–	–	–	–	2	–	–	–
Amputation, leg,	2	2	–	1	–	–	–	–	–	–	–	–	–	–	1	1	–	–	–	–	–	1
Fracture of tibia and fibula,	1	1	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–
Fracture of tibia,	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–
Injury to foot, convalescence,	1	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	1
Fracture patella, convalescence,	1	1	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	1	–
Abrasion of heel,	2	2	–	–	–	1	1	–	–	–	–	–	–	–	–	–	–	–	–	–	2	–
Scald of thigh,	1	–	1	–	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–
Abscess of knee,	2	2	–	–	–	–	1	–	–	–	–	–	–	1	–	–	1	1	–	–	–	–
Old fracture, patella,	1	1	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	1	–	–	–
Injuries of upper extremities: —																						
Injury, shoulder,	5	5	–	1	2	1	–	1	–	–	–	–	–	–	–	–	–	–	–	–	5	–
Sterno-clavicular dislocation,	1	–	1	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–
Acromio-clavicular dislocation,	1	1	–	1	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–
Dislocation, shoulder, convalescence,	1	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	–	1	–

Commonwealth of Massachusetts.

TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

As required by the provisions of section 3, chapter 88 of the Public Statutes, the undersigned, trustees of the State Almshouse and State Farm, submit herewith their forty-fourth annual report relative to the almshouse.

The report of the superintendent and resident physician, accompanying, gives a detailed statement of the condition of the institution under his charge for the financial year ending Sept. 30, 1897, together with a presentation of its most pressing needs.

The records herewith presented show that 3,625 persons have been admitted to the different departments of the almshouse during the past year. This makes a total of 111,484 persons admitted during the forty-four years since it was established, and gives a yearly average of 2,534. The weekly average for this year has been 58 greater than that of last year and the number of admissions 21 greater.

Under chapter 92 of the Acts of the Legislature for the year 1897, the sum of $35,200 was appropriated for the payment of salaries, wages and labor; and for the current expenses the sum of $111,500, — making a total of $146,700 for the maintenance of the almshouse for the present calendar year. For a detailed statement of the expenditure of the same we refer to the report of the superintendent, hereto appended, the expenditures having been examined and approved by us month by month.

During the year the new building for insane women, authorized under chapter 56 of the Resolves for the year 1895, received its finishing touches, and it has now been in use several months, affording needed relief to the department for which it was erected.

Under chapter 92 of the Resolves of 1896 an appropriation was made for the consolidation of the boiler plant, including new boilers, building, engines and dynamo, with the necessary changes in piping. The construction thus authorized is now nearly complete, and will probably be in full use early in November. Under the same resolve the erection of a new barn, additional to the one in use, was provided for. Work on this structure is now in progress and it will be ready to be occupied early in the winter.

The same legislative act authorized the expenditure of $20,000 for a home training school for nurses. This needed addition to the equipment of the almshouse has been erected and the interior finishing is now in progress. It is expected that it will be completed and ready for use in the early part of the coming year. Other work authorized by the same resolve has been done.

The repairs in the old asylum for women and the changes in the maternity ward provided for in chapter 63 of the Resolves of 1897 have not yet been undertaken, but are to be pushed as soon as the work now on hand will permit.

The annual inventory, as required under section 7 of chapter 79 of the Public Statutes, has been taken, and an appraisal of the real and personal property connected with the institution and belonging to the Commonwealth has been made by Charles H. Littlefield of Lawrence, whose report is herewith presented.

The trustees invite attention to the statistical tables submitted by the superintendent and resident physician. These give a full and detailed statement of the facts relative to the persons admitted and discharged during the year, the number at present in the different departments, the appropriations and receipts, the average weekly cost, the expenditure and disbursement under special or general appropriation, the products of the farm and garden, the articles manufactured and the persons employed during the year.

As heretofore and at present managed, the farm contributes materially to the support and comfort of the inmates, gives such of them as are able to perform it healthful and remunerative employment, and contributes to the economical management of the institution. The facts as to the product of the farm and garden for the year now under review are stated in the report of the superintendent. Though not exceptionally heavy, the yield has been of average volume and quality, and fully justifies the farm policy of the institution. The report of the superintendent instances certain needed improvements. His recommendations have been considered and approved by the trustees, and the needful appropriations are asked for in order that the same may be carried out.

During the year the faithful and efficient administration of Dr. Herbert B. Howard as superintendent and resident physician came to an end by his resignation of the office in order to accept a call to become the superintendent of the Massachusetts General Hospital. The trustees accepted his resignation with extreme reluctance and sincere regret. For five years he had been at the head of the institution, during which time he had developed a professional and executive ability which had placed him in the front rank of institutional superintendents. Learned in his profession, as a disciplinarian kindly while firm, a thorough man of affairs whether as a builder without extravagance or as a purchasing agent insisting on value received, the trustees could but regard his surrender of his trust as a great loss to the interests committed to their oversight. But they had in the assistant superintendent, Dr. John H. Nichols, a man who had thoroughly learned the institution by long and efficient service therein, for some time past as second in responsibility, a man whose medical and surgical skill had been abundantly demonstrated, and in whose ability as an executive officer great confidence was felt. Pending a decision as to the succession, the institution was confided to his management as acting superintendent for four months. At the end of this time, not only upon his previous record but also upon the warrant of this period of efficient and successful administration, Dr. Nichols was unanimously elected to the office of superintendent and resident physician. This Board fully expects that he will be found both capable and faithful in the discharge of the varied duties of the responsible office which he has accepted at their hands.

Respectfully submitted,

J. WHITE BELCHER.
SARAH D. FISKE.
ANNA F. PRESCOTT.
PAYSON W. LYMAN.
LEONARD HUNTRESS.
WARREN E. RICE.

TEWKSBURY, Oct. 29, 1897.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

I have the honor of presenting to you the forty-fourth annual report of the State Almshouse.

During the year 4,811 people have been cared for; of these, 3,625 have been admitted during the year. The smallest number represented at any one time was 1,117, on the thirtieth day of September; the largest number was 1,510, on the twenty-third day of February. The weekly average has been 1,289, or 58 more than last year. The whole number of inmates and the daily average has been much higher than any previous year.

The cash disbursements for the year were $136,448.39, making a gross weekly per capita cost of $2.04. During the year $1,377.59 has been turned in to the State treasurer for articles sold, etc. The in-door-poor department has collected $468.50 for United States cases boarded here and $32,169.02 for city and town cases, leaving a net outlay for running the institution of $102,433.28.

Although the season has been rather unfavorable for other things, six hundred tons of ensilage have been produced, and the hay crop has been much larger than usual. For particular information concerning produce of farm and garden, statement No. 5 will furnish any desired facts.

HOSPITALS.

There have been treated in the hospitals during the year 3,407 patients, — 2,516 males and 1,091 females. Of these patients, 2,649 were medical cases and 758 surgical. There have been 314 cases of tuberculosis, 5 cases of diphtheria, 19 of typhoid fever, 8 of measles, 4 of mumps, 2 of whooping-cough and 1 of chicken-pox. There have been 202 cases of syphilis, 83 of pneumonia, 5 of cerebro-spinal meningitis and 23 of influenza. For other diseases, see medical tables.

There have been 328 deaths during the year, — 231 males and 97 females; 99 of these were due to phthisis.

There have been 121 births during the year, — 65 males and 56 females. Ninety-four of the children were illegitimate. Forty of the mothers were born in the United States, 34 in Ireland, 10 in England, 26 in the British Provinces and 9 in other countries.

The whole number of hospital cases has very much increased over that of any former year. This increase has been rather a steady growth from year to year, so that the overcrowding that was mentioned in our last annual report has been felt more than ever this year, especially in the men's hospital; and the want of a cottage for consumptives, before suggested, is more apparent than ever.

There have been a number of changes on the medical staff during the year. Shortly after our superintendent, Dr. Herbert B. Howard, went away, Dr. Emily P. Howard, at that time one of our assistant physicians, also left us. Her excellent work in the asylum department and her valuable assistance elsewhere made her departure especially regretted. We were specially fortunate in obtaining the valuable services of Dr. Elizabeth Newcomb, one of our former assistant physicians, who kindly consented to temporarily fill that position. Dr. C. S. Little, assistant physician, who had been with us eighteen months, went away the first of August. This position has been temporarily filled by Dr. F. G. Manson, a former assistant. The promotion of Dr. Ranney left the position of first assistant physician vacant, which has been filled by Dr. Arthur T. Mann, who came here August 1, after completing a surgical service at the Boston City Hospital. Beginning with July 1, we added a woman to our interne service, and appointed Dr. Mary A. Dangel to that position. At present Dr. Fred L. Smalley is senior interne and Arthur K. Drake junior. Dr. Robert H. Purple is our out-patient physician.

Of the two assistant physicians suggested in the last annual report, but one has been added during the year. The increase in the amount of hospital work and the higher standard of work required makes a further increase in our medical staff much desired, and for a like reason we need some further addition to our force of nurses.

ASYLUMS.

The asylums have received during the year 92 patients, the daily average being 483 and the number of cases remaining at the end of the year 469.

Our men's asylum is overcrowded, and one more attendant would make it possible to keep the patients walking or entertained out of doors a great deal more than is possible at present.

We have found the new asylum for women, which was occupied the first of May, a great help toward the better care of the insane. The violent cases have been transferred to this ward and further classification of patients in the old asylum buildings has been established, which we find very much to the benefit and comfort of the milder cases.

TRAINING SCHOOL.

The training school for nurses now completes its second year, and the work in this department is steadily improving. Beginning with November, the men's hospital was placed under this management. It sustained quite a loss by the resignation of Mrs. Clara Stevens Glidden, the superintendent of nurses, to whom credit is very largely due for the success of the training school. Mrs. Glidden has been superintendent of nurses here since 1891. She was succeeded by Miss E. Maude Ellis (who has been superintendent of nurses at the New York City Infirmary, also at St. John's Hospital, Lowell, and is a graduate of the Massachusetts General Hospital Training School), who began her duties here the first of June.

During the year the following nurses have graduated: Maud Rourke, Annie Horne, Alice Dillon, Emma Scullion, Hildegarde Backman, Catherine M. Scott, Annie G. Kelly, Jessie Figgat, Mary Richardson and Mary A. Mitchel.

With sorrow we record the untimely death from appendicitis, on September 26, of Miss Maud Rourke, one of the graduates of our training school.

Improvements made during the Year.

During the year the much-needed chapel has been erected and will soon be ready for use. The nurses' home has also been erected and plastered. A new boiler house has been built, in which three new boilers and a new Corliss engine has been placed. The work on the subway has been carried as far as the woman's hospital, and we hope during the winter to complete it so that the east side of the yard can be heated from the new boiler house.

A corridor has been erected on the west side of the asylum yard, connecting the new asylum with the old, and enabling the patients to pass to the dining-room, in bad weather, under cover. This, at the same time, being open on one side, serves for a summer house, and adds much to the general attractiveness of the yard.

The old building in the south-east corner of the yard has been repaired and fitted up for the accommodation of the boys, who are at present in the smaller building and less desirable location on the women's side of the yard. A large amount of concreting and grading, together with the new lawns, which have made very good growth during the summer, make our quadrangle much more attractive than ever before.

The new barn or cow stable is well under way and we expect will be completed early in the winter, and will enable us to make the much-needed addition to our herd.

Brick walls have been built at the front of the institution, connecting the dormitories with the administration building.

Improvements Suggested.

The need of a cottage for consumptives, which was suggested in our annual report last year, is more urgent than ever.

The cold-storage plant, also suggested last year, we still feel would be economical and of great value to the institution.

The old portion of the men's hospital needs considerable attention, such as construction of proper basements, improvement and extension of the ventilating system and changes in our accommodations for out-patients, the necessity for which has been felt for a long time.

The old brick building, which has not yet been torn down, we wish to move to the eastern wall of the institution and to fit it up for use as a dormitory for the accommodation of our increased winter population. We are already obliged to use the building, in its present crude shape, for this purpose.

The outside painting of the institution needs to be renewed, and one additional engine is necessary to make our boiler plant complete.

At many times there has been a desire expressed in the annual reports that the name of the institution should be changed to something which would better represent its true character, and it seems as if such a name could easily be found.

Our thanks are due to the chaplains for their constant attention and efficient work during the year. I would also thank the outside friends who have kindly remembered us with books and papers for the benefit of the inmates. This literature has been greatly appreciated by our patients, and we would again renew our offer, — to pay the expressage on papers or literature of a non-sectarian character, to be distributed among the inmates.

Taking this occasion to thank you for the confidence and honor which you have so kindly conferred upon me and for your wise counsel and support, I am,

Yours respectfully,

JOHN H. NICHOLS,

Superintendent and Resident Physician.

Anæmia,	7	4	3	1	-	-	-	2	2	-	-	-	-	2	-	-	2	-	-	-	5	-	-
Diabetes, mellitis,	7	5	2	-	-	2	-	2	2	1	-	-	-	-	-	-	-	3	-	-	2	2	-
Diphtheria,	3	2	1	-	1	-	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	2	-
Erysipelas, facial,	13	10	3	2	-	2	2	5	1	1	-	-	-	-	-	13	-	-	-	-	-	-	-
Erysipelas, phlegmonous,	2	2	-	1	-	-	-	-	-	-	-	-	1	-	-	2	-	-	-	-	-	-	-
Erysipelas,	3	2	1	-	-	-	-	1	-	1	-	1	-	-	-	3	-	-	-	-	-	-	-
Influenza,	23	14	9	-	-	-	2	7	12	2	-	-	-	-	-	22	-	-	-	-	-	1	-
Gout,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-
Leukæmia,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Chlorosis,	3	-	3	-	1	1	-	-	1	-	-	-	-	-	-	1	-	-	-	-	2	-	-
Parotiditis,	4	4	-	1	-	2	1	-	-	-	-	-	-	-	-	4	-	-	-	-	-	-	-
Typhoid fever,	15	15	-	4	3	1	-	1	-	-	-	2	-	2	2	12	-	-	-	-	-	-	3
Typhoid fever, convalescing,	4	3	1	-	1	1	-	1	-	-	-	-	-	-	1	4	-	-	-	-	-	-	-
Pertussus,	2	1	1	-	-	-	-	-	1	1	-	-	-	-	-	2	-	-	-	-	-	-	-
Varicella,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-	-	-
Measles,	8	6	2	-	3	1	-	-	2	-	1	1	-	-	-	8	-	-	-	-	-	-	-
Simple fever,	5	4	1	-	-	3	-	-	-	-	-	-	1	1	-	5	-	-	-	-	-	-	-
Malaria, tertian,	46	45	1	13	1	1	-	1	2	2	4	5	5	4	8	-	42	-	-	-	-	-	4
Malaria, quotidian,	20	20	-	9	2	2	1	-	-	-	-	3	3	-	-	-	20	-	-	-	-	-	-
Rheumatism, acute,	62	58	4	9	7	2	4	7	4	3	4	13	2	5	2	12	29	-	-	8	12	-	1
Rheumatism, chronic,	44	33	11	12	3	2	4	3	1	2	2	6	1	3	5	-	5	-	-	9	22	-	8
Rheumatism, gonorrhœal,	9	9	-	2	1	-	2	-	-	1	-	3	-	-	-	-	2	2	-	1	3	-	1
Rheumatism, syphilitic,	16	16	-	3	1	3	3	-	-	3	1	1	1	-	-	-	2	-	-	8	6	-	-
Rheumatic, arthritis,	6	5	1	4	-	-	-	-	1	1	-	-	-	-	-	-	-	2	-	-	-	1	3
Syphilis, primary,	28	21	7	2	3	8	3	3	2	2	-	1	-	3	1	-	7	-	-	15	5	-	1
Syphilis, secondary,	55	39	16	6	8	4	4	7	4	4	6	5	4	-	3	-	27	-	-	11	16	-	1
Syphilis, tertiary,	104	91	13	13	8	26	13	13	5	4	6	4	5	4	3	-	-	-	-	82	18	2	2
Syphilis, hereditary,	15	6	9	3	2	1	1	2	3	1	1	-	1	-	-	-	6	-	-	-	5	4	-
Tuberculosis, general,	16	7	9	4	1	-	4	2	1	1	1	-	-	1	1	-	-	4	-	-	2	9	1
Tuberculosis, acute-miliary,	4	4	-	1	-	-	-	1	-	-	1	1	-	-	-	-	-	2	-	-	-	2	-
Chancroids,	41	20	21	7	6	-	4	2	-	1	3	5	4	2	7	14	6	-	-	15	4	-	2

Phthisis,	294	241	53	72	18	23	16	20	22	25	27	15	17	17	22	-	1	50	-	-	107	99	37
Phthisis, fibroid,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Coryza,	16	16	-	2	1	4	1	5	-	2	-	-	1	-	-	16	-	-	-	-	-	-	-
DISEASES OF NERVOUS SYSTEM.																							
Diseases of brain and its membranes: —																							
Apoplexy,	15	12	3	4	2	2	-	-	1	1	-	1	2	1	1	-	-	1	-	1	-	13	-
Cerebral, unclassified,	2	2	-	2	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1
Cerebro-spinal meningitis,	5	5	-	-	-	1	-	-	3	-	1	-	-	-	-	4	-	-	-	-	-	1	-
Meningitis, acute,	5	4	1	-	-	2	1	-	-	-	1	-	-	-	1	-	3	-	-	-	-	2	-
Meningitis, tubercular,	3	2	1	1	-	-	-	-	-	1	-	-	-	1	-	-	-	-	-	-	-	3	-
Epilepsy,	31	17	14	4	3	3	2	4	2	3	2	1	3	3	1	-	-	25	-	-	-	3	3
Hystero-epilepsy,	2	-	2	-	1	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-	-	-	1
Gumma of brain,	2	2	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	1	-
Jacksonian epilepsy,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-	-
Meningitis, traumatic,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Diseases of spinal cord: —																							
Spinal, unclassified,	5	5	-	3	-	1	-	-	-	-	-	1	-	-	-	-	-	1	-	-	1	-	3
Paraplegia,	16	10	6	11	-	-	1	-	-	1	-	-	1	2	-	-	-	6	-	-	2	-	8
Paraplegia, spastic,	16	13	3	6	3	-	1	2	-	1	1	-	1	-	1	-	-	5	-	-	7	4	-
Locomotor ataxia,	17	16	1	5	-	1	1	1	-	2	1	-	2	1	3	-	-	13	-	-	-	2	2
Myelitis,	2	2	-	-	1	-	-	-	1	-	-	-	-	-	-	-	-	2	-	-	-	-	-
Poliomyelitis,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Multiple sclerosis,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Diseases of nerves: —																							
Hemiplegia,	26	18	8	15	1	-	-	1	1	2	2	-	3	1	-	-	-	8	-	-	4	2	12
Neuritis, alcoholic,	5	3	2	1	1	-	1	-	-	-	1	-	1	-	-	-	-	-	-	-	5	-	-
Neuritis, multiple,	3	3	-	3	-	-	-	-	-	-	-	-	-	-	-	-	-	2	-	-	-	1	-
Neuritis, peripheral,	4	2	2	1	-	-	-	1	-	-	-	-	-	1	1	-	-	-	-	-	2	-	2
Neuritis, unclassified,	5	5	-	-	-	1	-	-	-	2	-	1	-	-	1	-	-	2	-	-	3	-	-
Paralysis,	7	3	4	3	-	-	2	-	1	-	-	-	-	-	1	-	-	1	-	-	1	3	2
Paralysis, infantile,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Paralysis, general of insane,	12	10	2	2	-	-	-	1	-	-	3	2	1	1	2	-	-	8	-	-	-	3	1
Monoplegia,	3	2	1	-	-	-	-	-	1	1	1	-	-	-	-	-	-	2	-	-	1	-	-
Muscular spinal paralysis,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Functional diseases, nervous system: —																							
Chorea,	4	3	1	1	-	-	-	-	-	1	1	1	1	-	-	-	-	1	-	-	2	-	1
Lumbago,	5	5	-	-	-	-	-	-	-	-	-	1	-	2	2	-	4	-	-	-	-	-	1
Neuralgia,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Cephalalgia,	2	-	2	-	-	-	-	-	1	1	-	-	-	-	-	-	2	-	-	-	-	-	-
Sciatica,	14	14	-	2	2	1	1	1	1	1	3	-	1	1	-	-	4	-	-	-	9	-	1
Hysteria,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Hypochondriasis,	11	9	2	2	1	-	2	3	2	-	-	-	-	1	-	-	-	-	11	-	-	-	-

TABLE OF DISEASES. *Medical* — Continued.

DISEASES.	PATIENTS.			1896.			1897.									DISCHARGED.							Still in Hospital.
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved	Not Treated.	Out-patient Department	Improved.	Died.	
DISEASES OF NERVOUS SYSTEM — Con.																							
Functional diseases, etc. — Con.																							
Delirium tremens,	12	12	-	1	1	-	1	3	2	2	-	-	2	-	-	-	10	-	-	-	-	2	-

TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

As required by the provisions of section 3, chapter 299, Acts of 1891, the undersigned, trustees of the State Almshouse and State Farm, submit herewith their forty-fifth annual report relative to the almshouse.

The report of the superintendent and resident physician, accompanying, gives a detailed statement of the condition of the institution under his charge for the financial year ending Sept, 30, 1898, together with a statement of what are regarded as its most urgent needs.

The records herewith presented show that 3,451 persons have been admitted to the different departments of the almshouse during the past year. This makes a total of 114,935 persons admitted during the forty-five years since it was established, and gives a yearly average of 2,554.

The weekly average for this year has been 1,292, or 3 greater than that of last year. The number of admissions has been 174 less than last year. The fact that with fewer admissions there has been a higher weekly average than last year is due to the higher percentage of serious hospital cases and to a larger number of aged inmates than usual. The table of ages shows the presence of 42 more persons above the age of sixty this year than last.

Under chapter 185 of the Acts of the Legislature for the year 1898, the sum of $38,000 was appropriated for the payment of salaries, wages and labor; and for the current expenses the sum of $115,500, making a total of $153,500 for the maintenance of the almshouse for the present calendar year. For a detailed statement of the expenditure of the same we refer to the report of the superintendent, hereto appended.

During the year the constructions authorized under chapter 92 of the Resolves of 1896, viz., the nurses' home, the new boiler plant and the additional barn, which were in progress at the time of our last annual report, have been completed and are now serving their purpose.

The repairs in the old asylum for women, as provided for in chapter 63 of the Resolves of 1897, are in progress, one section being already completed. It is expected that the work will be finished by the end of the year. The changes in the maternity ward, authorized in the aforesaid chapter, will soon be begun. Preparations are being made for undertaking the work authorized by chapter 107 of the Resolves of 1898. Some part of the painting thus provided for has already been done.

The annual inventory, as required under section 7 of chapter 79 of the Public Statutes, has been taken, and an appraisal of the real and personal property connected with the institution and belonging to the Commonwealth has been made by Charles H. Littlefield of Lawrence, whose report is herewith submitted.

The trustees invite attention to the statistical tables submitted by the superintendent and resident physician. These give a full and detailed statement of the facts relative to the persons admitted and discharged during the year, the number at present in the various departments, the appropriations and receipts, the average weekly cost, the expenditures and disbursements under special or general appropriation, the products of the farm and garden, the articles manufactured and the persons employed.

The farm has been exceptionally productive during the past year. A greater amount of fodder, fruit and vegetables and of milk than usual has been produced and a larger amount of pork has been slaughtered.

Beside his review of the improvements completed or in progress at the present time, to which we invite attention, the superintendent suggests others which are needed. His recommendations have been considered and approved by the trustees.

The year under review in the report herewith presented is the first full year during which the almshouse has been under the charge of its present superintendent, Dr. John H. Nichols. The trustees believe that the results of the year's administration afford a sufficient endorsement of their act in advancing Dr. Nichols to the headship of the institution after the resignation of its former superintendent. Under his efficient management, aided by a competent corps of assistants, its good record of former years has been maintained, and we believe there is every reason to expect that it will continue to fulfil well its office in the complex and generous charitable system of the Commonwealth.

Respectfully submitted,

J. WHITE BELCHER.
JACOB H. HECHT.
SARAH D. FISKE.
PAYSON W. LYMAN.
ANNA F. PRESCOTT.
LEONARD HUNTRESS.

TEWKSBURY, Oct. 27, 1898.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

I have the honor of presenting to you the forty-fifth annual report of the State Almshouse.

During the year 4,568 people have been cared for; of these, 3,451 have been admitted during the year. The smallest number present at any one time was 1,108, on the eighth day of October; and the largest number was 1,558, on the twenty-second day of February. The weekly average has been 1,292, or 3 more than last year. The cash disbursements were $146,282.05, making a gross weekly per capita cost of $2.18.

INCOME.

During the year $994.82 was turned into the State treasury for articles sold, etc. The in-door poor department has collected $312 for United States cases boarded here and $23,036.57 for city and town cases, leaving a net outlay for running the institution of $121,938.66.

The amount of goods manufactured has increased, 22,576 articles having been manufactured in the almshouse department and 14,802 in the asylum department, as shown in Statement No. 6.

FARM AND GARDEN.

The productiveness of the farm and garden has been greater than usual, there being an increase in almost everything excepting the ice crop; a marked increase in the amount of fodder produced and also in the crop of turnips, onions, strawberries, cabbage, squash, melons, apples and cucumbers. There has been an increase in the amount of pork slaughtered and in the milk produced, which facts, besides others, are to be found in Statement No. 5. The amount of ensilage has been as usual, 600 tons, and the hay crop has increased again.

On account of tuberculosis we have suffered considerable loss in our herd of cattle, and by the use of the tuberculin test on the entire herd we have found it necessary to kill or to quarantine a large proportion, which fact has diminished the amount of the appraisal of live stock to a considerable extent. We have markedly increased our number of young stock, and therefore expect to soon make up for the other losses in our herd.

Hospitals.

There have been treated in our hospitals during the year 3,211 patients, — 2,230 males and 981 females, — and of these 2,459 were medical cases and 752 surgical. There were 263 cases of tuberculosis, 1 of diphtheria, 9 of typhoid fever, 28 of measles, 3 of mumps, 6 of whooping-cough, 11 of chicken-pox, 132 of syphilis, 47 of pneumonia, 1 of cerebro-spinal meningitis and 28 of influenza. There have been 291 deaths, of which 222 were males and 69 females. Eighty-seven of these were due to phthisis. There were 120 births, — 65 males and 55 females.

Further information regarding the hospitals can be found under hospital statistics.

The two vacancies on our medical staff which existed at the end of last year have been filled, also one addition has been made, of an assistant physician. Dr. Jane R. Baker came to us from a five years' service in the Northampton Lunatic Hospital, Dr. Edmund F. Curry came after a year's service as interne at the Worcester City Hospital, and Dr. Arthur Knowlton Drake was appointed after a year's service as interne in the State Almshouse.

Our interne service has been extended from one year to eighteen months, and the number of internes has been increased to five. These positions are now filled by Dr. Ernest B. Emerson, Dr. Robert H. Purple, Dr. Ellen James Patterson, Dr. Otto H. Pagelson and Dr. Maurice T. Buck.

Asylums.

There have been received in the asylum wards during the year 85 patients, the daily average being 461 and the number remaining at the end of the year 452. These numbers are somewhat less than in the preceding year, due to the fact that no large transfers have been made to our institution, on account of the repairs which have been going on in the old asylum for women, requiring the vacating of two of the wards.

There were transferred from the asylum wards 29 patients to the Hospital for Epileptics at Palmer. The work in this department has improved materially during the year, the good effects of the better classification of the patients which was made last year is quite marked, and the general behavior and discipline of the patients has very much improved as well as the general efficacy of the nurses in charge, although there have been many hard and discouraging conditions to contend with, by reason of the repairs which have been going on in the old asylum building. I wish to call special attention to the improved daily report which we have been using through the year, which can be seen on specimen leaf following the asylum report, also a table which shows the amount of days' work done by the patients. Of the whole insane population, 56 per cent. have been daily employed.

Training School for Nurses.

The training school for nurses now completes its third year, and its special value to the institution is more manifest each year. During this year there has been one graduate, — Miss Christina Germaine.

Beginning with the first of October, the course has been extended to three years, so as to include work in the asylum department as well as in the hospitals. This move, we feel assured, improves the work and general care of the patients in our asylum wards, and will also be to the advantage of the pupil nurses, as it gives them a broader field of experience and usefulness.

Special information regarding the training school will be found in the announcement further on in the report.

IMPROVEMENTS MADE DURING THE YEAR.

During the winter the chapel was finished, there being a seating capacity for 500 inmates, who greatly appreciate the value and comfort which has resulted.

The nurses' home was also finished and occupied, and in every way fulfils our anticipations for comfort, healthfulness and usefulness.

The boiler house has been finished and the electric plant established, which has been in successful operation since November, 1897.

A subway has been built, connecting the buildings on the east side of the institution with the new boiler house situated on the extreme west side. This subway is 760 feet in length, 8 feet in width by 7 feet in height, the walls being of stone with a brick arch overhead. In the centre of our quadrangle the floor of this subway is 16 feet below the surface of the ground. On account of the great extent of this project, all other special work during the winter was abandoned in order to put this through.

A new cow stable has been added to our barn, at a cost of $3,200, 160 feet in length by 42 in width. It accommodates 82 head of cattle. This has been occupied for two months, and proves itself to be specially practical. The special features of the barn are: the ventilation, there being abundant air space with a constant supply of fresh air, and arranged so that either the morning or afternoon sun will reach each tie-up; also the removal of solids and liquids to special receptacles on wheels in the basement at one end of the stable, which can be daily removed out upon the land. There is no woodwork whatever coming in contact with the cows, the floors being made of cement and the tie-ups of iron, so that there is no possibility of absorption of the excretions of the herd. Partitions between the cows are also avoided, in order to facilitate the more perfect cleaning of the barn each day. The cows are watered in wooden buckets, which are numbered and always kept in positions opposite each cow. Water is supplied by a pipe running the entire length of the tie-ups. There is a fire partition between the main portion of the barn and this stable, besides numerous doors for the exit of the cattle in case of fire.

A sidewalk of concrete has been laid from the administration building to both of the railroad stations.

The repairs on the old asylum for women have been begun, and we expect will be finished before January, one section having been already completed. There will be considerable improvement in regard to heating, lighting, ventilating and other comforts of the patients, which will add much to the attractiveness as well as usefulness of the ward.

The outside painting of the institution, which has been begun, improves the general appearance of our farm buildings, and is a need for which they were suffering.

A new summer house has been erected in our quadrangle, for the benefit of the women in our almshouse department.

IMPROVEMENTS SUGGESTED.

The cold storage plant which has been recommended for several years seems to be especially urgent, as a matter of economic management, as it would enable us to store in one convenient place products which are now distributed about in five or six different cellars, inadequate, and some with insufficient protection against frost. It would also result in an increased production of the farm and garden, if there was an assurance that the enormous waste and decay during the early part of the winter could be avoided by this method. It would also enable us to make larger purchases of some of our provisions at lower market rates, and hold them until ready for consumption.

We also need additional accommodations for men in our almshouse department, which was suggested last year, and which has now become a necessity. We were unable to tear down the old building in the yard, as has been recommended by the trustees, because we had no place to accommodate our increased numbers in the winter. An addition to the present men's dormitory would not involve a great expenditure.

The present water supply is inadequate and unsatisfactory in quality, the drinking water being wholly obtained from wells in the yard. The supply pipes are also not large enough for our present needs, and, although we have not been especially embarrassed by drouth during the present year, we feel that something should be done in regard to this matter, as a safeguard for the future.

The work in our laundry has been increasing each year, although the capacity has not changed for twenty years, and, as all the room in the present laundry building is needed for increased ward space to our women's almshouse department, to which the laundry is attached, a separate building placed adjacent to our steam and electric plant would seem advisable.

A number of new concrete walks are needed, and also considerable repairing on the old concreting is necessary during the coming year.

In order to occupy the new hospital for consumptives in season for next winter's use, an appropriation for furnishing, heating and lighting will be necessary.

A great deal of expense might be saved to the institution if a spur track could be run onto our grounds from the Boston & Maine Railroad, which would deliver all of our coal, grain and other freight to a point on our own land where it could be easily cared for. As we have concentrated our boiler plants into one, this project would be more practicable now than ever before. A great many teams are kept constantly busy drawing this freight from the freight yard, and without this work we could either get along with fewer teams or by their use be able to increase the efficiency of our farm work, which has always had to be secondary to the teaming of freight, in order to escape payment of demurrage and to receive the supplies as fast as they are needed. As we use four thousand tons of soft coal during the year, and have no covered shed or proper place to store it, there is a great waste which could be saved by proper storage, which waste is estimated at ten per cent.; and, rather than to build such a protection beside the railroad track, where the coal is landed at present, it would seem advisable to wait and build such a coal bunker adjacent to our boiler plant in case we could build this spur track. There is also much danger from fire, with but little water protection, as the coal is now cared for. For these and other reasons it is desirable that some more land should be acquired by the institution.

To change the name of this institution is still desired, as has been recommended in the annual reports for many years past, and for many reasons I would suggest that "State Infirmary" would much better define the conditions and usefulness of the institution.

To prevent the radiation of heat from our steam pipes a covering is necessary, which is a matter that should not be postponed any longer than can be helped.

We wish to express our special thanks and appreciation to the chaplains for their kind and efficient work during the year, which is but a repetition of the good service which they have rendered for many years to us. We mention with especial regret the failure in health of Rev. E. W. Pride, who had been for so many years associated with the institution in this work, hoping that his recovery will not long be delayed, and that he will again be able to take up his work with us during the coming year. We also regret the illness which caused the temporary abandonment of the services of the Rev. Father Fletcher, an assistant of our chaplain, Rev. Father Campeau, and hope that his service with us will not again be interrupted by a repetition of his former malady.

We wish to thank all who have kindly contributed reading matter for the use of the inmates, and would ask the public in general to remember us with contributions of literature, non-sectarian in character, as we never have as much as could be used to advantage in our insane wards. We are always glad to pay expressage on such contributions.

We would especially mention our appreciation of the beautiful gift presented to the institution by Jerry Collins, now deceased, formerly an inmate, but for a long while employed as a plasterer in our institution. The presentation was made by Dr. H. B. Howard, our former superintendent, in whose charge the matter had been left. This iron vase, being placed in the centre of our quadrangle, by reason of its special beauty and its enormous size, makes an attractiveness and completeness in the decoration of our grounds which it would be impossible to obtain in any other way.

I wish, in closing, to thank you all for your support through the year, which has been so constant and so kind at all times.

Yours respectfully,

JOHN H. NICHOLS,
Superintendent and Resident Physician.

ANNOUNCEMENT OF THE TRAINING SCHOOL FOR NURSES CONNECTED WITH THE MASSACHUSETTS STATE ALMSHOUSE HOSPITAL.

[Miss E. Maude Ellis, Superintendent of Nurses.]

The training school now enters upon its fourth year since it was formally established, although lectures and clinical instruction in a regular form had existed for many years before. Eight pupils in all have received diplomas, one during the last year, — Miss Christina Germaine. The course, heretofore, has covered two years; but beginning with Oct. 1, 1898, three years of training will be required, because of the numerous departments in the institution and the great variety of experience to be gained which could not be thoroughly obtained in a less time. This longer experience will necessarily result in more efficient nurses.

The work of the training school pupils consists of ward work and the care of patients, of which the daily average is about 800, which number is nearly equally divided between hospital and asylum cases; but, as the greater part of the work to be done is in the hospital wards, about twenty-four months of the course are spent in the hospitals and twelve months in the asylum.

The hospital service alternates with the asylum service at frequent intervals throughout the entire course, thus giving the nurses opportunity to recuperate physically after confinement to the sick in the hospital wards, and also changing them from the asylums before they become mentally exhausted by continuous contact with the insane. This measure, we feel, insures a healthful condition among the nurses. The daily change in the asylum cases is small during the year, but in the hospitals over 3,000 cases are treated annually; this includes the care of both men and women, care of sick children, lying-in cases, and a very large experience with acute and nearly all of the varieties of chronic diseases, as well as a considerable number of surgical cases and infectious diseases. In the asylums can be found nearly all the forms and stages of mental disease, the care of which can be learned in a most practical way, as the patients are classified and separated in five different departments. This does not include the care of insane men.

Our nurses' home, which was finished and occupied last May, has single rooms for forty nurses, and is especially attractive and comfortable. It is situated at a distance from the other buildings, and adds much to the healthful and quiet possibilities for the nurses when off duty. It was the first nurses' home to be provided among the State institutions.

Pupils entering the training school after Jan. 1, 1899, will receive twelve dollars per month for the first six months, fifteen dollars for the next six months, seventeen and one-half dollars during the second year and twenty dollars during the third year. Graduate nurses in charge of certain departments receive twenty-five and thirty dollars. We select from among our graduates head nurses for departments, appointments being made for six months' duration, with occasional reappointments.

With our exceptional opportunities, we plan our course of instruction to prepare our pupils to become efficient nurses in medical, surgical, obstetrical and mental cases, and especially fit them to take positions as heads of departments in this and other institutions.

The course of instruction consists of lectures given by the physicians of the institution and the superintendent of nurses, also clinical instruction by physicians and head nurses, recitations conducted by the superintendent of nurses and her assistants, and written and oral examinations from time to time during the school year. There are delivered thirty-four lectures to each class during the year, also occasional lectures by physicians and others outside the institution who are interested in our work, whenever arrangements can be made. The subjects will be found in our list of lectures below. The text-books required are "Text-book of Nursing," by Clara Weeks Shaw, and "A Text-book for Training Schools for Nurses," by Dr. Wise. There is also a reference library provided.

The period of probation continues during the first six months, at the end of which time those pupils who prove to be specially adapted to the work are permitted to join the training school; although after this the right is reserved to terminate the connection of the pupil with the institution at any time, giving two weeks' notice of such intent, unless some special cause should demand a discharge which should be immediate.

Pupils are required to give two weeks' notice of intention to leave. They are also required to observe the general rules, regulations and suggestions of the institution and to observe the general laws of health, and to wear suitable wraps and footwear when crossing the grounds during the six winter months, and are expected to take a certain amount of outdoor exercise each day. Board and laundry work are furnished at the institution.

The ages preferred for admission to the training school are those between twenty-one and thirty. Preference is also given to high school graduates.

Communications and application should be made to Dr. John H. Nichols, superintendent and resident physician.

The form of application blank and suggestions to applicants will be found on an adjoining page.

JOHN H. NICHOLS, M.D.,
Superintendent and Resident Physician.

APPLICATION FOR ADMISSION TO THE TRAINING SCHOOL OF THE STATE ALMSHOUSE, TEWKSBURY, MASS.

[This paper is to be filled out and sent to the superintendent of the State Almshouse. Please read carefully the opposite page.]

1. Candidate's name in full,
2. Condition in life: single, married or widow,
3. Present occupation or employment, Name of employer and address,
4. Are you willing to do night duty a part of the time?
5. Place of birth and age last birthday,
6. Height,
7. Weight,
8. Where educated, Extent of education,
9. Are you strong and healthy, and have you always been so?
10. Are your sight and hearing perfect?
11. Have you any tendency to lung trouble?
12. Name in full, and address, of some near relative,
13. If you have any children, how many? How old? How are they provided for?
14. Where (if any) was your last situation? How long were you in it? What was it?
    Name and address of employer,
15. Names in full, and addresses, of two persons to be referred to.
    State how long each has known you.
    Has known me years.
    Has known me years.
16. Have you been employed in any institution? Which?
17. Have you read and do you clearly understand this paper?

I declare the above statement to be correct, and written by myself.

Date Signed

Address,

STATE ALMSHOUSE TRAINING SCHOOL FOR NURSES.

Persons desiring this course of instruction must apply to the superintendent of the State Almshouse.

The most desirable age for candidates is from twenty-one to thirty years. They must be in good health, and must refer to some responsible person (not a relative) for their moral character.

They are subject to the rules, regulations and suggestions of the institution, and are received for six months on probation, after which, if they prove to be especially adapted to the work, they are permitted to join the training school; but the right is reserved to terminate the connection of the pupil with the institution at any time, giving two weeks' notice, unless some special cause should demand a discharge which should be immediate. Pupils are required to give two weeks' notice of their intent to leave.

Pupils receive for the first six months, twelve dollars per month; the second six months, fifteen dollars; the second year, seventeen and one-half dollars; the third year, twenty dollars.

There are eight positions for head nurses in the institution, which are filled preferably by graduates of this school. Appointments for these positions are made for six months, with occasional reappointments. The salaries are from twenty-five to thirty dollars per month, according to the position.

There are two distinct classes and courses of lectures. The instruction is given by the medical staff, superintendent of nurses and head nurses, in the form of lectures, recitations, teaching at bedside and regular performance of duties.

Those who are accepted in our training school are expected to sign an agreement to remain three years in the school, minus the six months of probation.

Accepted applicants are expected to bring with them: three gingham dresses, plainly made; six large white aprons; a good supply of plain underclothing (each piece plainly marked with the owner's name); a table napkin ring; a watch; wraps suitable for all kinds of weather, and strong, comfortable shoes.

LECTURE LIST.

JUNIOR CLASS.

[SEPTEMBER, 1898, TO JUNE, 1899. TUESDAYS, 7.30 P.M.]

1898.

Sept. 20. Classification and duties of nurses.

27. } Oct. 4. } Medicines, their doses, methods of administration; poison emergencies, use of stomach tube and hypodermic syringe.

11. The nervous system and special senses.

18. Characteristics of insane and general care of patients; classification and care of special classes.

25. Care of recently admitted cases; diet and artificial feeding.

Nov. 1. Mania and melancholia; care of patients.

8. Dementia, epilepsy and convulsions.

15. Other forms of insanity and care of patients.

22. } 29. } Ventilation, care of sick room, use of disinfectants.

Dec. 6. } 13. } 20. } Care of chronic cases; bed sores, prevention, cause and treatment; temperature, pulse and respiration.

Lectures, 14. Classes, 14. Hours of instruction, 28. Examinations, 20 questions, selected from subjects of lectures; time, 2 hours.

Vacation from December 20 to January 2.

1899.

Jan. 2. } 10. } 17. } Emergencies; burns, scalds, fractures, bruises, foreign bodies in eye, ear and throat; practical demonstration of artificial respiration.

25. } Feb. 1. } Venereal diseases; care of tubercular cases.

8. Anatomy.

15. Anatomy.

22. Anatomy.

March 1. Anatomy.

8. Anatomy.

Lectures, 11. Classes, 11. Hours of instruction, 22. Examination, verbal; questions to be selected from subjects of lectures and practical work.

22. Special.

TABLE OF DISEASES. *Medical* — Continued.

DISEASES.	PATIENTS.			1897.			1898.									DISCHARGED.								
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved.	Not Treated.	Out-patient Department.	Improved.	Died.	Still in Hospital.	Operation.
DISEASES OF RESPIRATORY SYSTEM.																								
Diseases of trachea and bronchi-larynx: —																								
Laryngitis, tubercular,	2	1	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	1	-	-
Rhinitis, atrophic,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Bronchitis, acute,	32	7	25	6	2	1	5	4	3	3	-	1	1	2	4	-	6	-	-	10	13	-	3	-
Bronchitis, chronic,	128	119	9	15	14	15	25	12	5	10	9	5	7	8	3	-	-	-	-	99	22	-	7	-
Asthma,	22	15	7	4	3	4	2	-	1	-	-	-	1	3	4	-	6	-	-	6	6	-	4	-
Diseases of lungs: —																								
Pneumonia, lobar,	37	21	16	8	-	3	5	7	10	1	1	1	-	-	1	13	-	-	-	-	-	24	-	-
Pneumonia, post operative,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Pneumonia, conval.,	6	6	-	2	-	-	2	-	-	-	1	-	-	-	1	6	-	-	-	-	-	-	-	-
Pneumonia, broncho,	3	3	-	1	-	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	3	-	-
Diseases of pleura: —																								
Pleurisy, acute,	20	19	1	1	1	3	3	4	2	-	-	3	1	-	2	10	-	-	-	5	5	-	-	-
Pleurisy, chronic,	3	3	-	-	-	-	-	2	1	-	-	-	-	-	-	-	-	1	-	1	1	-	-	-
Pleurisy, with exudation,	2	1	1	-	-	1	-	1	-	-	-	-	-	-	-	-	2	-	-	-	-	-	-	2
Empyæma,	3	3	-	1	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-	1	1	1	-
DISEASES OF DIGESTIVE SYSTEM.																								
Diseases of tonsils, pharynx and œsophagus: —																								
Stomatitis,	5	4	1	1	-	-	2	1	-	-	-	1	-	-	-	3	-	-	-	-	1	1	-	-
Tonsillitis,	33	6	27	1	1	6	7	4	7	1	1	1	1	2	1	33	-	-	-	-	-	-	-	-
Tonsillar abscess,	2	2	-	-	-	-	1	-	-	1	-	-	-	-	-	2	-	-	-	-	-	-	-	1
Hypertrophy, tonsils,	1	-	1	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Pharyngitis, acute,	6	6	-	-	-	2	1	-	2	-	-	-	-	-	1	-	-	-	-	6	-	-	-	-
Naso-pharyngeal catarrh,	3	1	2	-	1	-	-	1	-	-	1	-	-	-	-	1	-	-	-	2	-	-	-	-
Nasal fistula,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Cancer œsophagus,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Diseases of stomach: —																								
Dyspepsia,	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Indigestion,	1	-	1	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-

Ulcer of stomach,	1	1	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–
Gastritis, acute,	3	–	3	1	–	–	–	1	1	–	–	–	–	–	–	–	3	–	–	–	–	–	–	–
Gastritis, chronic,	24	20	4	4	2	3	1	1	2	4	2	2	1	1	1	–	–	2	–	10	8	1	3	–

Gastric, unclassified,	1	–	1	1	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–
Diseases of intestines: —																								
Diarrhœa, acute,	13	5	8	3	1	1	1	–	1	–	1	1	–	1	3	–	9	–	–	–	1	–	3	–
Diarrhœa, chronic,	2	1	1	2	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	2	–	–	–
Dysentery, acute,	7	7	–	1	1	1	–	–	–	1	–	1	–	–	2	–	3	–	–	–	–	3	1	–
Constipation,	8	4	4	–	–	1	–	–	1	1	2	–	1	–	2	–	8	–	–	–	–	–	–	–
Hæmorrhoids,	18	14	4	4	5	1	2	1	–	–	1	1	1	1	1	8	–	1	3	4	2	–	–	10
Diarrhœa, conval.,	1	1	–	–	–	1	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–
Dysentery, chronic,	1	1	–	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–
Enteritis,	8	7	1	–	–	–	–	1	–	–	–	–	–	4	3	–	7	–	–	–	–	1	–	–
Tenia soleum,	1	1	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–
Conval., enteritis,	1	1	–	–	–	–	–	–	–	–	1	–	–	–	–	1	–	–	–	–	–	–	–	–
Tuberculosis omentum,	1	1	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	–	1	–	–
Intestinal colic,	2	2	–	–	–	–	–	–	–	–	1	1	–	–	–	–	2	–	–	–	–	–	–	–
Diseases of liver: —																								
Catarrhal jaundice,	5	3	2	–	–	1	2	1	–	–	1	–	–	–	–	–	5	–	–	–	–	–	–	–
Cirrhosis, atrophic,	4	3	1	–	–	–	–	–	–	–	2	–	–	–	2	–	–	–	–	–	–	–	4	–
Cirrhosis, hyperatrophic,	1	–	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	1	–	–	–
Cancer of liver,	3	–	3	3	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	3	–	–
Hepatic colic,	1	–	1	–	–	–	–	–	1	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–
Icterus neonatorum,	2	2	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	–	–	–	–	2	–	–
Diseases of peritoneum: —																								
Peritonitis, general,	3	–	3	–	–	–	–	–	–	1	–	1	1	–	–	–	–	–	–	–	–	3	–	–
Peritonitis, tubercular,	4	1	3	2	1	–	–	–	–	–	1	–	–	–	–	–	–	1	–	–	1	2	–	–
DISEASES OF URINARY SYSTEM.																								
Diseases of the kidneys: —																								
Nephritis, acute,	3	3	–	–	1	–	–	–	–	–	–	–	2	–	–	–	2	–	–	–	–	–	1	–
Nephritis, chronic,	16	9	7	5	2	1	1	–	1	1	1	1	–	3	–	–	–	–	–	4	1	5	6	–
Nephritis, unclassified,	1	1	–	1	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–
Cancer of kidney,	1	1	–	–	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	–	–	1	–
Acute hyperemia,	1	1	–	–	–	–	–	–	–	–	–	–	1	–	–	–	1	–	–	–	–	–	–	–
Diseases of bladder: —																								
Cystitis, acute,	4	3	1	1	–	1	1	–	1	–	–	–	–	–	–	–	1	–	–	1	2	–	–	–
Cystitis, chronic,	10	7	3	4	–	–	1	–	–	1	1	–	–	–	3	–	–	–	–	–	3	4	3	–
Incontinence,	2	2	–	–	–	–	–	–	1	–	1	–	–	–	–	–	–	–	–	2	–	–	–	–
Atony bladder,	1	–	1	–	–	–	–	–	–	–	–	–	–	1	–	–	–	–	–	1	–	–	–	–

TABLE OF DISEASES. *Medical* — Concluded.

DISEASES.	PATIENTS.			1897.			1898.									DISCHARGED.							Still in Hospital.	Operation.
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved.	Not Treated.	Out-patient Department.	Improved.	Died.		
DISEASES OF WOMEN.																								
Diseases of uterus: —																								
Endometritis,	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-
Fibroid uterus,	2	-	2	-	-	-	1	-	-	-	1	-	-	-	-	-	-	-	2	-	-	-	-	-

Commonwealth of Massachusetts.

TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

As required by the provisions of section 3, chapter 299, Acts of 1891, the undersigned, trustees of the State Almshouse and State Farm, submit herewith their forty-sixth annual report relative to the State Almshouse at Tewksbury.

By the reappointment by the Governor and Council of J. White Belcher, Anna F. Prescott and Cecil F. P. Bancroft, whose terms expired within the year, the personnel of the Board remains the same as last year.

The report of Dr. Nichols, superintendent and resident physician, together with the lists, forms, statements, schedules and statistics which follow, all of which are made a part of this report, give a detailed history of the institution for the financial year ending Sept. 30, 1899, and include a statement of what special provisions are regarded as necessary for its maintenance and efficiency.

The documents herewith presented show that 3,353 persons have been admitted to the almshouse the past year, — 98 less than the preceding year. The whole number of inmates for the year is 4,605, of whom 570 are insane patients. The largest number at any one time is 1,638 and the smallest 1,176. The weekly average is 1,349, being 57 greater than last year.

The fact that with slightly fewer admissions there has been an increase in the weekly average is due chiefly to the increased number of aged patients, and the increase of the number of the insane, whose term of residence for obvious reasons is longer than in the other departments of the almshouse.

There is reason to expect that the demands made upon the institution will sensibly increase, partly on account of the growth of population and partly on account of the change in the settlement laws of the Commonwealth. It is in view of this natural growth, and in the interest of increased efficiency and judicious economy, that several special appropriations are asked for by the superintendent. These requests have been considered by the trustees, and are approved and recommended.

The training school for nurses, established four years ago, has proved itself here, as elsewhere, an indispensable adjunct and auxiliary in the conduct of the hospitals. By means of it the State secures a body of capable, well-trained and experienced nurses, whose professional feeling and standing are utilized by the physicians to the great benefit of the inmates of the institution.

The hospital and asylum departments are becoming year by year more important as compared with the almshouse proper. In the hospitals last year 3,050 patients were treated. The number of the insane (570) is stated above.

The ordinary expenditures for the year, as set forth in the accompanying tables, were provided for by the State (Acts and Resolves, 1899, chapter 57), by appropriations of $157,900, of which $38,900 was for salaries, wages and labor, and $119,000 for current expenses.

Under the special appropriations of the Legislature (Acts and Resolves, 1897, chapter 63; 1898, chapter 107; 1899, chapter 71), the sum of $41,823.37 has been expended during the present year, as shown in the tables herewith, the summary being as follows: —

1. *Work finished.* — The reconstruction of the old asylum for women, the reconstruction of the maternity hospital, the purchase of additional land to secure direct access to the railroad, the extension and improvement of the heating plant, as authorized by the Legislature, have been completed.

2. *Work in process.* — The painting of the buildings is nearly completed. The improvements and repairs on the old portion of the men's hospital approach completion. The extension of the men's dormitory is well under way. The hospital for consumptives is so far advanced that but for unexpected delays it will be completed, furnished and occupied in the early spring. This last building is a most important gain to the resources of the institution.

The annual inventory, as required under section 7 of chapter 79 of the Public Statutes, has been taken, and an appraisal of the real and personal property connected with the institution and belonging to the Commonwealth has been made by Charles H. Littlefield of Lawrence, whose report is herewith submitted.

The superintendent has carried forward much of the work on the farm and for repairs and the various incidental and special construction by means of the labor of the patients, to their great advantage and to the relief of the State treasury. Many of the insane are able-bodied men, and their health and sanity have been promoted by their employment in moderate tasks suited to their ability. The difficulties of discipline have been reduced. Inmates when discharged are much less likely to become again a charge upon the State, if they have acquired a habit of industry.

The trustees take satisfaction in calling attention to the large increase and many improvements within recent years in the buildings and grounds, the lands and the various equipment of the almshouse; to the strict economy which keeps the weekly cost per capita at $2.36, — a sum small in itself, and also in comparison with the cost elsewhere; to the improvement in the organization and administration of the almshouse and hospitals along the lines of the best modern methods; and to the valuable service of the superintendent and resident physician, Dr. John H. Nichols, whose work as an administrative officer is prompt, thorough and enterprising, and whose service to the Commonwealth as a medical director is equally worthy of commendation.

The trustees desire also to make official mention of the ability and fidelity of the hospital staff and the other officers and employees, whose constant good-will and co-operation have aided the responsible head of the institution in its management and development.

Respectfully submitted,

J. WHITE BELCHER.

TEWKSBURY, Oct. 31, 1899.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Almshouse and State Farm.

I have the honor of presenting to you the forty-sixth annual report of the State Almshouse.

During the year 4,605 people have been cared for; of these, 3,353 have been admitted during the year. The smallest number present at any one time was 1,176, on the thirteenth day of September; and the largest number present was 1,638, on the fourth day of January. The weekly average has been 1,349, or 57 more than last year. The cash disbursements were $165,772, making a gross weekly per capita cost of $2.36.

INCOME.

During the year $1,378.70 was turned into the State treasury for articles sold, etc. The State adult poor department has collected $260 for United States cases boarded here and $28,299 for city and town cases, leaving a net outlay for running the institution of $135,834.30.

MANUFACTURES.

In the almshouse department 10,963 articles have been manufactured during the year, and in the asylum department 26,894 articles, as shown in Statement No. 6.

FARM AND GARDEN.

The farm and garden have been fairly productive during the year, although a long-continued drought, such as we have endured the last summer, always has a bad effect on the productiveness of this institution, on account of the dry and sandy condition of the soil.

Statement No. 5 will furnish special facts relative to products of the farm.

HOSPITALS.

There have been treated in our hospitals during the year 3,050 patients, — 2,088 males and 962 females; and of these, 2,399 were medical cases and 651 surgical. There were 297 cases of phthisis, 10 of diphtheria, 8 of typhoid fever, 44 of measles, 16 of varicella, 133 of syphilis, 64 of pneumonia, 1 of variola and 33 of influenza.

There have been 344 deaths, of which 250 were males and 94 females. Ninety-three of these were due to phthisis. There were 91 births, — 53 males and 38 females. Concerning the deaths, there were 43 under one year of age and 118 over sixty. The number of deaths has increased considerably this last year, and I have called attention to the large number of old people. The change in the settlement law of 1898 has resulted in defeating the settlement of all people gaining such settlement prior to 1861, and as charges they become transferred from the town to the State. As a result, a large number of very old people were sent to us during the winter, and such changes occurring to such old people always tend to increase the mortality.

The general efficacy of the hospital work has been advanced during the year, a more comprehensive system of histories having been adopted, and our laboratory has aided in practical and rapid diagnosis. There has also been added to our surgical equipment an X-ray apparatus and a more efficient sterilizer.

ASYLUMS.

In the asylum wards there have been admitted during the year 118 patients. The daily average has been 460 and the number remaining at the end of the year 494. Of this increase in admissions to our asylum only 17 have come from other institutions. The improved condition in this department has continued and has advanced a great deal during the year. The comfort of the patients has been increased to a great extent, so that better discipline is easily maintained; and we have accomplished more work with our insane patients than ever before, especially in the women's wards. The employment of our insane inmates is a feature toward which we especially aim; it is a matter which greatly aids in the economy of the institution, and is also very important in effecting the desired discipline.

Entertainments, walks outside the institution, picnics and drives have been more frequent this year than before.

Medical Staff.

The following changes have occurred on our medical staff during the year: —

Dr. Arthur T. Mann, first assistant physician, resigned in January to enter private practice in Minneapolis, and is now instructor of surgery in the medical department of the University of Minnesota. He was succeeded by Dr. Edmund F. Curry, who also resigned to enter private practice the last of September. Dr. Joseph B. Howland, formerly of the Massachusetts General Hospital, has been appointed assistant physician to fill this vacancy. Dr. Ernest B. Emerson was appointed in February to fill the vacancy made by the promotion of Dr. Curry.

The present internes are Dr. George A. Pierce, Dr. Charles W. Pease, Dr. Burt F. Jenness, Dr. Eloise Meek and Dr. Arthur J. Dresser.

Training School for Nurses.

The Training School for Nurses now completes its fourth year, and a general improvement in the department has been manifest. During the year sixty-eight lectures have been given. The following nurses have received diplomas during the year: Catherine J. Meikle, Jessie Willina Meikle, Elizabeth McCausland, Florence A. Cook, Helen West, Flora MacPherson and Jessie A. Baker, making our list of graduates now number twenty-two.

Improvements made during the Year.

Two branch subways, one hundred and fifty and two hundred and fifty feet respectively, have been built, completing the circuit of heating from our main boiler house, so that now all of our buildings are heated from one source. All of our main lines of subway pipe have been covered with magnesia covering, so that the radiation of heat is greatly diminished.

The old asylum for women has been reconstructed, and also considerable work has been done in refurnishing these wards with furniture of our own design and manufacture, especially adapted to the particular requirements of insane wards.

The outside painting of the buildings has been nearly completed, giving them a more uniform and attractive appearance than before.

The reconstruction of the maternity hospital has also been completed, putting this hospital on a very high plane from a sanitary stand-point, and also in matters of comfort and convenience for nurses and patients.

A new foundation and other improvements to the old portion of the men's hospital is under way, and we expect will be completed by mid-winter.

The foundation for the extension to the men's dormitory has been put in and the brickwork begun.

The hospital for consumptives has been erected, and we hope will be ready for occupancy some time during the winter.

Improvements Suggested.

I would again recommend that a change of name of the institution be considered, to more properly express its conditions and workings.

I would suggest that a new building for insane men be erected, to accommodate one hundred, divided into two or more wards, to relieve overcrowding and improve the possibility of classification and separation, thereby improving the general health, safety and comfort of our insane men, and raising the standard of our men's department to that of the women's. Moreover, sixty or more additional insane men would give us quite a number of workers for our farm, — an increase quite necessary for economical and efficient management, as we have to depend entirely upon our insane men for workers throughout our farming and gardening season. The cost of caring for the insane is exceptionally low at this institution, therefore it would not be increasing the financial burden of the State by adding to the number here.

For furnishing and heating our men's dormitory an appropriation will be necessary. As this work is not completed, and there has been such a rise in the prices of building materials, an addition to the original appropriation may be necessary. A new mortuary and a cold-storage plant, which have been suggested before, are additions much needed.

Extension and repairing of our concrete walks, also a better system of water supply, were mentioned last year.

Because of the overcrowding of the young stock in our barn, and in order to place them under more sanitary conditions, we would ask for an extension on the north side of our barn.

A building for mechanics, adjacent to our boiler house, is needed, our present conditions being inadequate, remote from our power centre and also needed for other purposes. For constructing a spur track to our boiler house an appropriation will be necessary.

An appropriation for the purchase of land is also requested.

To the many friends who have kindly remembered us with contributions of reading matter, Christmas gifts, etc., we would express our grateful acknowledgment, and announce our readiness to pay expressage on all such contributions of unsectarian character.

We also wish to thank those who have kindly favored us with entertainments during the year, and to assure them that such favors are greatly appreciated by and helpful to our inmates, especially to our insane patients.

To our chaplains, who have so faithfully performed their duties in the wards and in chapel services, we would once more express our appreciation and gratitude.

I wish to thank the Board of Trustees for their continued confidence in my administration, and for their kind assistance and support in all the institution affairs.

Yours respectfully,

JOHN H. NICHOLS,
Superintendent and Resident Physician.

DISEASES OF DIGESTIVE SYSTEM — Con.																							
Diseases of the intestines — Con.																							
Hæmorrhoids,	11	10	1	2	-	1	3	1	2	1	-	1	-	-	-	3	8	-	-	-	-	-	3
Enteritis,	20	12	8	6	1	1	1	1	1	1	-	2	-	5	1	7	-	-	-	-	-	13	-
Tinia soleum,	1	-	1	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	-
Intestinal colic,	2	2	-	1	-	1	-	-	-	-	-	-	-	-	-	-	2	-	-	-	-	-	-
Chronic dysentery,	2	1	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	2	-
Ilio colitis,	2	-	2	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-	-	-	-	2	-
Cholera infantum,	2	1	1	-	-	-	-	-	-	-	2	-	-	-	-	-	-	-	-	-	-	2	-
Intestinal tuberculosis,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-
Diseases of liver: —																							
Cancer,	2	2	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	1	-	-	-	1	-
Cancer of gall bladder,	2	-	2	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	1	-
Cirrhosis, atropic,	8	6	2	6	-	-	-	-	-	-	1	-	-	-	1	-	-	5	-	-	-	3	-
Cirrhosis, hypertropic,	4	2	2	-	3	-	-	-	-	-	-	-	-	-	1	-	-	4	-	-	-	-	-
Catarrhal jaundice,	4	-	4	1	-	-	1	-	-	1	-	-	1	-	-	-	4	-	-	-	-	-	-
Diseases of peritoneum: —																							
Peritonitis, tubercular,	3	3	-	1	-	-	2	-	-	-	-	-	-	-	-	-	-	1	-	-	-	2	-
DISEASES OF URINARY SYSTEM.																							
Diseases of kidneys: —																							
Malignancy of supra-renal capsule,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Hyperæmia of kidney,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-
Nephritis, acute,	3	2	1	-	-	-	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	3	-
Nephritis, chronic,	18	15	3	2	1	2	-	1	2	2	2	2	1	-	3	-	16	-	-	-	-	2	-
Nephritis,	2	2	-	1	-	-	-	-	-	-	1	-	-	-	-	-	1	-	-	-	-	1	-
Nephritis, diffuse,	4	4	-	3	1	-	-	-	-	-	-	-	-	-	-	-	4	-	-	-	-	-	-

Diseases of bladder: —																							
Cystitis, acute,	2	2	-	-	-	1	-	1	-	-	-	-	-	-	-	-	2	-	-	-	-	-	-
Cystitis, chronic,	7	7	-	1	-	-	-	-	1	-	1	-	2	-	2	-	-	-	-	-	7	-	-
Incontinence of urine,	2	2	-	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	2	-	-	-
Enlarged prostate,	4	4	-	-	-	-	-	-	-	-	2	-	2	-	-	-	-	4	-	-	-	-	-
Cancer of bladder,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Tuberculosis of bladder,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Prostatitis,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-
DISEASES OF WOMEN.																							
Diseases of uterus: —																							
Fibroid of uterus,	2	-	2	-	-	-	-	-	-	2	-	-	-	-	-	-	-	2	-	-	-	-	-
Retroversion of uterus,	6	-	6	1	1	1	2	-	-	-	-	-	-	1	-	-	6	-	-	-	-	-	6
Diseases of pregnancy: —																							
Pregnancy,	169	-	169	15	13	15	21	8	8	9	13	23	11	9	14	169	-	-	-	-	-	-	-
Abortions,	3	-	3	1	-	-	-	-	1	-	-	-	-	1	-	3	-	-	-	-	-	-	-
Parturition,	93	-	93	8	8	11	9	3	7	8	7	9	9	9	5	93	-	-	-	-	-	-	-
Vomiting of pregnancy,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-	-	-
Parturition, conval.,	18	-	18	3	1	-	2	1	-	1	1	2	3	2	2	18	-	-	-	-	-	-	-
Puerperal septicemia,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Laceration of perineum,	1	-	1	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
DISEASES OF CELLULAR SYSTEM.																							
Diseases of skin: —																							
Pemphigus, neanatorum,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-
Eczema, acute,	8	6	2	-	1	1	-	-	-	2	1	-	1	-	2	-	8	-	-	-	-	-	-
Eczema, chronic,	14	12	2	1	1	-	2	1	1	2	-	3	1	1	1	-	-	4	-	-	10	-	-
Scabies,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Erythema multiforme,	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Psoriasis,	3	3	-	1	-	1	-	-	-	1	-	-	-	-	-	-	3	-	-	-	-	-	-
Pediculi corporis,	3	3	-	1	-	-	-	-	-	-	-	-	1	-	1	-	3	-	-	-	-	-	-
Erythema, simple,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-	-	-	-	-
Puerpera, simple,	1	-	1	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Ferunculosis,	4	4	-	-	-	-	-	-	2	-	-	-	1	1	-	-	4	-	-	-	-	-	-
Pemphigus, acute,	3	3	-	-	-	-	-	1	-	-	1	-	1	-	-	1	-	-	-	-	-	2	-
Impetigo, contageosum,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Urticaria,	2	2	-	-	-	-	-	-	-	-	1	-	1	-	-	2	-	-	-	-	-	-	-
Herpes,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Seborrhœa,	2	-	2	-	-	1	-	-	-	1	-	-	-	-	-	-	2	-	-	-	-	-	-
Herpes zoster,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Sycocis,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-

REVISED TABLES

FOR

UNIFORM STATISTICS

IN THE

MASSACHUSETTS HOSPITALS AND ASYLUMS FOR THE INSANE.

APPROVED BY THE STATE BOARD OF LUNACY AND CHARITY,
MARCH 10, 1891

1. — *General Statistics of the Year.*

	INSANE.			HABITUAL DRUNKARDS.			VOLUNTARY PATIENTS.			AGGREGATES.		
	Males.	Females.	Totals.	Males.	Females.	Totals.	Males.	Females.	Totals.	Males.	Females.	Totals.
Patients in hospital Oct. 1, 1898,	122	370	492	–	–	–	–	–	–	122	370	492
Admitted within year,	58	60	118	–	–	–	–	–	–	58	60	118
Whole number of cases within year,	180	430	610	–	–	–	–	–	–	180	430	610
Discharged within the year,	40	37	77	–	–	–	–	–	–	40	37	77
Viz.: as recovered,	6	1	7	–	–	–	–	–	–	6	1	7
much improved,	–	–	–	–	–	–	–	–	–	–	–	–
improved,	6	4	10	–	–	–	–	–	–	6	4	10
not improved,	12	10	22	–	–	–	–	–	–	12	10	22
not insane,	–	–	–	–	–	–	–	–	–	–	–	–
Deaths,	16	22	38	–	–	–	–	–	–	16	22	38
Patients remaining Sept. 30, 1899,	122	372	494	–	–	–	–	–	–	122	372	494
Viz.: supported as State patients,	94	239	333	–	–	–	–	–	–	94	239	333
town patients,	28	134	162	–	–	–	–	–	–	28	134	162
private patients,	–	–	–	–	–	–	–	–	–	–	–	–
Number of different persons within year,	180	430	610	–	–	–	–	–	–	180	430	610
Persons admitted,	58	60	118	–	–	–	–	–	–	58	60	118
Persons recovered,	6	1	7	–	–	–	–	–	–	6	1	7
Daily average number of patients,	110.005	350.341	460.346	–	–	–	–	–	–	110.005	350.341	460.346
Viz.: State patients,	78.308	216.320	294.628	–	–	–	–	–	–	78.308	216.320	294.628
town patients,	78.244	28.420	106.664	–	–	–	–	–	–	78.244	28.420	106.664

2. — *Monthly Admissions, Discharges and Averages.*

MONTHS.	ADMISSIONS.			DISCHARGES.			DEATHS.			DAILY AVERAGES.		
	Males.	Females.	Totals.	Males.	Females.	Totals.	Males.	Females.	Totals.	Males.	Females.	Totals.
1898.												
October,	–	–	–	–	–	–	1	2	3	102.455	348.225	450.680
November,	–	–	–	–	–	–	–	–	–	102.000	347.000	449.000
December,	1	2	3	1	2	3	–	3	3	102.000	347.645	449.645
1899.												
January,	–	–	–	–	1	1	2	3	5	100.933	342.000	442.933

Commonwealth of Massachusetts.

TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

In accordance with the requirements of the Public Statutes, the trustees of the State Hospital and the State Farm submit herewith their forty-seventh annual report relative to the State Hospital for the year ending Sept. 30, 1900.

The history of the institution the past year is one of gratifying progress. By act of the Legislature (Acts and Resolves, 1900, chapter 333) the name has been changed from the State Almshouse at Tewksbury to the State Hospital, thereby designating more nearly its true character, although no one name can accurately describe all the departments included in the establishment. The word hospital expresses happily the relation of the State to the three main classes for whom provision is expressly made; viz., the insane, the sick and the destitute. From the time of Fabiola, the Roman matron to whom the historian Leckey ascribes the distinction of founding, in the fourth century, the first charitable hospital, the term has implied alms, shelter, maintenance, medical and surgical aid, sympathy, education, and moral and religious influences. The great ideas of relief from immediate suffering, of asylum and protection for the helpless, of cure and comfort for the diseased and disabled, of reform and a new opportunity for the submerged and disheartened, — in short, all that is suggested by the term hospital is included in the work at the State Hospital, except the one idea of pension as a recognition or reward for past service.

Within the year there have been no changes in the Board of Trustees. The vacancy created by the expiration of the term of office of Mrs. Sarah D. Fiske was filled by the Governor and Council by her reappointment. There has been almost no change in the working force of the hospital. The trustees esteem it of great advantage to the State that a certain dignity and stability is thus secured to the administration, a unity of aim and purpose and a steady prosecution of certain lines of management. These have already made the hospital a valuable source of information to other institutions within and without the Commonwealth, often furnishing also able and experienced officers, transferred and promoted from us.

The opening of the isolated hospital for consumptives in the pine grove east of the group of main buildings is an event which deserves special mention in any summary of the work of the year. This is a forward movement in the history of this Hospital. On scientific as well as humanitarian grounds it is full of promise. In locating this special hospital a careful study was made of soil, sun and surroundings, of materials and construction, and the recognized principles of sanitation were adopted. Remedial and preventive devices of approved value have been incorporated. With beds for a hundred patients, there will be room for wide and convincing inductive study of a disease very prevalent and fatal in this Commonwealth. By removing consumptive patients from the general hospital the risk of contagion among the rest will be much reduced, and the consumptives can be treated in a much more satisfactory way under many most favorable conditions.

The past year, as heretofore, the Hospital has been occasionally visited by the local officers of cities and towns in the Commonwealth, who have desired to inquire into the best practice of hospitals and almshouses, with a view to the improvement of their own institutions.

The amount of work done at the State Hospital is indicated by the weekly average of 1,250 inmates, the treatment of 2,744 patients in the hospitals, and ordinary expenditures for maintenance of $162,637.65.

Under the special appropriations made by the Legislature (Acts and Resolves, 1898, — Resolves, chapter 107, June 9; 1899, — Resolves, chapter 71, May 2) the sum of $52,409.33 has been expended the present year, as shown by the tables which accompany this report, the summary being as follows: —

1. *Work completed.* — The hospital for consumptives; the

men's dormitory; the improvements in the men's hospital; the painting of the buildings.

2. *Work in Process.* — Furnishing, heating and lighting the hospital for consumptives; the new laundry; covering steam pipes; purchase of land.

The trustees beg to call attention to the report of the superintendent and to the various statistics, exhibits and recommendations submitted herewith, which show in detail, as prescribed by law, the income and expense accounts of the State Hospital, together with much other material of importance and interest. The report of the appraiser, Mr. Charles H. Littlefield of Lawrence, showing real and personal estate to the amount of $966,500.35, is also made a part of this report.

In order to carry forward with economy and efficiency the work of the State Hospital, there is urgent need of appropriations for various purposes mentioned below and also set forth by the superintendent in his report, all of which have been carefully considered and are hereby unanimously endorsed and recommended by the trustees. All the appropriations asked for are to meet existing conditions and emergencies.

1. The provision of an adequate water supply is vital, as the experiences of the last two seasons show. 2. A spur track is needed to reduce the expense of bringing coal and other supplies to the very doors of the institution and to cut off the waste incident to a double handling of coal. Land for this purpose was acquired by the Commonwealth in 1898, and the necessary concessions have been secured from the town and county authorities; the Railroad Commissioners have expressed their informal approval, and the Boston & Maine Railroad has agreed to co-operate in securing to the Hospital this improvement. 3. The addition of another wing to the dairy barn, the refitting of the old laundry as a dormitory, the equipment of the building for mechanics, additional equipment for the new laundry, the purchase of a new dynamo and additional concreting are in the nature of necessary repairs, or extensions of present facilities required by the growth of the hospital and the erection of its new buildings. 4. The furnishing of the new ward for men is also an unavoidable expense. 5. The purchase of land.

The advance made in the organization and administration of the State Hospital, the improvements in buildings, grounds and equipment, and the far-reaching plans for further progress in these several particulars, are due largely to the enterprising, sagacious and unwearying efforts of the superintendent, Dr. John H. Nichols, seconded by the Hospital staff and the other officers and employees, whose various services the trustees desire to recognize with distinct approval.

Respectfully submitted,

J. WHITE BELCHER.
SARAH D. FISKE.
JACOB H. HECHT.
ANNA F. PRESCOTT.
PAYSON W. LYMAN.
LEONARD HUNTRESS.
CECIL F. P. BANCROFT.

TEWKSBURY, Oct. 31, 1900.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Hospital and State Farm.

I have the honor of presenting to you the forty-seventh annual report of the State Hospital.

This is the first report to be presented under the title State Hospital, which is in accordance with chapter 333, Acts of 1900, viz.: —

> SECTION 1. The name of the State Almshouse at Tewksbury is hereby changed to State Hospital.
>
> SECTION 2. This act shall take effect upon its passage.
>
> [*Approved May 23, 1900.*

During the year 4,085 people have been cared for; of these, 2,883 have been admitted during the year. The smallest number present at any one time was 1,090 on the twenty-ninth day of June, and the largest number present at any one time was 1,436 on the fifth day of March. The weekly average has been 1,250, or 99 less than last year. The cash disbursements were $162,637.65, making a gross weekly per capita cost of $2.50.

INCOME.

During the year $1,619.43 was turned into the State treasury for articles sold, etc. The State Board of Charity, through the State adult poor department, has collected $29,000 from cities, towns and individuals for cases boarded here. Thus the net outlay for running the institution is $132,018.22.

MANUFACTURES.

In the house department 24,458 articles have been manufactured during the year and in the asylum 22,648, as shown in Statement No. 6.

FARM AND GARDEN.

The products of the farm and garden have not been so great as was expected, owing to the severe drought during the summer; however, more land was cultivated than during the previous year, and the amount produced is somewhat more than last year.

Statement No. 5 will furnish special facts relative to the products of farm and garden.

Hospitals.

There have been treated in our hospitals during the year 2,744 patients, — 1,922 males and 822 females. Of these, 2,094 were medical cases and 650 surgical. Among the diseases treated were 298 cases of phthisis, 3 of diphtheria, 8 of typhoid fever, 45 of malaria, 7 of whooping-cough, 7 of scarlet-fever, 112 of syphilis, 1 case of varicella and 12 of influenza.

There were 320 deaths, of which 246 were males and 74 females. Of these, 114 were due to phthisis. Thirty-one deaths were of patients under one year of age, 4 were between one and five years and 83 were over sixty years of age.

There were 94 births, — 46 males and 48 females.

The surgical table shows 166 operations performed, of which number 2 died.

In our out-patient department 997 cases have been treated, — 728 medical and 269 surgical. Further information regarding diseases and medical work may be obtained from tables under hospital statistics.

This is the first year that a table of surgical operations has been presented, also a table of the out-patient department appears for the first time. Complete records of each case have been kept up through the year in this department. The hospital accommodations have been inadequate for a number of years, but eighty additional beds will be available during the coming year, because of the removal of our patients from the west ward to the Hospital for Tuberculosis.

Department for the Insane.

There have been admitted within the year 103 patients. The daily average has been 486. The number remaining Sept. 30, 1900, was 484.

Of these admissions, 15 cases were of acute melancholia, 8 acute mania, 3 confusional insanity, and the remainder were chronic cases, 24 of which were senile dementia.

There were discharged during the year 47 patients, and of these, 17 were discharged as recovered, 1 much improved, 4 improved and 25 not improved.

Ninety-seven of the admissions were from the hospital wards and 6 transferred from other hospitals. There were 65 deaths, — 30 males and 35 females. The infirmary records of our insane department show that there were 195 cases treated; of these, 26 were surgical and 169 medical.

Of the 65 deaths, 35 were over sixty years of age. The cases of physical disease are not included in the regular hospital statistics, but will be found in the asylum report as an additional table. Attention is invited to the statistics of the insane department further on in the report.

Medical Staff.

During the year but one change has occurred on our medical staff.

Dr. Jane R. Baker resigned, to accept a position as superintendent of the Chester County Home at Embreeville, Pa. Since that time the work in that department has been conducted by Dr. Emerson, the former out-patient physician, who was succeeded by Dr. George A. Peirce, a former interne.

During the year certificates of satisfactory service have been presented to the following internes: Dr. George A. Peirce, Dr. Charles W. Pease, Dr. Burt F. Jenness and Dr. Eloise Meek.

Training School.

The training school for nurses completes its fifth year. Sixty-four lectures have been delivered. The following nurses have received diplomas: Amy J. Baker, Linda Nase, Helena Kelley, Dora Vincent, Annie Calder, Mary J. Young, Kate A. Gilson, Annie J. Burtt, Caroline E. Hutt, Annie Grant, Annie McAusland, Florence A. LaFleur and A. Estelle DeCatur.

With deep sorrow we mention the death (on June 14) of Mary E. Hyde, who would have received her diploma this fall. She was one of the most faithful of our nurses and gave unusual promise of success in her chosen work.

This department becomes a more encouraging feature of the institution each year. The effect of the three-years course is beginning to show itself by reason of a more systematic rotation and a longer period of service in each department, benefiting both hospital and nurses.

IMPROVEMENTS MADE DURING THE YEAR.

The Hospital for Tuberculosis has been finished and was ready to receive patients September 30. It is located on a sandy knoll among a grove of pines about a quarter of a mile from and to the east of our group of buildings. A sandy soil, protection from the winds, a broad open area toward the south and a liberal amount of shade in summer are among the special advantages gained by this location. The building is constructed with accommodations for 100 men, classified in four different wards.

Facilities for open-air treatment are extensive; the wards are so arranged and lighted that an abundance of sunlight may be obtained at all times of the day. Large sun rooms are connected with each ward. The down draft system of ventilation is used and indirect steam heat for heating. The separation of the incipient and advanced cases of tuberculosis and all of the important sanitary conditions and matters of hospital comfort and convenience have been specially considered in the construction of this building.

The hospital is two stories in height, built of brick, is of substantial construction, comfortable in suggestion and of attractive appearance.

The ventilating system of our men's hospital has been improved by connection through a subway with the chimney of the old boiler house.

A basement has been made by excavation and new foundation walls under the north and south wards, two new bath-rooms have been built, and a diet kitchen and serving room on the north side of the sun room.

A new dispensary and out-patient department has been established at the north end of the north ward and new rooms for men nurses at the end of the south ward.

A new dormitory for men has been built, including smoke room, sanitary section, fire-proof staircase and officers' room. Also a bath-room and additional rooms for the accommodation of officers have been completed on the upper floors of the administration building. A room was also finished in the basement of the dormitory for men, and fitted up for the use of the outside officers.

A new laundry building has been erected as far as the second story, and the external part of the structure will be completed before winter.

A lean-to was added to the north side of the greenhouse, making additional room for plants, especially those requiring a lower temperature.

Many improvements have been made on the grounds, inside and out of the institution, the most conspicuous being the removal of the old bakery from the centre of the yard.

A furnace has been built, attached to the large chimney of the old boiler house, which satisfactorily destroys by burning the refuse from the hospitals and waste matters from other parts of the institution.

The grading and decorating of the grounds about the nurses' hall has been completed, making the approach much easier and that section more attractive.

Outside of the institution, the hen houses have been removed from a place near the asylum for women to a point near the piggery, and a considerable improvement in the appearance of that portion of the grounds can also be noticed.

More of the division and roadside walls have been taken away and the stone used in the foundation of the new buildings, giving the farm a better appearance. The woodland between East and Chandler streets has been cleared of undergrowth and some trees, converting a lonesome and unattractive spot into a pleasant grove.

A drain has been laid from the basement of the men's asylum and the kitchen building, and a new road from the front of the institution to the Hospital for Tuberculosis has been laid out and nearly completed.

IMPROVEMENTS SUGGESTED.

A spur track from the southern division of the Boston & Maine Railroad, constructed entirely upon land now owned by the State, to a point near our boiler house, would be a great matter of economy to the institution, delivering all coal and other car-load materials or supplies directly on the grounds, and thus saving nearly half a mile of teaming for every ton that is drawn to the institution during the year. Land adjoining the railroad was purchased for that purpose after a resolution by the Legislature of 1898.

An appropriation for a new wing to our barn, to accommodate young stock and additions to our herd, is needed.

An appropriation is requested for the following purposes: furnishing, heating and lighting the new asylum for men; reconstructing, furnishing, heating and lighting of old laundry as a dormitory; a new dynamo to replace two smaller ones which are insufficient for the present electric lighting requirements; laundry machinery; electric and mechanical fixtures for new laundry and building for mechanics.

It is quite necessary that a new water supply for our institution be considered. Because of the long-continued drought during the past two seasons the supply has been exhausted, and during the past summer we were in a very unfortunate position on account of the lack of water for sanitary and fire purposes. The drinking water is obtained from wells on the grounds. It is considered that by a system of artesian wells driven near our present pumping station an abundant supply of water could be obtained, and at the same time could be used throughout the institution as drinking water.

The concrete walks are in a very dilapidated condition and need much repair, also new walks are needed to connect some of our new buildings with the present system. During rainy weather or while there is freezing and thawing the walking is very bad in going from one building to another, for officers, visitors and inmates. The gravel and cinders of which we have to make our paths, when tracked into the buildings, do great damage to our floors.

An appropriation for the purchase of more land is requested.

I wish to thank those of our friends who have kindly furnished us with entertainments, also with books, periodicals, etc. We are glad to pay expressage on non-sectarian reading matter.

I would especially mention our appreciation and gratitude for the untiring devotion of our chaplains to the calls from the hospitals and the regular services in the chapel.

I wish to thank the Board of Trustees for their kind suggestions as a board and as individuals, and their constant help and support in all institution affairs.

Yours respectfully,

JOHN H. NICHOLS,

Superintendent.

TABLE OF DISEASES. *Surgical* — Concluded.

DISEASES.	PATIENTS.			1899.			1900.									DISCHARGED.						
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not Relieved.	Not Treated.	Out-patient Department.	Improved.	Died.
LOCAL DISEASES — Con.																						
Injuries of upper extremities — Con.																						
Fracture of humerus,	5	4	1	-	1	1	-	-	1	-	1	1	-	-	-	2	-	-	-	-	3	-
Fracture of olecronon,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-	-	-
Fracture of ulna and radius,	2	1	1	-	1	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	1	-
Fracture, arm, convalescent,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Bruised shoulder,	4	4	-	-	-	1	2	-	-	1	-	-	-	-	-	-	-	-	-	1	3	-
Cut wrist,	2	2	-	-	-	-	-	-	-	-	-	2	-	-	-	-	2	-	-	-	-	-
Dislocation of elbow, convalescent,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-
Amputation, fingers,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Sprained arm,	2	2	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	2	-	-
Dislocation, shoulder, convalescent,	5	5	-	1	1	-	-	1	1	-	-	1	-	-	-	-	-	-	-	5	-	-
Contusion of shoulder,	2	2	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	1	-
Amputation of arm, convalescent,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Deltoid paralysis,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Septic wound of hand,	10	9	1	3	-	1	1	2	1	1	-	-	-	1	-	-	-	-	-	3	7	-
Septic wound of arm,	2	2	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	2	-
Musculo-spiral paralysis,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-
Sprained thumb,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Injuries of lower extremities : —																						
Fracture, femur,	2	2	-	-	-	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	1
Fracture, patella,	4	4	-	3	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	4	-
Fracture, tibia,	2	2	-	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	2	-
Fracture, tibia and fibula,	3	2	1	1	-	1	-	-	1	-	-	-	-	-	-	3	-	-	-	-	-	-
Fracture, Pott's,	7	7	-	-	-	1	3	1	1	1	-	-	-	-	-	-	1	-	-	1	5	-
Fracture, femur, convalescent,	7	5	2	2	-	-	-	2	-	2	-	-	-	-	1	2	-	2	-	2	1	-
Pott's fracture, convalescent,	2	2	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	1	-	-	1	-
Fracture, metatarsals,	3	3	-	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1	2	-
Fracture, tibia (old),	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-	-
Amputation, thigh, convalescent,	2	2	-	-	2	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	1	-
Amputation, leg, convalescent,	5	3	2	4	-	1	-	-	-	-	-	-	-	-	-	1	-	2	-	-	2	-
Amputation, toes, convalescent,	3	2	1	2	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	2	1	-

Amputation, foot, convalescent,	1	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-
Abrasions of foot,	11	10	1	1	1	-	-	1	-	1	-	3	1	2	1	2	-	-	-	7	2	-
Crushed leg, convalescent,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-
Hæmatoma of leg,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Injury to hip,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Injury to knee,	3	2	1	-	-	-	-	1	-	-	2	-	-	-	-	-	-	1	-	1	1	-
Bullet in leg,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-
Sprained ankle,	6	6	-	-	-	1	-	1	2	2	-	-	-	-	-	-	1	-	-	2	3	-
Teno synovitis,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-	-	-
Ruptured tendo-achilles,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-
Contusion of knee,	4	4	-	1	1	-	-	-	-	1	-	1	-	-	-	1	-	-	-	2	1	-
Flat foot,	9	8	1	-	2	3	-	-	-	2	1	1	-	-	-	-	-	-	-	6	3	-
Dislocation of hip (old),	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Septic foot,	10	10	-	4	-	1	4	1	-	-	-	-	-	-	-	2	-	-	-	1	7	-
Gangrene of leg,	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1
Unclassified, surgical:—																						
Floating kidney,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Surgical shock,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Abdominal sinuses,	3	1	2	1	-	-	-	1	-	-	-	1	-	-	-	-	-	1	-	-	2	-
Undescended testicle,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-
Abdominal injury,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1

TABLE OF DEATHS.

CAUSES OF DEATH.	TABLE BY MONTHS.															TABLE BY AGES.												
	1899.			1900.																								
	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Males.	Females.	Totals.	Under 1 year.	1 to 5.	5 to 10.	10 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	80 to 90.	90 to 100.	Unknown.
Abdominal injury,	1	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Anæmia, pernicious,	-	-	-	-	-	1	-	-	-	-	1	-	1	1	2	-	-	-	-	-	1	1	-	-	-	-	-	-
Aneurism of aorta,	-	-	-	-	-	-	1	-	-	-	-	1	1	1	2	-	-	-	-	-	1	1	-	-	-	-	-	-
Aneurism, popliteal artery and senility,	-	-	1	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-
Apoplexy,	2	-	-	-	-	-	-	-	-	-	-	-	1	1	2	-	-	-	-	1	-	-	1	-	-	-	-	-
Asthma with debility,	-	-	-	-	1	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Atrophy, infantile,	-	-	-	1	-	-	-	-	-	-	-	-	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-
Bronchitis, chronic, and cardiac,	-	-	-	-	-	-	1	-	-	-	-	-	-	2	2	-	-	-	-	-	-	-	-	-	2	-	-	-
Bronchitis and pneumonia,	-	-	1	-	1	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Bronchitis and senility,	-	-	-	2	-	1	-	-	-	-	-	-	2	1	3	-	-	-	-	-	-	-	-	1	1	1	-	-
Cancer, breast,	1	-	-	-	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Cancer, cœcum,	-	-	-	-	-	-	-	-	-	-	-	1	1	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-
Cancer, larynx,	-	-	-	-	-	-	-	-	-	-	-	1	1	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Cancer, lip,	-	-	-	-	-	1	-	-	1	-	-	-	2	-	2	-	-	-	-	-	-	1	1	-	-	-	-	-
Cancer, liver,	-	-	-	-	-	-	1	-	-	-	-	-	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Cancer, jaw,	-	-	1	1	-	-	-	-	-	-	-	-	2	-	2	-	-	-	-	-	1	1	-	-	-	-	-	-
Cancer, intestines,	-	-	1	-	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-
Cancer, penis,	-	-	-	-	1	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Cancer, stomach,	2	1	-	1	-	-	-	-	1	-	-	-	5	-	5	-	-	-	-	-	1	1	2	1	-	-	-	-
Cancer, tongue,	-	-	1	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Cancer, uterus,	-	-	1	-	1	1	-	-	-	-	-	-	-	3	3	-	-	-	-	-	-	-	1	2	-	-	-	-
Cardiac,	1	-	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-
Cardiac, aortic,	-	-	-	-	-	-	-	-	-	-	1	-	1	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-
Cardiac, aortic stenosis,	-	-	1	-	-	1	-	-	-	-	-	-	2	-	2	-	-	-	-	-	-	-	1	-	1	-	-	-
Cardiac, mitral, with epilepsy,	-	-	-	-	-	1	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Cardiac, mitral,	2	3	-	-	2	-	1	-	1	-	-	-	6	3	9	-	-	-	-	-	2	2	-	3	2	-	-	-
Cardiac, double aortic,	-	-	-	2	-	-	-	-	-	-	-	-	2	-	2	-	-	-	-	-	1	-	1	-	-	-	-	-
Cardiac and nephritis,	-	-	1	-	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Cardiac, mitral and aortic,	-	-	-	-	1	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	-	-	1	-	-	-
Celulitis of leg,	-	-	-	-	-	-	-	-	1	-	-	-	1	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Cerebritis,	-	-	-	1	-	-	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-

Cystitis, chronic,	-	-	-	-	-	-	-	-	1	-	-	-	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Debility,	-	-	-	-	-	-	-	-	1	-	-	-	1	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-
Delirium tremens,	-	-	-	-	-	1	-	-	-	-	-	-	1	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-
Dementia, senile,	-	-	-	1	-	2	1	1	3	1	-	-	9	-	9	-	-	-	-	-	-	-	-	3	4	1	1	-
Diabetes, mellitus,	-	-	-	-	-	-	1	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Diarrhœa, chronic,	-	-	-	-	-	1	-	-	-	-	-	-	-	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-
Diphtheria,	-	-	-	-	-	-	-	-	1	-	-	-	1	-	1	-	1	-	-	-	-	-	-	-	-	-	-	-
Eclampsia,	-	-	-	1	-	-	-	-	-	1	-	-	-	2	2	-	-	-	-	1	1	-	-	-	-	-	-	-
Enteritis, acute,	1	-	-	-	-	2	-	1	-	1	3	7	5	10	15	5	-	-	1	1	-	1	2	3	1	1	-	-
Enteritis, chronic,	-	-	-	-	1	2	2	2	1	1	1	-	6	4	10	-	-	-	-	1	1	1	2	3	2	-	-	-
Exhaustion following melancholia,	-	-	-	-	-	-	-	1	-	-	-	-	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-
Fractured femur with senility,	-	-	-	1	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-
Fractured spine,	-	-	-	1	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-
Gangrene of leg,	-	-	-	-	-	-	-	-	-	-	1	-	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-
Hemiplegia,	-	1	-	-	-	-	-	-	-	1	-	-	1	1	2	-	-	-	-	-	1	-	-	1	-	-	-	-
Hemorrhage, cerebral,	-	-	2	1	2	-	1	-	2	-	1	1	6	4	10	-	-	-	-	-	1	1	4	3	1	-	-	-
Hemorrhage of new born,	-	-	-	1	-	-	-	-	-	-	-	-	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-
Hydrocephalus,	-	1	-	-	-	-	-	-	-	-	-	-	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-
Idiocy,	-	-	-	-	-	-	-	-	-	-	1	-	1	-	1	-	-	-	-	1	-	-	-	-	-	-	-	-

Surgical Operations.

OPERATIONS.	Well.	Relieved.	Not Relieved.	Died.	Totals.
Operations on Nerves.					
Neurectomy,	–	1	–	–	1
Operations on Air Passages.					
Polypi, nasal,	–	1	–	–	1
Tracheotomy,	1	3	–	–	4
Intubation,	–	1	–	–	1
Operations on Glands.					
On the breast: —					
Abscess incised,	1	1	–	–	2
Cervical glands: —					
Excision,	4	2	–	–	6
Incision,	1	2	–	–	3
Inguinal glands: —					
Incision and curetting,	8	3	–	–	11
Operations on Head and Face.					
Plastic,	2	1	–	–	3
Powder, face,	–	1	–	–	1
Necrosis, jaw,	1	–	–	–	1
Operations on eye: —					
Enucleation,	–	1	–	–	1
Mouth and throat operations: —					
Tonsillar abscess,	–	2	–	–	2
Alveolar abscess,	–	2	–	–	2
Operations on neck: —					
Carbuncle,	1	1	–	–	2
Tenotomy sterno-mastoid,	1	–	–	–	1
Operations on Chest Wall.					
Excision of rib for empyema,	–	1	–	–	1
Abdominal Operations.					
Appendicitis,	1	–	–	–	1
Hernia, epigastric,	1	–	–	–	1
Hernia, inguinal,	17	–	–	–	17
Hysterrectomy,	–	1	–	–	1
Exploratory laparotomy,	–	–	2	–	2
Operations on Rectum and Anus.					
Fistula,	5	–	–	–	5
Hemorrhoids,	2	–	–	–	2
Ulcers curetted,	–	1	–	–	1
Ischio rectal abscess curetted,	1	1	–	–	2
Stretching sphincter ani,	1	–	–	–	1
Operations on Genito-Urinary System.					
Perineal section,	2	1	–	–	3
On penis: —					
Amputation,	–	1	1	–	2
Circumcision,	11	–	–	–	11
Paraphinosis,	1	–	–	–	1
Phinosis,	1	–	–	–	1

SURGICAL OPERATIONS — *Concluded.*

OPERATIONS.	Well.	Relieved.	Not Relieved.	Died.	Totals.
OPERATIONS ON GENITO-URINARY SYSTEM — *Concluded.*					
On scrotum and testes : —					
Hydrocele tapped,	-	1	-	-	1
Hydrocele, radical cure,	3	-	-	-	3
Varicocele,	3	-	-	-	3
Orchidectomy,	3	1	-	-	4
GYNÆCOLOGICAL OPERATIONS.					
Curettage uterus,	-	1	-	-	1
Trachelorrhaphy,	1	-	-	-	1
OPERATIONS ON EXTREMITIES.					
Excision bursa of elbow,	2	-	-	-	2
Septic arm, incised,	1	1	-	-	2
Erasion wrist joint,	-	1	-	-	1
Incision septic hand,	-	7	-	-	7
Epithelioma arm excised,	1	-	-	-	1
Amputation finger,	1	-	-	-	1
Incision septic arm,	-	1	-	-	1
Amputation thigh,	1	1	-	1	3
Amputation toe,	2	-	-	-	2
Amputation foot,	1	-	-	-	1
Excision knee joint,	-	-	-	1	1
Exostosis fibula,	1	-	-	-	1
Bullet in leg removed,	1	-	-	-	1
Excision bones of foot,	1	1	-	-	2
Varicose veins excised,	3	-	-	-	3
Cellulitis leg incised,	5	-	-	-	5
Septic foot incised,	-	2	-	-	2
Curettage knee joint,	-	1	-	-	1
Abscess thigh incised,	-	3	-	-	3
Necrosis femur curetted,	-	1	-	-	1
Necrosis tibia curetted,	1	3	-	-	4
Necrosis oscalcis curetted,	-	1	-	-	1
Tenotomy, club foot,	-	1	-	-	1
MISCELLANEOUS OPERATIONS.					
Tiersch graft,	5	-	1	-	6
Skin graft,	2	1	-	-	3
Venereal warts,	-	1	-	-	1
Psoas abscess incised,	-	1	-	-	1
Carbuncle buttock,	1	-	-	-	1
Total,	82	58	4	2	166

TRUSTEES' REPORT.

To His Excellency the Governor and to the Honorable Council.

In accordance with the requirements of the Public Statutes, the trustees of the State Hospital and the State Farm submit herewith their forty-eighth annual report relative to the State Hospital for the year ending Sept. 30, 1901.

The reappointment by the Governor and Council of Jacob H. Hecht, Payson W. Lyman and Leonard Huntress, whose terms expired within the year, leaves the personnel of the Board the same as last year, except for the lamented death of Dr. Cecil F. P. Bancroft, the honored principal of Phillips Academy, Andover. His term of service with us had not been long, but it had been fruitful of good. He had impressed himself upon his associates as a man of signal ability, strict integrity, clear discernment, wide sympathy and executive force. He was modest, genial, courteous, humane and just; insistent on a wise economy, as well as on improvement in method and appliance. In his death the State loses a faithful and wise trustee of important interests, and his associates a valued friend and helper.

The report of Dr. Nichols, superintendent and resident physician, together with the lists, forms, statements, schedules and statistics accompanying the same, all of which are made a part of this report, give a detailed history of the institution for the financial year, and include a statement of the further provisions regarded as of immediate importance. The report gives clear evidence of the growing importance of the hospital feature of the work of the institution, — a fact witnessed by its recent fitting change of name.

The trustees call special attention to the report concerning the work of the isolated hospital for consumptives for the first full year of its operation. They believe it has already justified the selection of site and its establishment as a separate department of the hospital. They believe that in growing measure this hospital is looked upon as affording a pattern which may well be studied by those in charge of institutions performing similar service.

The extent and variety of the work of the institution is evidenced by the report and the tables hereto appended, by which it appears that there have been admitted during the year 3,360 persons, or 479 more than during the preceding year. The whole number of inmates for the year was 4,534, of whom 638 were insane patients. The largest number under care at any one time was 1,620, and the smallest 1,168, the weekly average being 1,346, or 96 greater than that of last year. Of this total number, 3,285 were treated, as patients, in the hospital.

During the year there was expended $186,909.81 for current maintenance, of which $42,890.65 was for salaries and $144,019.16 for general expenses.

Under the special appropriations made by the Legislature (chapter 70, Resolves of 1900; chapter 71, Resolves of 1899; chapter 471, section 2, Acts of 1901; and chapter 3, Resolves of 1901), the sum of $53,881.49 has been expended during the year, as shown by the tables accompanying this report. The annual inventory, as required under section 7 of chapter 79 of the Public Statutes, has been taken, and an appraisal of the real and personal property connected with the institution and belonging to the Commonwealth has been made by Charles H. Littlefield of Lawrence, whose report is herewith submitted, showing a total valuation of $1,009,624.73.

The history of the year includes the fire which broke out

January 2, during the night time, and consumed the old laundry building, the story of which occurrence is more fully told in the report of the superintendent. There is reason for thankfulness that its results were not more serious.

The new work performed during the year, under the special appropriations instanced, included the completion of the new laundry building, nearly ready for occupancy when the fire came, and since finished; the construction of the cold-storage building, which yet remains to be equipped; the building for mechanics, already occupied, whose use the superintendent's report describes; and the partial construction of the asylum for insane men, which will accommodate 100 patients, providing for their proper classification and separation into groups. Our landed holdings were augmented during the year by the purchase of the J. L. Burt estate, adjoining our farm, which, with its buildings, furnishes a needed addition to the same. It is hoped that the spur track, to be used for the purpose of bringing coal and other heavy supplies to the doors of the institution, for the construction of which the requisite authority has been granted and for which the Legislature has already made an appropriation, will be constructed so as to be ready for use during the coming summer. The provision for a new water supply, authorized by act of the Legislature, is already advanced, as shown in the superintendent's report.

The trustees call attention to the superintendent's presentation of the immediate needs of the institution. They have given the matter consideration, and agree in recommending the necessary appropriations for the following purposes, and for the reasons stated: —

1. A building for the conduct of surgical operations.
2. An additional building for the care of insane women.
3. Means for the safer disposal of the sewage of the institution.

The history of the typhoid outbreak emphasizes the latter need.

The trustees also endorse the suggestion relative to authority for the conduct of post-mortem pathological research.

By the energetic and discreet administration of his trust, the superintendent and resident physician, Dr. John H. Nichols, continues to merit the approval of the trustees. He has met the enlarging responsibilities of his position with admirable grasp and tact, holding the various departments well in hand. With the loyal and faithful support of a well appointed and efficient staff of co-workers, he has carried the institution through the year with a degree of credit which affords a happy augury for its future usefulness.

Respectfully submitted,

J. WHITE BELCHER.
JACOB H. HECHT.
SARAH D. FISKE.
ANNA F. PRESCOTT.
PAYSON W. LYMAN.
LEONARD HUNTRESS.

TEWKSBURY, Oct. 29, 1901.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Hospital and State Farm.

I have the honor of presenting to you the forty-eighth annual report of the State Hospital.

During the year 4,534 people have been cared for; of these, 3,360 have been admitted during the year. The smallest number present at any one time was 1,168 on the first day of October, and the largest number present at any one time was 1,620 on the thirteenth day of March. The weekly average has been 1,346, or 96 more than last year. The cash disbursements were $186,909.81, making a gross weekly per capita cost of $2.67.

INCOME.

During the year $1,726.80 was turned into the State treasury for articles sold, etc. The State Board of Charity, through the State adult poor department, has collected $32,050.73 from cities, towns and individuals for cases boarded here, thus making a net outlay for running the institution of $152,132.28.

MANUFACTURES.

In the house department 27,941 articles have been manufactured during the year, and in the asylum department 29,353, as shown in Statement No. 6.

FARM AND GARDEN.

The farm and garden has averaged about the same as in former years, although in some particulars the produce has been less than it was last year. As the number of able-bodied men that we have to put on the farm work in the summer time is very limited, and as the extra work incident to the erection of new buildings draws very heavily upon the teams and labor of the farm department, the greatest possibilities of the farm are not realized. Statement No. 5 furnishes special facts relative to the farm and garden.

HOSPITALS.

In our hospital wards during the year there have been treated 3,285 patients, — 2,268 males and 1,017 females; of these, 2,536 were medical cases and 749 surgical. Among the diseases treated there were 373 of phthisis, 20 of other forms of tuberculosis, 4 cases of diphtheria, 32 of typhoid fever, 134 of syphilis, 2 of varicella, 7 of influenza, 53 of malaria, 7 of whooping-cough and 2 of scarlet-fever.

There were 434 deaths, of which 337 were males and 97 females. Of these, 126 were due to phthisis, 19 were from cancer, 5 from other malignant diseases, 5 from typhoid fever, 1 from trichinosis, 28 from cardiac disease, 3 from gangrene, 14 from cerebral hemorrhage and 11 from general paralysis of the insane. Thirty deaths were patients under one year of age, 3 were between one and five years and 128 were over sixty years of age.

There were 122 births, — 57 males and 65 females.

Two hundred surgical operations were performed, as shown upon special surgical table. There were but two deaths. In the out-patient department 1,048 cases have been treated, — 736 medical and 312 surgical. Further information regarding the diseases treated and surgical operations performed may be found in the tables under hospital statistics.

It is now one year since our men's hospital for tuberculosis was opened. During this time 311 patients have been cared for, and the success of this department has fully equalled our expectations. The majority of the cases sent to us are in the most discouraging condition, many of them having but a few weeks or days to live; still, our new conditions enable us to greatly relieve their suffering, and make them as comfortable and cheerful as could be possible anywhere. There is much encouragement, however, among those cases which are amenable to treatment, and we see great improvement, as manifested by increase in strength and weight, and diminished cough; while some of them are discharged perfectly well, as far as can be judged by signs and symptoms. All of those who are able are out of doors a great portion of the time. An abundance of fresh air is furnished in the wards at all times through open windows.

The advantage in the safety to the patients in other parts of the institution, by separating these cases of tuberculosis, is something that we cannot fully estimate, but yet makes us feel most secure in caring for those sick from other causes in our hospital.

There were treated in the hospital for tuberculosis during the year 311 cases; of these cases, in 8 the disease was arrested, in 151 the patients improved, 48 were not improved and 104 died.

Department for the Insane.

There have been admitted within the year 154 patients, which is 51 more than last year. The daily average has been 504. The number remaining Sept. 30, 1901, was 522. Of these admissions, 12 were cases of acute melancholia, 7 acute mania, 3 puerperal insanity and the remaining recurrent or chronic cases.

There were 91 patients transferred from the house to the asylum department during the year.

There have been 69 deaths, — 40 males and 29 females.

The infirmary tables show 190 cases treated, 171 of which were medical and 19 surgical. The cases of physical diseases are not included in the hospital statistics, but will be found at the end of the statistics of the insane department, as an additional table.

Medical Staff.

On December 1 Dr. A. J. Ranney resigned his position as assistant superintendent, to accept a position as superintendent of the Long Island almshouse and hospital in Boston harbor, which was a merited recognition of his faithful and efficient service during his six years at the State Hospital. Dr. Joseph B. Howland, first assistant physician, was promoted to succeed Dr. Ranney as assistant superintendent.

Dr. Arthur J. Dresser and Dr. Hannah Lowell were appointed assistant physicians in the insane department.

With deep regret I record the death of Dr. Arthur J. Dresser on June 12 from typhoid fever. He had served with us eighteen months as interne and six months as assistant physician in the insane department. He was a most faithful and conscientious worker, with a temperament especially fortunate for work in that department. Dr. Harold C. Goodwin was appointed, July 1, to fill the position left vacant by the death of Dr. Dresser.

During the year certificates for satisfactory service have been presented to the following internes: Dr. Arthur J. Dresser, Dr. Harold C. Goodwin, Dr. Hannah Lowell and Dr. Melvin P. Burnham.

Training School for Nurses.

The training school for nurses was practically established in 1890, lectures, recitations and bedside instruction were regularly given, and, although diplomas were not issued until 1896, it in reality completes its eleventh year.

There have been 64 lectures given during the year by the physicians, and regular recitations conducted by the superintendent of nurses every week. A night superintendent of nurses has been added to our nursing force, making occasional visits in all of the wards during the night.

The following nurses have received diplomas during the year: Miss Lenah Belle Austin, Miss Miriam Howes Crowell, Miss Urania E. Augusta, Miss Mary H. Meikle and Miss Mary E. Patriquin.

An epidemic of typhoid fever broke out in our hospital on the twenty-seventh day of May. An immediate investigation disclosed the fact that the brook from which we obtained the water supply for domestic and sanitary purposes was contaminated by sewage, which had found its way to a branch of the brook that empties below our pumping station, and that, owing to the excessive amount of rain, had broken over an old barrier which prevented it from communicating with the stream farther up. This break was at once repaired, and the State Board of Health was informed and investigated our conditions.

There were 20 cases which developed, — 11 in our insane department, 3 hospital patients and 6 officers. There were 2 deaths, — one a patient from the men's asylum ward and the other a member of the medical staff. This epidemic was under control by the first of July.

The contamination of the water was beyond doubt from our own sewage. It is well disposed of by irrigation of the soil, which is of a sandy nature; but the heavy rains of the prolonged wet season washed it beyond the usual barriers, when the soil had contained all of the water that it could hold.

On the morning of the 2d of January a fire was discovered in our laundry, and in a very short while the building was all ablaze. The building, together with all of the machinery and a very large amount of clothing, was destroyed. The fire made such rapid headway that there was barely time to remove the 9 children and 2 adults who were sleeping in the rooms on the floor above the ironing room. The fire was discovered by the night attendant on his hourly round, yet there is no doubt but that it started in the basement of the building, — a place where there was no one to detect it; it had probably been burning for quite a while. The State Fire Marshal examined the premises immediately, and the cause assigned was spontaneous combustion in the drying room.

The officers responded quickly and efficiently, and kept the fire from spreading to our women's dormitory, which was practically a part of the same building, until the prompt arrival of the Lowell fire department, which rendered excellent service.

Improvements.

The new laundry building was not far from completion at the time of the fire, and with great haste it was made ready for use with temporary machinery, and as fast as possible replaced with permanent machinery, which work was finally completed July 1. As all of our machinery was destroyed, a special appropriation was obtained from the Legislature, and the building furnished with modern washing apparatus and a sterilizer, operated by electric motors, and equipped with steam and electric ironing apparatus. The construction of the drying room is of metal, making that section of the laundry fire-proof, and diminishing the probability of a repetition of our disastrous fire. The laundry is now working in a most satisfactory manner, and the separate room for officers' clothing is something which is thoroughly appreciated.

A building for mechanics has been erected, with carpenter's, painter's, blacksmith's and machine shops, so that all of these industries are now housed under one roof, which is greatly to the advantage of the institution.

A building for cold storage has been erected, and excavation for a new mortuary begun.

For a water supply, fourteen wells have been driven, a pumping test has been made, and the water analyzed by the State Board of Health. Although we have not received an official report, we understand that the water obtained is satisfactory, and the pumping test indicates that there is an adequate supply. It is our hope to have this new system in operation before winter.

Work on the new asylum for men was begun in March, the walls have been erected and most of the roof is now ready for slating.

The estate known as the J. L. Burt farm, containing sixty acres of land, has been purchased.

IMPROVEMENTS SUGGESTED.

A new operating building is greatly needed. Many operations are performed, and the present operating rooms in the men's and women's buildings are very small and ill adapted to the work. An operating building situated so that it would be within easy access from the hospitals on each side of the yard would be most convenient. Our work requires that there should be one first-class operating room.

There is considerable overcrowding in our women's asylum department, and we are often requested by the State Board of Insanity to care for more insane women. To meet this increased demand for beds I would suggest that a building for 100 women be erected, and that we have this building so arranged that a number of small wards or subdivisions would enable us to care for the violent and excited patients better than is possible in the very large dormitories and wards as they exist to-day.

Our sewerage system, which was practical when it was established, ten or more years ago, has become inadequate, owing to the increased number of buildings and sanitary sections. The overflow from the sewage basins is greater than can be absorbed by the system of irrigation of the surrounding land, especially during very wet seasons, when the land is full of water; and also in winter, when the ground is frozen, it overflows the usual bounds and contaminates the brook. The State

Board of Health has advised us to establish a new system for sewage disposal, and I believe that this should be attended to as soon as possible.

In order that our hospital should do the best that is possible toward extending information and contributing to the advancement of medical science, which should be the aim of every large hospital, it is desirable that the law should allow us to conduct post-mortem pathological research in certain of our cases, and I would respectfully suggest that this matter be considered.

The Rev. Father Campeau, who labored so faithfully and devotedly in our hospital for seven years, has been transferred to the church of St. Jean Baptiste, in Lowell. The Rev. Father Emery, who succeeded to his place, came back to the work, with which he was familiar some years ago, and has been recently transferred to be rector of the Ottawa University.

We wish to record our appreciation for the faithful and devoted work rendered by the Rev. Father Sirois and the Rev. E. W. Pride in the regular daily visits and the weekly religious services.

We would extend thanks to those of our friends who have through the year kindly furnished us with entertainments, and sent us contributions of books, periodicals, etc. We are always willing to pay expressage on reading matter of non-sectarian character.

Before closing my report, I wish to acknowledge my gratitude to the officers of the hospital for their loyalty and faithful attention to duties especially during our epidemic of typhoid fever, which was one of the most severe trials through which we have had to pass.

I desire to express my sincere thanks to the trustees for the advice, assistance and encouragement with which I have always been supported in the numerous and perplexing matters of administration.

Yours respectfully,

JOHN H. NICHOLS,
Superintendent.

Diseases of head, neck and face:—																							
Abscess, alveolar,	2	2	-	-	1	-	-	1	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-
Abscess of face,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-
Cancer of face,	4	4	-	1	1	-	-	-	1	1	-	-	-	-	-	3	-	-	-	-	-	1	-
Carbuncle of neck,	4	4	-	2	-	-	-	-	-	-	1	-	-	1	-	1	1	-	-	1	1	-	-
Deformed nose,	2	2	-	-	-	-	2	-	-	-	-	-	-	-	-	-	-	-	-	-	2	-	-
Lipoma of neck,	1	-	1	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Necrosis of jaw,	2	2	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	1	-	-
Necrosis of nasal bones,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Sarcoma of neck,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Sarcoma of nose,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-
Septic nose,	1	1	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Ulcer of face,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Wen of face,	2	2	-	-	-	1	-	-	1	-	-	-	-	-	-	2	-	-	-	-	-	-	-
Diseases of spine:—																							
Abscess, psoas,	3	2	1	-	-	-	-	1	-	-	-	-	2	-	-	-	-	-	2	-	-	1	-
Pott's disease,	12	8	4	1	2	3	-	-	-	-	-	1	1	-	1	-	-	7	-	-	1	1	3
Scoliosis,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-
Spinal hemorrhage,	1	-	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Spinal, unclassified,	3	3	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	1	-	1
Diseases of bones and joints:—																							
Bow-legs,	2	1	1	1	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-
Hip-disease,	7	6	1	1	1	-	-	1	-	2	2	-	-	-	-	-	-	4	-	1	2	-	-
Necrosis of tibia,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Necrosis of bones of foot,	3	3	-	-	-	-	-	1	-	1	-	-	-	-	-	1	-	-	-	-	1	-	1
Necrosis of femur,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Necrosis of radius,	1	1	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-
Osteomyelitis of tibia,	4	4	-	-	-	-	1	-	-	1	-	-	-	1	-	1	-	-	-	-	2	-	1
Osteomyelitis of femur,	4	4	-	1	1	-	1	-	-	1	-	-	-	-	-	2	-	1	-	1	-	-	-
Talipes, valgus,	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Rhachitis,	4	2	2	1	-	-	-	-	-	-	2	-	-	-	1	-	-	2	-	-	2	-	-
Synovitis of knee,	3	3	-	-	-	2	-	1	-	-	-	-	-	-	-	-	-	-	-	-	3	-	-
Septic wound of knee,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Tuberculosis of ankle,	8	6	2	3	1	-	-	1	-	1	1	-	-	1	-	2	-	3	-	-	3	-	-
Tuberculosis of knee,	5	4	1	-	-	-	-	-	-	-	-	-	1	-	2	-	-	2	-	1	-	-	2
Diseases of upper extremities:—																							
Axillary abscess,	5	3	2	1	-	-	-	2	-	-	-	-	-	-	-	2	-	-	-	-	1	-	2
Bursitis of elbow,	2	2	-	1	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-
Deformed hand,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-

TABLE OF DISEASES. *Surgical* — Continued.

DISEASES.	PATIENTS.			1900.			1901.									DISCHARGED.							
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not relieved.	Not treated.	Out-patient Department.	Improved.	Died.	Still in Hospital.
LOCAL DISEASES — Con.																							
Diseases of upper extremities — Con.																							
Fibroma of arm,	1	1	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Gangrene of arm,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-
Tuberculous dactylitis,	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-
General injuries: —																							
Abrasions,	7	6	1	-	-	2	-	2	-	1	2	-	-	-	-	1	-	-	-	6	-	-	-
Contusions,	20	19	1	1	-	-	2	2	3	2	1	3	3	2	1	2	-	-	-	11	7	-	-
Diseases of head, chest and back: —																							
Decubitus following fracture of spine,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-
Fracture of jaw,	5	5	-	-	-	-	1	-	-	-	-	3	1	-	-	4	-	-	-	-	1	-	-
Fracture of ribs,	10	9	1	2	-	1	1	2	1	1	1	1	-	-	-	4	-	-	-	4	2	-	-
Fracture of nose,	2	2	-	-	-	2	-	-	-	-	-	-	-	-	-	1	-	-	-	1	-	-	-
Fracture of spine (old),	2	2	-	2	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	2
Gunshot wound of head,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Injury to head,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-
Injury to spine,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Injury to neck,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	1	-	-
Incised wound of face,	3	3	-	-	-	-	-	-	-	-	1	1	-	-	1	3	-	-	-	-	-	-	-
Incised wound of lip,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-	-	-	-	-
Scalp wound,	7	6	1	-	-	-	-	1	2	1	-	-	2	-	1	1	-	-	-	3	3	-	-
Strain of back,	4	4	-	-	1	1	1	-	-	-	-	-	-	-	1	-	-	-	-	2	2	-	-
Septic wound of head,	2	2	-	-	-	-	-	1	-	1	-	-	-	-	-	1	-	-	-	-	1	-	-
Diseases of lower extremities: —																							
Abscess of thigh,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Chronic ulcers,	78	60	18	17	6	7	9	3	2	5	6	3	3	7	3	14	-	6	-	24	22	-	5
Carbuncle of buttock,	3	3	-	-	1	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	2	-	-
Carbuncle of back,	3	3	-	-	-	-	-	-	1	-	-	-	1	1	-	1	-	-	-	-	2	-	-
Epithelioma of leg,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Typhoid hip,	2	2	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	2	-	-
Talipes equinus,	2	2	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	1

Injuries of upper extremities: —																							
Amputation of arm,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-	-
Bruised shoulder,	4	4	-	-	1	-	1	-	1	-	1	-	-	-	-	1	-	-	-	3	-	-	-
Cut tendons,	1	1	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-
Colles fracture,	4	2	2	-	-	-	-	2	-	-	-	-	1	1	-	1	-	-	-	2	1	-	-
Colles fracture, convalescent,	2	1	1	-	-	-	-	1	1	-	-	-	-	-	-	1	-	-	-	-	1	-	-
Dislocation of elbow, convalescent,	1	1	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Deltoid paralysis,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	1	-	-	-
Dupuytreus contraction,	1	1	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Fracture of arm, convalescent,	2	2	-	-	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	2	-	-	-
Fracture of clavicle,	3	2	1	-	1	-	1	-	-	-	-	-	-	1	-	1	-	-	-	1	1	-	-
Fracture of external condyle,	1	1	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	1	-	-
Fracture of humerus,	3	3	-	-	-	-	-	-	-	-	-	-	-	2	1	-	-	1	-	2	-	-	-
Injury to arm,	3	3	-	-	-	-	-	2	1	-	-	-	-	-	-	-	-	-	-	-	3	-	-
Median nerve and tendon suture convalescent,	1	1	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-	-	-	1	-	-
Musculo-spiral paralysis,	2	2	-	-	-	1	-	-	-	-	-	-	1	-	-	-	-	1	-	1	-	-	-
Septic wound of hand,	15	15	-	1	2	3	-	1	3	-	1	1	2	-	1	3	-	-	-	3	9	-	-
Sprained arm,	5	3	2	-	-	1	1	1	-	1	1	-	-	-	-	1	-	-	-	3	1	-	-
Shoulder dislocated, convalescent,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Injuries of lower extremities: —																							
Abrasion of foot,	5	5	-	2	-	-	2	-	-	-	1	-	-	-	-	-	-	-	-	3	2	-	-
Amputation of thigh, convalescent,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Amputation of leg, convalescent,	4	4	-	1	-	-	-	-	1	-	1	-	-	1	-	1	-	-	-	3	-	-	-
Amputation of toes, convalescent,	2	2	-	-	-	-	1	-	-	-	1	-	-	-	-	1	-	-	-	1	-	-	-
Amputation of leg,	3	3	-	2	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	2
Amputation of foot, convalescent,	2	2	-	-	1	-	1	-	-	-	-	-	-	-	-	1	-	-	-	-	1	-	-
Flat foot,	3	3	-	-	-	-	2	1	-	-	-	-	-	-	-	-	-	-	-	1	2	-	-
Fracture of femur,	1	-	1	1	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-	-	-	-	-
Fracture of femur, convalescent,	10	9	1	2	2	1	1	1	-	-	2	-	-	1	-	-	-	-	-	9	1	-	-
Fracture of tibia,	9	7	2	1	1	2	-	1	2	-	1	-	-	-	-	3	-	-	-	3	2	-	1
Fracture of tibia and fibula,	3	3	-	1	-	-	1	-	-	-	-	-	1	-	-	2	-	-	-	1	-	-	-
Fracture of patella,	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1
Fracture of fibula,	1	1	-	-	-	-	-	-	-	1	-	-	-	-	-	1	-	-	-	-	-	-	-
Fracture of metatarsals,	2	2	-	-	-	1	-	-	-	-	-	-	-	1	-	1	-	-	-	-	1	-	-
Fracture of os calcis,	1	1	-	-	-	-	1	-	-	-	-	-	-	-	-	-	-	-	-	1	-	-	-
Gangrene of leg,	2	1	1	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	1	1
Gangrene of foot,	2	2	-	-	-	1	-	-	1	-	-	-	-	-	-	2	-	-	-	-	-	-	-
Hæmatoma of leg,	2	2	-	-	-	-	1	-	-	-	-	-	-	-	1	1	-	-	-	1	-	-	-
Injury to hip,	7	6	1	-	-	-	1	1	1	-	-	-	-	2	1	-	-	-	-	5	1	-	-
Injury to knee,	3	3	-	1	-	-	2	-	-	-	-	-	-	-	-	1	-	-	-	-	2	-	-
Pott's fracture,	6	6	-	-	-	1	1	1	1	-	-	2	-	-	-	-	-	-	-	1	5	-	-
Pott's fracture, convalescent,	4	4	-	-	-	1	-	-	-	1	-	-	-	1	1	1	-	1	-	1	1	-	-
Septic wound of thigh,	4	4	-	-	-	1	-	1	-	1	-	1	-	-	-	2	-	-	-	1	1	-	-

TABLE OF DISEASES. *Surgical* — Concluded.

Surgical Operations.

OPERATIONS.	Well.	Relieved.	Not relieved.	Died.	Totals.
OPERATIONS ON AIR PASSAGES.					
Intubation,	3	-	-	-	3
Adenoids,	1	-	-	-	1
OPERATIONS ON GLANDS.					
Axillary abscess, incised,	2	-	-	-	2
Deep cervical abscess, incised,	1	-	-	-	1
Cervical adenitis excision,	4	-	-	-	4
Tuberculous glands of neck excised,	1	-	-	-	1
OPERATIONS ON HEAD AND FACE.					
Epithelioma of face, excised,	4	-	-	-	4
Lip, suture of,	1	-	-	-	1
Plastic on nose,	1	-	-	-	1
Wen of face, excised,	1	-	-	-	1
Operations on eye.					
Hypopyon,	1	-	-	-	1
Operations on mouth and throat.					
Tonsillar abscess,	-	1	-	-	1
Operations on neck.					
Carbuncle incised,	1	-	-	-	1
OPERATIONS ON CHEST WALL.					
Paracentesis,	8	-	-	-	8
Empyema incision,	1	-	1	-	2
Breast excision,	1	-	-	-	1
ABDOMINAL OPERATION.					
Abscess Iliac glands laparotomy,	1	1	-	-	2
Exploratory laparotomy,	-	1	-	-	1
Hernia, femoral (radical cure),	1	-	-	-	1
Hernia, inguinal (radical cure),	11	-	-	-	11
Hernia, strangulated taxis,	1	-	-	-	1
Herniotomy and enterostomy,	-	-	-	1	1
OPERATIONS ON RECTUM AND ANUS.					
Fistula,	4	2	-	-	6
Hemorrhoids,	5	1	-	-	6
Ischio rectal abscess incised,	1	2	-	-	3
Kraske's operation,	1	-	-	-	1
Perineal fistula curettage,	1	-	-	-	1
OPERATIONS ON GENITO-URINARY SYSTEM.					
Perineal section,	2	1	-	-	3
Urethral calculus removal,	1	-	-	-	1
Urethral divulsion,	-	1	-	-	1
Operation on penis.					
Circumcision,	5	-	-	-	5
Foreskin incised,	-	4	-	-	4
Operation on scrotum and testes.					
Hydrocele (radical cure),	3	-	-	-	3
Hydrocele tapped,	1	1	-	-	2
Varicocele (radical cure),	1	-	-	-	1
Spermatocele tapped,	1	-	-	-	1

SURGICAL OPERATIONS — *Concluded.*

OPERATIONS.	Well.	Relieved.	Not relieved.	Died.	Totals.
GYNÆCOLOGICAL OPERATIONS.					
Curettage uterus,	1	-	-	-	1
Labial abscess incised,	1	-	-	-	1
Hysterectomy,	1	-	-	-	1
Ovariotomy,	3	-	-	-	3
Perineorrhaphy,	2	1	-	-	3
Trachelorrhaphy,	2	-	1	-	3
OBSTETRICAL OPERATIONS.					
Version,	1	-	-	-	1
OPERATIONS ON EXTREMITIES.					
Septic arm incised,	2	-	-	-	2
Amputation, arm,	-	-	-	1	1
Tenotomy, hand,	-	1	-	-	1
Tuberculous tendon sheath incised,	1	-	-	-	1
Septic hand incised,	5	3	-	-	8
Cellulitis arm, multiple incisions,	1	-	-	-	1
Necrosis radius curetted,	1	-	-	-	1
Hip joint erasion,	1	-	-	-	1
Abscess thigh incised,	-	1	-	-	1
Carbuncle thigh incised,	1	-	-	-	1
Cellulitis leg, multiple incisions,	3	-	-	-	3
Hematoma leg incised,	1	-	-	-	1
Septic leg incised,	2	-	-	-	2
Amputation, leg,	2	-	-	-	2
Osteomyletitis femur,	2	-	-	-	2
Curettage femur,	-	1	-	-	1
Curettage ankle,	1	-	-	-	1
Bursa knee incised,	1	-	-	-	1
Tenotomy tendo achilles,	1	-	-	-	1
Erasion ankle,	-	1	-	-	1
Varicose veins excised,	4	2	-	-	6
Thiersch graft,	4	-	-	-	4
Septic foot incised,	2	1	-	-	3
Osteotomy,	1	1	-	-	2
Removal sequestrum,	2	3	-	-	5
Amputation, foot,	1	-	-	-	1
Carbuncle knee excised,	1	-	-	-	1
Epithelioma leg excised,	1	-	-	-	1
Knee joint incised,	1	-	-	-	1
Amputation, toe,	2	-	-	-	2
Skin graft,	11	-	-	-	11
MISCELLANEOUS OPERATIONS.					
Abscesses incised,	1	3	-	-	4
Carbuncle back excised,	2	-	-	-	2
Carbuncle back incised,	1	2	-	-	3
Furuncle incised,	2	1	-	-	3
Bubo incised,	9	1	-	-	10
Hematoma incised,	2	-	-	-	2
Lipoma back excised,	2	-	-	-	2
Cold abscesses incised,	2	-	-	-	2
OPERATIONS ON BLOOD VESSELS.					
Sub. clavian artery ligated,	-	1	-	-	1
Totals,	158	38	2	2	200

Out-patient Department. *Medical.*

	Patients.			1900.			1901.									Discharged.					
	Totals.	Males.	Females.	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Well.	Relieved.	Not relieved.	Hospital.	Improved.	Operation.

TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

Complying with the requirements of the Revised Laws of the Commonwealth, the trustees of the State Hospital and the State Farm submit their forty-ninth annual report, relative to the condition and work of the State Hospital for the year ending Sept. 30, 1902.

The reappointment of those members whose terms were about to expire leaves the personnel of the Board the same as last year, except that the vacancy occasioned by the death of Dr. Cecil F. P. Bancroft of Andover, which we noted in our last report, has been filled by the appointment of Joseph A. Smart, also of Andover.

The report of Dr. Nichols, superintendent and resident physician, together with the tabulated information accompanying the same, all of which are submitted as a part of this report, give a detailed history of the work of the year.

From the statements embodied in and accompanying the report it will be seen that there were admitted during the year 3,246 persons, or 114 less than were admitted during the preceding year. The whole number of inmates under care during the year was 4,472, or 62 less than last year. Of these, 604 were insane patients. The largest number under care at any one time was 1,597 and the smallest 1,144, the weekly average being 1,284, or 62 less than last year. Of this total number, 3,217 were treated as patients in hospital. This statement shows strikingly the relative prominence of the hospital feature of the work of the institution.

During the year, mainly under appropriation voted by the General Court at its last sitting, there was expended $174,-

188.58 for current maintenance, of which $44,306.84 was for salaries, wages and labor, and $129,881.74 for general expenses. This gives a gross per capita cost of $2.61 a week. If from this total expenditure for maintenance there should be deducted the amounts received by the State treasury for articles sold, and the sums collected from cities and towns and from the United States, there would remain a net outlay from the State treasury of $138,850.60.

Under special appropriations made by the Legislature (chapter 70, Resolves of 1900; chapter 71, Resolves of 1899; chapter 471, section 2, Acts of 1901; and chapter 3, Resolves of 1901), the sum of $48,938.43 has been expended, as shown by tables accompanying this report. (See pages 29 to 31.)

The annual inventory, as required by chapter 84, section 7, of the Revised Laws of Massachusetts, has been taken, and an appraisal of the real and personal property connected with the institution and belonging to the Commonwealth has been made by Charles H. Littlefield of Lawrence, whose report, herewith submitted, shows a total valuation of $1,068,979.87.

The new work performed during the year under the special appropriations instanced includes the erection of a new and suitable mortuary chapel, the continuation of work on the cold storage buildings and on the asylum for insane men, both of which structures will soon be ready to serve the purposes of their construction. A new and satisfactory water supply has been obtained, as described in the superintendent's report, and the spur track, over which heavy lading is to be brought to the institution, it is expected will soon be laid, the grading being substantially completed.

The trustees endorse the request of the superintendent for a small appropriation for the purchase of additional land for farm use, the farm being an important adjunct of the institution life.

We note the call which has taken from us the assistant superintendent, Dr. Joseph B. Howland, and Miss E. Maude Ellis, the superintendent of nurses, to fill places of larger responsibility, as renewed evidence of the value of the training which faithful service in this institution gives, as well as of the worth of the work which is here done.

For the success which has attended the operations of the year in all departments, a large measure of credit is due the superintendent, Dr. John H. Nichols, whose energy, skill and devotion have enabled him to respond successfully to the heavy demand upon his resources which his office makes. Seconded, as his efforts have been, by those of faithful assistants in administrative duty and in medical and surgical ministration and by those of the large body of employees in the various departments, the institution has continued to do its assigned work in the complex charitable system of the Commonwealth.

Respectfully submitted,

J. WHITE BELCHER.

SUPERINTENDENT'S REPORT.

To the Trustees of the State Hospital and State Farm.

I have the honor of presenting to you the forty-ninth annual report of the State Hospital.

In all, 4,472 people have been cared for; of these, 3,246 have been admitted during the year. The smallest number present at any one time was 1,144, on the twenty-fifth day of June; and the largest number present at any one time was 1,597, on the thirtieth day of January. The weekly average has been 1,284, or 62 less than last year. The cash disbursements were $174,188.58, making a gross weekly per capita cost of $2.61.

Income.

During the year $1,785.74 was turned into the State treasury for articles sold, etc. The State Board of Charity, through the State adult poor department, has collected $32,936.24 from cities, towns and individuals, and $616 for United States cases boarded here, thus making a net outlay for running the institution of $138,850.60.

Manufactures.

In the house department 22,251 articles have been manufactured and in the asylum department 20,119.

Farm and Garden.

On account of the cold summer and excessive amount of rain, there has been a lighter crop of corn to the acre than usual; but, as a larger amount was planted, our supply of ensilage is practically the same as before. The season, however, proved a favorable one for the potato crop, and there is a general increase in the amount of other vegetables and fruits over the crop of last year.

The prevalence of trichinosis among our swine was early detected by reason of a custom long established, of examining microscopically a portion of the tissue of every hog killed. Careful investigation and study enabled us to discover the disease in the living hog by microscopical examination of a small portion of the tissue removed, and ten per cent. of the herd were found to be affected, and were at once killed and destroyed, or isolated. All of their food has been boiled, and thorough cleansing and other precautions taken, so that now it is rare to find evidence of the disease in any of the pigs slaughtered. Dr. Drake, our pathologist, has made the matter a special study, and has read a paper on the subject before the Massachusetts Medical Society and the Boston Society of Medical Science. His report was published in the "Journal of Medical Science" of June 19, 1902.

Hospitals.

Considerable encouragement and additional interest will be found in reviewing the hospital statistics of this past year.

There has been considerable increase in the amount of surgical work performed, and a very small number of contagious cases appeared.

There are 9 cases of small-pox reported, all of which were admitted from outside the institution, and supposed to be non-contagious. By reason of great watchfulness, caution and early isolation, no new cases broke out in our hospital.

In our hospital wards there have been treated 3,217 patients, — 2,373 males and 844 females. Of these, 2,456 were medical and 761 surgical cases. Among the diseases treated were 371 of phthisis, 21 of typhoid fever, 105 of syphilis, 3 of varicella, 45 of malaria, 3 of whooping-cough, 2 of scarlet-fever and 9 cases of small-pox.

There were 409 deaths, — 317 males and 92 females. Of these, 122 were due to phthisis, 17 were from cancer, 4 from typhoid fever, 1 from trichinosis, 36 from cardiac disease, 2 from gangrene, 12 from cerebral hemorrhage and 12 from general paralysis of the insane. Twenty-eight deaths were of persons under one year of age, 3 were between one and five, and 121 were over sixty years of age.

There were 105 births, — 49 males and 56 females.

Three hundred and nineteen surgical operations were performed.

In the out-patient department 970 cases were treated, — 658 medical and 312 surgical.

There were treated in the hospital for tuberculosis during the year 325 cases; of these, in 5 the disease was arrested, in 105 cases the patients improved, 50 were not improved and 102 died. Sixty-three cases were remaining in the hospital Oct. 1, 1902.

Further information concerning diseases treated, surgical operations performed, out-patient cases, etc., may be found in tables under hospital statistics, beginning on page 32.

Department for the Insane.

There have been admitted within the year 82 patients. The daily average has been 496. The number remaining Sept. 30, 1902, was 497.

Of the admissions, there were 7 cases of acute mania, 4 of acute melancholia, 3 of puerperal insanity, 1 of alcoholism, and the remaining were chronic or recurrent cases.

There were 54 deaths, — 26 males and 28 females. The infirmary tables show 197 treated, — 162 medical and 35 surgical (see additional table of statistics of the insane).

Medical Staff.

On April 1 Dr. Joseph B. Howland resigned his position as assistant superintendent, to become superintendent of the new State Colony for the Insane at Gardner, Mass. The skill and sound judgment which characterized all of Dr. Howland's work during the three years with us, together with his previous valuable hospital experience, is a guarantee of the success for which we look in the administration and upbuilding of the new institution at Gardner.

Dr. Arthur K. Drake, the first assistant physician, was promoted to succeed Dr. Howland.

A certificate for satisfactory service as interne was presented to Dr. William O. Hewitt.

TRAINING SCHOOL FOR NURSES.

The training school for nurses completes its eleventh year. The usual number of lectures and recitations have been conducted.

The following nurses have received diplomas: Louisa D. Haise, Clara E. Dowding and Maggie Matheson.

Miss E. Maude Ellis, the superintendent of nurses for five years, resigned in August, to accept a position as superintendent of nurses at the Lakeside Hospital in Cleveland, O. With Miss Ellis the efficiency of our training school has been greatly advanced, the graduates have been able to take important positions elsewhere, and her call to the Lakeside Hospital is a merited recognition of her skill, her faithfulness and untiring devotion to all the interests of the State Hospital. She carries with her to Cleveland our best wishes, and we are confident that great success will be hers in her new work.

Miss Augusta C. Robertson, superintendent of nurses at St. Luke's Hospital in Chicago, was called to fill the position left vacant by Miss Ellis.

IMPROVEMENTS MADE DURING THE YEAR.

Continuing the work on our new water supply, which was begun in September of last year, twenty wells have been driven, of varying depths, averaging forty feet, and a very satisfactory supply of water has been obtained. The analysis by the State Board of Health shows the water to be remarkably free from impurities, and there seems to be but little doubt that the quantity will be sufficient for all our needs, although, as the last year has been characterized by more rainfall than usual, we have not been able to give the matter a conclusive test. Drinking water can now be obtained in every part of the institution. To this condition, it seems, should be credited some of the improvement in general health of the institution during the year, and especially the greater freedom from intestinal disorders during the summer months. The old wells, which had been used for so many years for drinking purposes, have been abandoned.

A new mortuary chapel has been erected, and will be ready for use about the first of January. It is built entirely of field stone, and is of design and dimensions especially appropriate for its uses, and will be effective in adding comfort to the last visit of friends of deceased patients. Pipes for refrigerating will be extended to this building from the main line of our cold-storage system.

A cold-storage building has been erected by extending the walls of the kitchen boiler room and coal bunker, giving us three different floors, each divided into two sections, making six storage compartments, with a floor area of four thousand square feet. The ammonia process will be used in refrigeration, the compressor being placed in a new room which has been built directly off from our engine and dynamo room, so that this may be constantly under the care of an engineer. The pipes carrying the ammonia extend through our subways to our storage building. A contract has been made, and the plant will be in operation by the first of January.

Work on the spur track has made fair progress, a culvert has been built, necessary excavations have been made and the filling completed. It is expected that the grading will be finished during the coming month, and that we will be able to lay the tracks before the ground is frozen.

The new asylum for men, which was begun in March, 1901, has been completed, and will soon be ready for occupancy. There was an appropriation of $50,000 for this building, which is to accommodate 100 men, with an additional sum of $10,000 for heating, lighting and furnishing. The piping and wiring is completed, and a part of the furnishing. In order to obtain a more advantageous classification of the insane men, this building has been arranged in three separate sections, two of which will contain 30 patients each, and the third, or middle section, will contain 40. There are two stories and a basement. With the exception of a few patients in an infirmary section and a few in the section for violent cases, all will sleep on the second floor; in the gables of the main section of the building have been arranged six rooms to be used by the attendants.

In this building great care has been taken toward perfection in heating and in ventilation, and to give an abundance of light and sunshine in every section. Ample sanitary compartments have been arranged, placed in such relation to the hall and fire-proof stairways as to separate the building into three different parts, with a wide fire-proof section intervening. The day rooms are provided with fire-places, and in every way the building promises much comfort and attractiveness. The structure is of field stone to the height of the second floor, the second story is of brick, and the roof covering of slate with copper finish. It is plastered throughout, the first six feet of the walls being Portland cement, to resist the hard usage customary in such places. The principal framework is of southern pine, supplemented by considerable steel structure; in every way it seems to be the most substantial building which we have erected. It will be ready for occupancy in less than two years from the time the ground for the foundation was broken, and the appropriation of $50,000 has not been exceeded.

The buildings on the "Burt farm," which was purchased last year, have been equipped for use as a boys' ward, with accommodations for 10 boys, and placed under the care of Mrs. MacDonald, formerly a head nurse in our asylum department. This enables us to remove most of the boys in our institution from our hospital wards to a distance so far away that they are surrounded only by the influences of healthful country life.

I would suggest that an appropriation be made for the purchase of additional land.

Before this report was completed our hearts were saddened by the unexpected death of our first assistant engineer, Mr. Nicholas Cooney. Although he had been in poor health for many months, we did not believe that the end was so near. Mr. Cooney had held his position as assistant engineer for over fifteen years, and we feel that much of the safety and success in the running of that department had been due to his faithful assistance. His cheerful manner in responding to all of the calls of the institution, his faithfulness and exemplary habits, his kindly bearing toward every one with whom he came in contact, were the characteristics which increase the realization of our loss and deepen our sympathy for his bereaved family.

For another year of faithful and devoted work by our regular chaplains we express our sincere thanks.

We extend our thanks to those friends who have so kindly remembered us with gifts of books, periodicals, etc. We are always willing to pay expressage on reading matter of non-sectarian character.

Again thanking the trustees, individually and as a Board, for their kind advice, assistance and encouragement, I am,

Yours respectfully,

JOHN H. NICHOLS,
Superintendent.

GRADUATES OF TRAINING SCHOOL AT STATE HOSPITAL.

SURGICAL OPERATIONS.

OPERATIONS.	Well.	Relieved.	Not relieved.	Died.	Totals.
OPERATIONS ON AIR PASSAGES.					
Tracheotomy,	3	–	–	–	3
OPERATIONS ON GLANDS.					
Excision, cervical glands,	2	1	–	–	3
Excision, inguinal glands,	1	1	–	–	2
Incision, cervical abscess,	1	–	–	–	1
Incision, tuberculous glands,	–	4	–	–	4
Incision, inguinal glands,	2	4	–	–	6
OPERATIONS ON HEAD AND FACE.					
Excision, epithelioma of face,	–	1	–	–	1
Excision, fibroma of face,	1	–	–	–	1
Excision, wen of face,	1	–	–	–	1
Incision, abscess of face,	2	–	–	–	2
Removal, sequestrum of jaw,	1	–	–	–	1
Operations on eye: —					
Curettage, ulcer cornea,	1	–	–	–	1
Excision of pterygium,	3	–	–	–	3
Enucleation of eyeball,	1	–	–	–	1
Plastic, ectropion,	–	1	–	–	1
Operations on mouth and throat: —					
Incision, alveolar abscess,	2	–	–	–	2
Incision, peritonsillar abscess,	6	–	–	–	6
Incision for tongue-tie,	1	–	–	–	1
Tonsillotomy,	–	1	–	–	1
Operations on neck: —					
Excision, carbuncle,	2	–	–	–	2
Excision, epithelioma,	–	2	–	–	2
Excision, sarcoma,	1	–	–	–	1
Excision, submaxillary cyst,	1	–	–	–	1
OPERATIONS ON CHEST WALL.					
Incision, abscess of breast,	1	–	–	–	1
Paracentesis,	19	22	–	–	41
Resection of ribs, empyema,	2	4	–	–	6
OPERATIONS ON LUNGS.					
Incision and drainage of abscess,	–	1	–	–	1
ABDOMINAL OPERATIONS.					
Appendicitis,	1	–	–	–	1
Drainage, pelvic abscess,	–	1	–	–	1
Hernia, inguinal (radical cure),	20	–	–	–	20
Hernia, umbilical,	1	–	–	–	1
Hernia, ventral,	1	–	–	–	1
Paracentesis,	–	12	–	–	12
OPERATIONS ON RECTUM AND ANUS.					
Excision, fistula,	3	2	–	–	5
Clamp and cautery, hemorrhoids,	5	–	–	–	5
Incision, ischio-rectal abscess,	4	5	–	–	9
OPERATIONS ON GENITO-URINARY SYSTEM.					
Divulsion, urethra,	1	–	–	–	1
External urethrotomy,	–	1	–	–	1
Litholapaxy,	–	1	–	–	1
Perineal lithotomy,	1	–	–	–	1
Perineal section,	1	–	–	–	1

SURGICAL OPERATIONS — *Concluded.*

OPERATIONS.	Well.	Relieved.	Not relieved.	Died.	Totals.
OPERATIONS ON GENITO-URINARY SYSTEM — Con.					
Operations on penis: —					
Circumcision,	7	–	–	–	7
Incision of foreskin,	2	3	–	–	5
Operations on scrotum and testes: —					
Excision, epithelioma,	1	1	–	–	2
Hydrocele, radical cure,	5	–	–	–	5
Hydrocele, tapped,	–	6	–	–	6
GYNÆCOLOGICAL OPERATIONS.					
Curettage uterus,	6	1	–	–	7
Hysterectomy,	1	–	–	–	1
Incision, labial abscess,	1	–	–	–	1
Myomectomy,	–	–	–	1	1
Perineorrhaphy,	5	–	–	–	5
Salpingectomy,	2	–	–	–	2
Salpingo-oöphorectomy,	1	–	–	–	1
Trachelorrhaphy,	5	–	–	–	5
OPERATIONS ON EXTREMITIES.					
Amputation, finger,	2	–	–	–	2
Amputation, Pirogoff's,	1	–	–	–	1
Amputation, thumb,	1	–	–	–	1
Amputation, thigh,	1	–	–	–	1
Amputation, toe,	2	–	–	–	2
Curettage, femur,	1	–	–	–	1
Curettage, periosteum tibia,	–	1	–	–	1
Excision, carbuncle of leg,	3	–	–	–	3
Excision, epithelioma hip,	1	–	–	–	1
Excision, enchondroma of thumb,	1	–	–	–	1
Excision, inflamed bunion,	2	–	–	–	2
Excision, ingrowing toe nail,	1	–	–	–	1
Excision, varicose veins,	6	–	–	–	6
Incision, abscess, thigh,	–	2	–	–	2
Incision, septic arm,	1	–	–	–	1
Incision, felon,	1	–	–	–	1
Incision, septic finger,	6	–	–	–	6
Incision, septic foot,	4	1	–	–	5
Incision, furuncle,	1	2	–	–	3
Incision, septic hand,	1	–	–	–	1
Incision, septic leg,	5	–	–	–	5
Incision, septic thigh,	2	–	–	–	2
Incision, typhoid elbow,	–	3	–	–	3
Osteotomy,	3	–	–	–	3
Removal, sequestrum of tibia,	2	–	–	–	2
Skin graft, pin point,	7	1	–	–	8
Skin graft, Thiersch,	20	–	–	–	20
MISCELLANEOUS OPERATIONS.					
Curettage sinus,	–	1	–	–	1
Excision, lipoma of back,	2	–	–	–	2
Excision, sarcoma of back,	–	2	–	–	2
Excision, lympho-sarcoma groin,	1	–	–	–	1
Incision, abscess of back,	1	4	–	–	5
Incision, cold abscess,	2	1	–	–	3
Incision, perinephritic,	–	1	–	–	1
Intravenous infusion,	3	–	–	–	3
DISLOCATIONS AND FRACTURES.					
Dislocation of shoulder,	1	–	–	–	1
Fracture of ankle,	1	–	–	–	1
Fracture, Colles,	3	–	–	–	3
Fracture, femur,	–	1	–	–	1
Fracture, neck femur impacted,	–	3	–	–	3
Fracture, Pott's,	1	–	–	–	1
Fracture, tibia and fibula,	2	–	–	–	2
Totals,	220	98	–	1	319

TABLE OF DEATHS.

CAUSES OF DEATH.	TABLE BY MONTHS.												Males.	Females.	Totals.	TABLE BY AGES.												
	1901.			1902.																								
	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.				Under 1 year.	1 to 5.	5 to 10.	10 to 20.	20 to 30.	30 to 40.	40 to 50.	50 to 60.	60 to 70.	70 to 80.	80 to 90.	90 to 100.	Unknown.
Abscess of brain,	–	–	–	–	–	–	1	–	–	1	–	–	1	1	2	–	–	–	–	1	1	–	–	–	–	–	–	–
